Netquiz Pro 4

ABOUT NETQUIZ PRO 4

Netquiz Pro 4 is an authoring tool for quizzes¹ which can be uploaded to the Internet. With *Netquiz Pro 4* it is possible to create 13 types of questions ([Matching Board](#), [Classification](#), [Dictation](#), [Essay](#), [Fill in the Blanks](#), [Highlight Text](#), [Identify Parts of an Image](#), [Matching](#), [Multiple Answer](#), [Multiple Choice](#), [Sequencing](#), [Short Answer](#), [True/False](#)). You can also create [Section Pages](#) to group questions together in the web version of the quiz. These questions and sections can contain text, images, audio clips, video and web hyperlinks. They can also be configured in different ways according to your needs.

In a question bank² (the ".npro" file), questions and sections appear as a list (see [Adding Questions and Sections](#)) and can be dragged into different quizzes (see folders in "Quizzes").

Code	Title	Question type	Weighting	Date created	Date modified	Note

Quizzes

Cinequiz
19 elements - 19 points

The main window of *Netquiz Pro 4* has two panes: Questions and Sections at the top, and Quizzes at the bottom.

Each quiz can be customized: home page, appearance, number and order of questions, display language, and so on. You can open several *Netquiz Pro 4* files simultaneously (each corresponds to a ".npro" file) and cut and paste your questions from one file to another.

To create the web version of a quiz, you simply select a quiz folder in the *Netquiz Pro 4* window and click on the "w->" button. A directory containing all the HTML pages of the quiz will be created on your hard drive. Then all you need to do is upload this directory to a web server (for more details, see [Putting a Quiz Online](#)).

On the [CCDMD](#) web site, you can view two examples of quizzes created using *Netquiz Pro 4*. On the [Netquiz Pro 4 software](#) page, select "Download"; then, at the bottom of the window, click on Example: [Cinequiz](#).

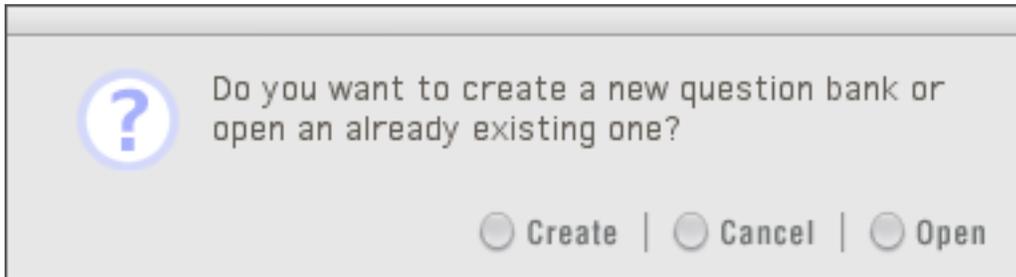

N.B. [QuickTime](#) software is required to play the media files associated with certain questions.

¹ By default, quizzes comply with the SCORM standard. Therefore, a follow-up of quiz takers' results (individual question grades and overall grades) may be made when quizzes are integrated into a pedagogical platform operating under the SCORM specifications.

² In addition to questions, a question bank can also contain sections and quizzes. The term "question bank" is used here for the sake of conciseness.

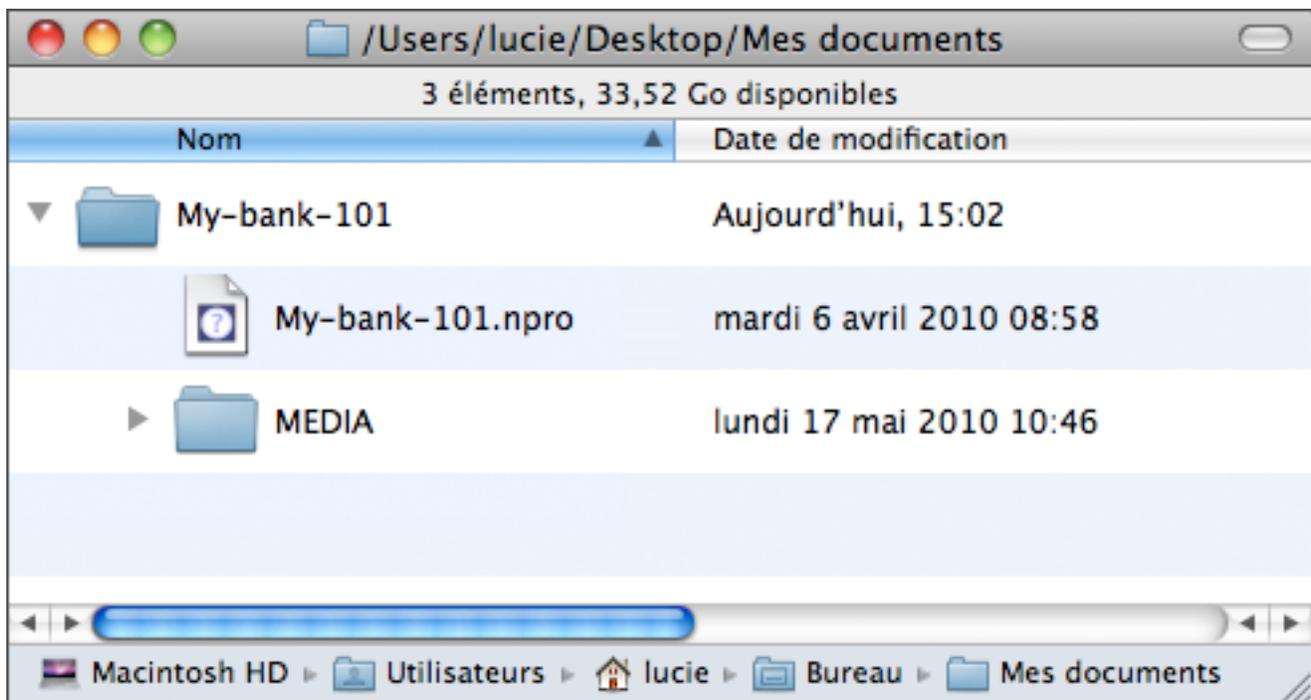

GETTING STARTED

When starting up *Netquiz Pro*, a window prompts you to create a question bank or open an existing one.

Window for creating or opening a question bank

The first time you use the program, click on "Create". A new window will prompt you to name your question bank (e.g. My-bank-101), and to save it. A directory with this name will be created on your computer. This directory contains the file "My-bank-101.npro" as well as a "MEDIA" folder. If you have already created a question bank in a previous work session, click "Open" and browse your hard disk to find the file with the ".npro" extension.

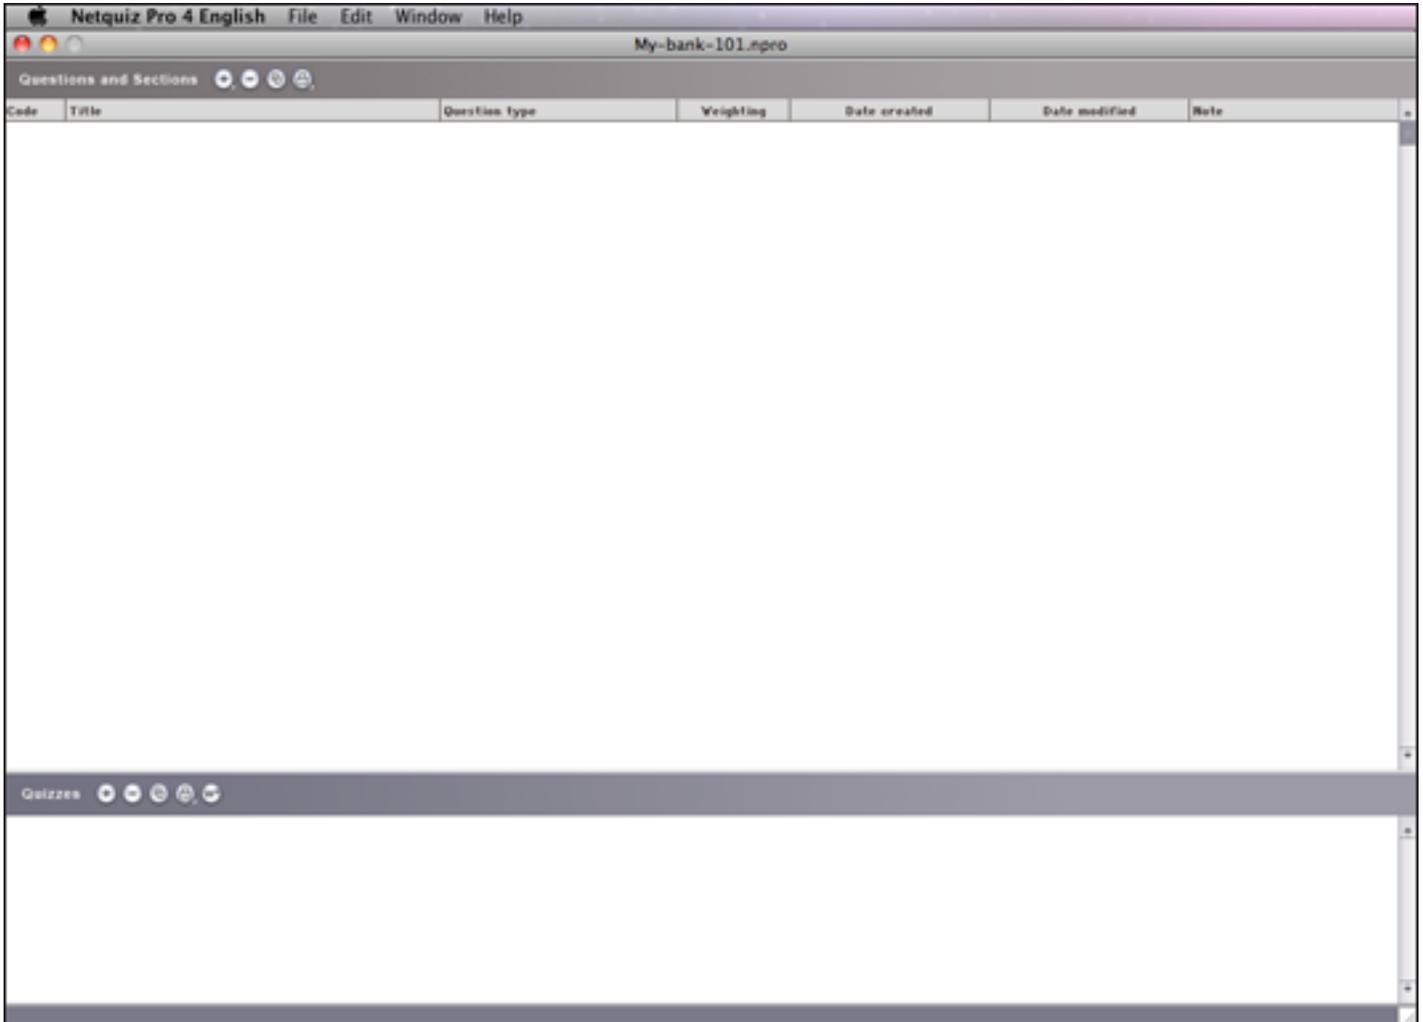

When creating a question bank, a directory containing a ".npro" file and a "MEDIA" folder is saved on your computer

Files created with *Netquiz Pro 4* must always have an ".npro" extension in order to be read by *Netquiz Pro 4*. They must also always be placed in the same directory as the "MEDIA" folder: it is in this folder that the images, audio clips and videos for your questions will be gathered. In addition, when naming files, choose a name that is relatively short (28 characters maximum) and avoid using special characters.

The content of the *Netquiz Pro 4* files is displayed in a window that can be maximized or minimized by dragging the lower right hand corner of the window. The menu bar at the top of this window holds the "File", "Edit", "Windows" and "Help" menus. Refer to help on the [Menu Bar](#) to learn about these menus.

In the following example, we have just created a question bank named My-bank-101. The "Questions and Sections" pane and the "Quizzes" pane of the window are empty. Refer to [Adding Questions and Sections](#) to find out more about the buttons in the "Questions and Sections" button bar, and to [Adding and Preparing Quizzes](#) to find out more about the buttons in the "Quizzes" button bar.

Blank question bank

MENU BAR

The menu bar at the top of the *Netquiz Pro 4* window contains the "File", "Edit", "Windows" and "Help" menus.

The File Menu

The "File" menu contains the following commands for managing question bank files:

New

The "New..." command lets you create a new ".npro" question bank file to generate both questions and quizzes. When this command is executed, a dialogue box prompts you to enter the name of the new bank and specify where to save it on your computer. A directory with that name is then created in that location. We recommend choosing a relatively short file name (28 characters maximum) and to avoid using special characters. As explained in [Getting Started](#), the directory contains your ".npro" file and a "MEDIA" folder, where image, audio and video files for your questions will automatically be stored. Avoid modifying this setup: ideally, the "MEDIA" folder should be located in the same directory as the ".npro" file. If you place it in a different location, a dialogue box will prompt you to locate the "MEDIA" folder.

Open

The "Open..." command opens a previously saved question bank file. A dialogue box prompts you to locate and open a ".npro" file. When this command is executed, the program verifies that the "MEDIA" folder is in the same directory as the ".npro" file. If it isn't, a dialogue box will prompt you to locate the "MEDIA" folder. Otherwise, the media files will not appear in the questions

You can open several question banks at the same time and move from one to the other by clicking on their respective windows or by choosing a specific bank in the "Windows" menu. The menu commands only apply to the window of the active bank, i.e. the window in the foreground. When two question banks are open, you can "Copy" questions in one bank and "Paste" them in the other (refer to the "Copy" and "Paste" commands in "The Edit Menu" section further down.)

Close

The "Close" command closes the active question bank file (the window in the foreground). You will be prompted to save any changes before closing the window.

Save

The "Save" command lets you save changes made to the active question bank (the window in the foreground). The name of a bank must not exceed 28 characters, including the ".npro" extension (e.g. My-bank-101.npro).

Save As...

The "Save As..." command lets you save the active question bank under a different name. The new name must not exceed 28 characters including the ".npro" extension (e.g. My-bank-101-copy.npro).

Page Setup...

The "Page Setup..." command prompts the printer dialogue box in which you can indicate the paper size and document orientation (portrait or landscape).

Quit

The "Quit" command is used to exit *Netquiz Pro 4*. If changes have been made to any of the open question banks, you will be prompted to save them first.

The Edit Menu

The "Edit" menu contains the commands used to edit the different text fields in *Netquiz Pro 4*. Some of these commands also apply to the table containing the list of questions or to the zone containing the quiz folders.

Cancel

The "Cancel" command cancels the last operation done to a text field or erases the last characters written.

Cut

The "Cut" command acts differently depending on the active area. If the cursor is located in a text field and a portion of the text is selected, this command will remove the selected text. If one or several questions are selected in the question table, this command will delete them. A dialogue box will first ask you to confirm this operation because the deleted questions cannot be retrieved afterwards. If a quiz folder is selected in the quizzes pane, the "Cut" command will delete it. Again, a dialogue box will ask you to confirm the operation before completing it.

Copy

The "Copy" command acts differently depending on the active area. If the cursor is located in a text field, this command will memorize the selected text in order to use it at a later time, e.g. to paste it in another *Netquiz Pro 4* text field or in other software (see the "Paste" command below). If one or several questions are selected in the question table, this command will keep in memory the content of the selected question(s). This operation lets you then "Paste" these questions (see the "Paste" command) in another question bank. If a quiz folder is selected in the quizzes pane, the "Copy" command will remember the data of this quiz, which can then be duplicated in the same pane using the "Paste" command (N.B. unlike the questions, the quizzes cannot be cut and pasted from one question bank to another).

Paste

The "Paste" command acts differently depending on the active area. If the cursor is located in a text field, this command enters, at the cursor's location, the last portion of cut ("Cut" command) or copied text ("Copy" command) from another *Netquiz Pro 4* text field or other software. If you have copied questions from the question table using the "Copy" command, you can "Paste" these questions either in the same table - the equivalent to duplicating them - or in the table of another *Netquiz Pro 4* file (N.B.

you must make sure to click on the appropriate question table for the "Paste" command to become active and apply to that table). If you have copied a quiz using the "Copy" command, you can duplicate it by using the "Paste" command (N.B. unlike the questions, the quizzes cannot be cut and pasted from one question bank to another).

Select All

The "Select All" command selects the entire text in the text field being edited or all the questions in the question table.

The following commands are used to modify the style of a previously selected portion of text when editing a question or to insert a web link or an image (N.B. certain text fields do not allow style changes or the insertion of a hyperlink or an image; in such a case the following commands will appear shaded in the "Edit" menu).

Normal

The "Normal" command is used to remove the style of the selected portion of text.

Bold

The "Bold" command is used to put in bold characters the selected portion of text.

Italic

The "Italic" command is used to put in italic characters the selected portion of text.

Strike Out

The "Strike Out" command is used to strike out the selected portion of text.

Superscript

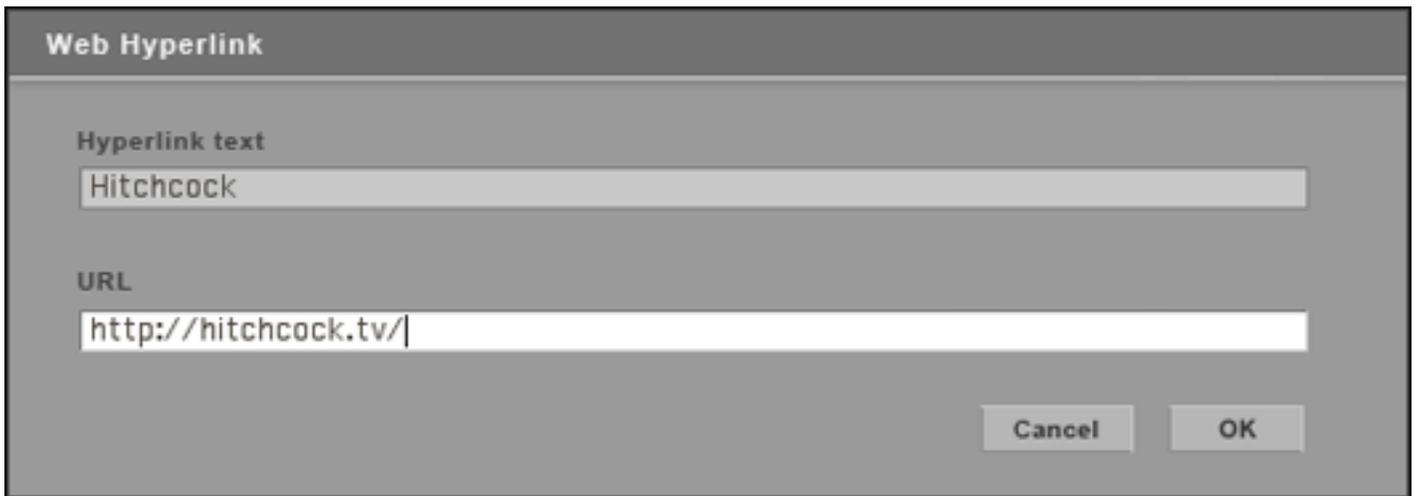

The "Superscript" command puts the selected text into a superscript position.

Subscript

The "Subscript" command puts the selected text into a subscript position.

Insert a Web Hyperlink

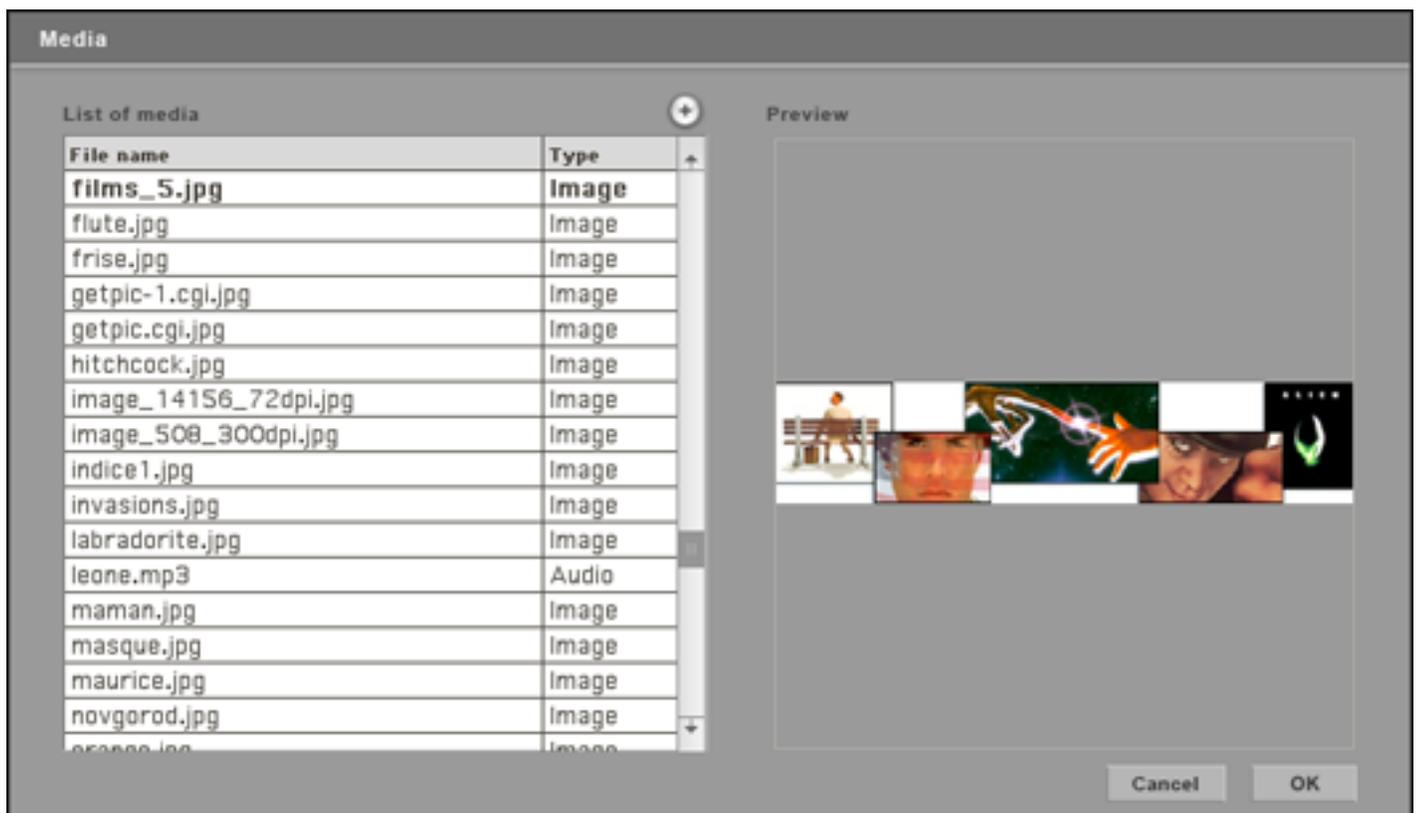

When the "Insert a Web Hyperlink" command is applied to selected text that can be modified in style, a box appears in which the selected text is reproduced in the "Hyperlink text" field. Enter a valid Internet address in the "URL" field next to "http://" and click on the "OK" button. The selected phrase will become an actual link to the web page in the web version of the question. To remove a hyperlink, click on the underlined text, and delete the "URL" address in the dialogue box.

Dialogue box for inserting a hyperlink into a text field

Insert an Image

The "Insert an image" command lets you insert an image at the cursor insertion point in certain text fields that can accept changes in style. This command prompts a box in which you can choose an image type media file from the media list you have already imported to the "MEDIA" folder of the question bank.

Dialogue box for inserting an image

If the image you want to insert does not appear in this list, you can add it by clicking on the "+" button of the "Media" dialog box. This button prompts a window which allows you to browse your hard drive to find the image and import it (by clicking on the "Open" button of the search window) in the "MEDIA" folder of your question bank. An identical "Media" dialog box appears when you insert an image, an

audio clip, or a video in the heading of a question or on the home page of a quiz (see [Questions and Sections](#) and [Adding and Preparing Quizzes](#)).

N.B. The following formats are supported by *Netquiz Pro 4* for imported image files: PICT, JPEG, BMP and PNG formats.

The Window Menu

If several question banks are open, you can go from one to the other by selecting the desired window or by selecting the appropriate name from the "Window" menu.

The Help Menu

The "Help" menu contains three commands: "Netquiz Pro 4 Help", "Credits" and "Comments".

Netquiz Pro 4 Help

The "Netquiz Pro 4 Help" command opens a window that provides information on the various functions of *Netquiz Pro 4*. You can print the displayed help topic or all help topics by clicking the print button in the lower left corner of the window.

Answer a Web Quiz

ABOUT NETQUIZ PRO

Netquiz Pro 4 is an authoring tool for quizzes¹ which can be uploaded to the Internet. With Netquiz Pro 4 it is possible to create 13 types of questions (Matching Board, Classification, Dictation, Essay, Fill in the Blanks, Highlight Text, Identify Parts of an Image, Matching, Multiple Answer, Multiple Choice, Sequencing, Short Answer, True/False). You can also create Section Pages to group questions together in the web version of the quiz. These questions and sections can contain text, images, audio clips, video and web hyperlinks. They can also be configured in different ways according to your needs.

In a question bank² (the ".npro" file), questions and sections appear as a list (see Adding Questions and Sections) and can be dragged into different quizzes (see folders in "Quizzes").

ADDING QUESTIONS AND SECTIONS

To compose, edit, delete, duplicate or print a question or a section, you should be familiar with the "Questions and Sections" button bar and the "Questions and Sections" pane in the main *Netquiz Pro 4* window.

The Questions and Sections Button Bar

On the "Questions and Sections" button bar, located at the top of the main *Netquiz Pro 4* window, you will find four buttons used to edit questions.

The screenshot shows the Netquiz Pro 4 English application window. At the top, there is a menu bar with 'File', 'Edit', 'Windows', and 'Help'. Below the menu bar is a title bar with the text 'NetquizPRO4Example.npro'. The main area is divided into two panes. The top pane is titled 'Questions and Sections' and contains a table of questions. The bottom pane is titled 'Quizzes' and shows a folder icon with the text '19 elements - 19 points'.

Four buttons for editing questions or sections

Button (Add a question)

The "+" button lets you add a question to the question bank of the active window. When you click on this button, a drop-down menu of questions (and section) appears (Matching Board, Classification, Dictation, Essay, Fill in the Blanks, Highlight Text, Identify Parts of an Image, Matching, Multiple Answer, Multiple Choice, Sequencing, Short Answer, True/False, Section Page). Once you make a selection, an edit window appears (for more details on editing a question or a section, refer to Questions and

Sections or to the section discussing the specific element you wish to compose).

Editing window for a Matching question

When you close the edit window for the question, a line corresponding to this question is added to the "Questions and Sections" pane (see the section on "The Questions and Sections Pane" below).

Button (Delete the selected question(s))

The "-" button allows you to delete the selected question(s) in the "Questions and Sections" pane. Deleted questions cannot be recovered, so as a safety precaution, a message prompts you to confirm the deletion.

Duplicate Button

The "Duplicate" button represented by two superimposed sheets allows you to duplicate the selected question(s) in the questions bank. Duplicating allows you to create a new question based on an existing one

Print Button

The "Print" button, represented by a printer button, displays a menu that allows you to:

- Print Contents of Selected Elements
- Print All Questions and Section Pages
- Print Questions and Sections List

If you select to "Print Questions and Sections List", a dialogue box prompts you to specify the columns to be printed ("Code", "Title", "Question type", "Note").

The Questions and Sections Pane

As you compose questions, they are added to the "Questions and Sections" pane of the active *Netquiz Pro 4* window.

Code	Title	Question type	Weighting	Date created	Date modified	Note

Quizzes

Cinequiz
19 elements - 19 points

Questions and Sections pane located in the upper part of the *Netquiz Pro 4* main window.

Selecting a Question or Section Page

To select a single question or section page, click the appropriate line in the "Questions and Sections" pane. Hold down the "Shift" or "Ctrl" key in *Windows*, or the "Shift" or "Cmd" key in *Mac OS* to select

several questions. Selected questions appear bolded.

Modifying a Question

To modify the content of a question, double-click the appropriate line in the "Questions and Sections" pane. The editing window for the question will appear in the centre of the screen (for more details, refer to [Questions and Sections](#) or to the sections discussing the types of elements you wish to compose).

Sorting the Contents of the Questions and Sections Pane

To sort the contents of the "Questions and Sections" pane, click the appropriate column header:

- "Code" sorts the questions according to the order in which they were created (every question is automatically given a unique code by *Netquiz Pro 4* when it is first created)
- "Title" sorts the questions alphabetically by title
- "Question type" sorts questions alphabetically by type
- "Weighting" sorts them according to their grade value
- "Date created" and "Date modified" sort the questions by corresponding date
- "Note" sorts the questions alphabetically by notes entered

Changing the Width of a Column

To change the width of a column in the list of survey questions, place the cursor over a column separator line. Once the column resize cursor appears, drag the line left or right.

QUESTIONS AND SECTIONS

Every question or section has an editing window that includes two tabs:

- The “Properties” tab allows you to configure a question or section to meet your needs.
- The “Edit” tab allows you enter a question or section's content or data.

A “Web Preview” button exists at the bottom left of the window to allow you to preview a question or section in your browser (e.g. *Explorer* or *FireFox* for *Windows*, or *Safari* for *Mac OS X*).

The Properties Tab

The "Properties" tab displays several settings that let you customize a question or a section. The settings below the horizontal rule are specific to each type of question/section (for further information, refer to the help topic for the particular question type), while those above the line are common to all types of questions.

The screenshot shows the 'Properties' tab of a 'Question Preparation' window for a 'C3 - Matching' question. The window has two tabs: 'Properties' (selected) and 'Edit'. The settings are organized into several sections:

- Question title:** A text field containing 'Hollywood Stars'.
- Weighting:** A text field containing '1.0'.
- Note:** A text area containing 'Section 1' with expand/collapse arrows.
- Quizzes containing this element:** A text field containing 'Cinequiz'.
- Web parameters (Note: These parameters can be applied to all questions in the Web Quiz Preparation window under the Properties tab):**
 - User controls media
 - Automatically start AUDIO in the question
 - Automatically start VIDEO in the question
 - Display the Correct Answer button
- Number of matching pairs:** A text field containing '5'.
- Pairing type:** A dropdown menu showing 'Image - Text'.
- Order style:** A dropdown menu showing 'Alphabetical'.
- Answer order:**
 - Random
 - Predetermined
 - A text field containing 'A B C D E' with expand/collapse arrows.

At the bottom of the window, there are three buttons: 'Web Preview', 'Cancel', and 'OK'.

Properties tab in the question/section editing window.

Question or Section Title Field

Netquiz Pro 4 assigns a default title to each question or section, e.g. "*Matching Question *". It can be renamed with a more meaningful title to help you locate it in the "Questions and Sections" pane. Note that this title does not appear anywhere in the web version of the question.

Weighting

For obvious reasons, section page elements have no weighting. However, for questions, *Netquiz Pro 4* assigns a default weighting of "1.0", with the exception of "Matching Board" and "Essay" questions which are given a default weighting of "0". You can change these values to those of your choice. You will also learn, in [Adding and Preparing Quizzes](#), that it is possible to modify a question's weighting in a particular quiz without changing its value in the "Properties" tab. This can be useful if you are using the same question in several quizzes. Please note that if you give a value of more than "0" to a "Matching Board" or "Essay" question, quiz takers will automatically receive "0" if they do not finish the question or complete the essay. Moreover, they will receive the full points simply by finishing the matching board question or writing text in the answer field of the essay question.

Note

The "Note" field lets you write the notes or comments you choose. Because the text in this field appears in one of the columns of the question pane on the main window, you can use it to identify certain questions easily (e.g. incomplete questions, questions related to a particular chapter or quiz, or even questions intended for a specific classroom group). Notes do not appear anywhere in the web version of the question.

Quizzes Containing This Element

The "Quizzes containing this element" menu cannot be edited. It lists the quizzes in which you have inserted the question or the section if there are any (see the [Adding and Preparing Quizzes](#)).

Web Parameters

These parameters allow you to indicate whether the user controls the audio and video when the question loads or whether you want the audio and video to start automatically. Another parameter allows you to control the display of the "Correct Answer" button which allows the viewer to see the question answer. "Web parameters" are also affected globally within a quiz "Properties" tab. The radio-button "User controls media" and the "Display the Correct Answer button" check box are selected by default. Note that these parameters can be customized as needed in a given quiz (see [Adding and Preparing Quizzes](#)).

The Edit Tab

The "Edit" tab displays various fields for a question or section's content. Different data is entered depending on the question/section (for more details, see the sections related to the individual types of questions or to the section page).

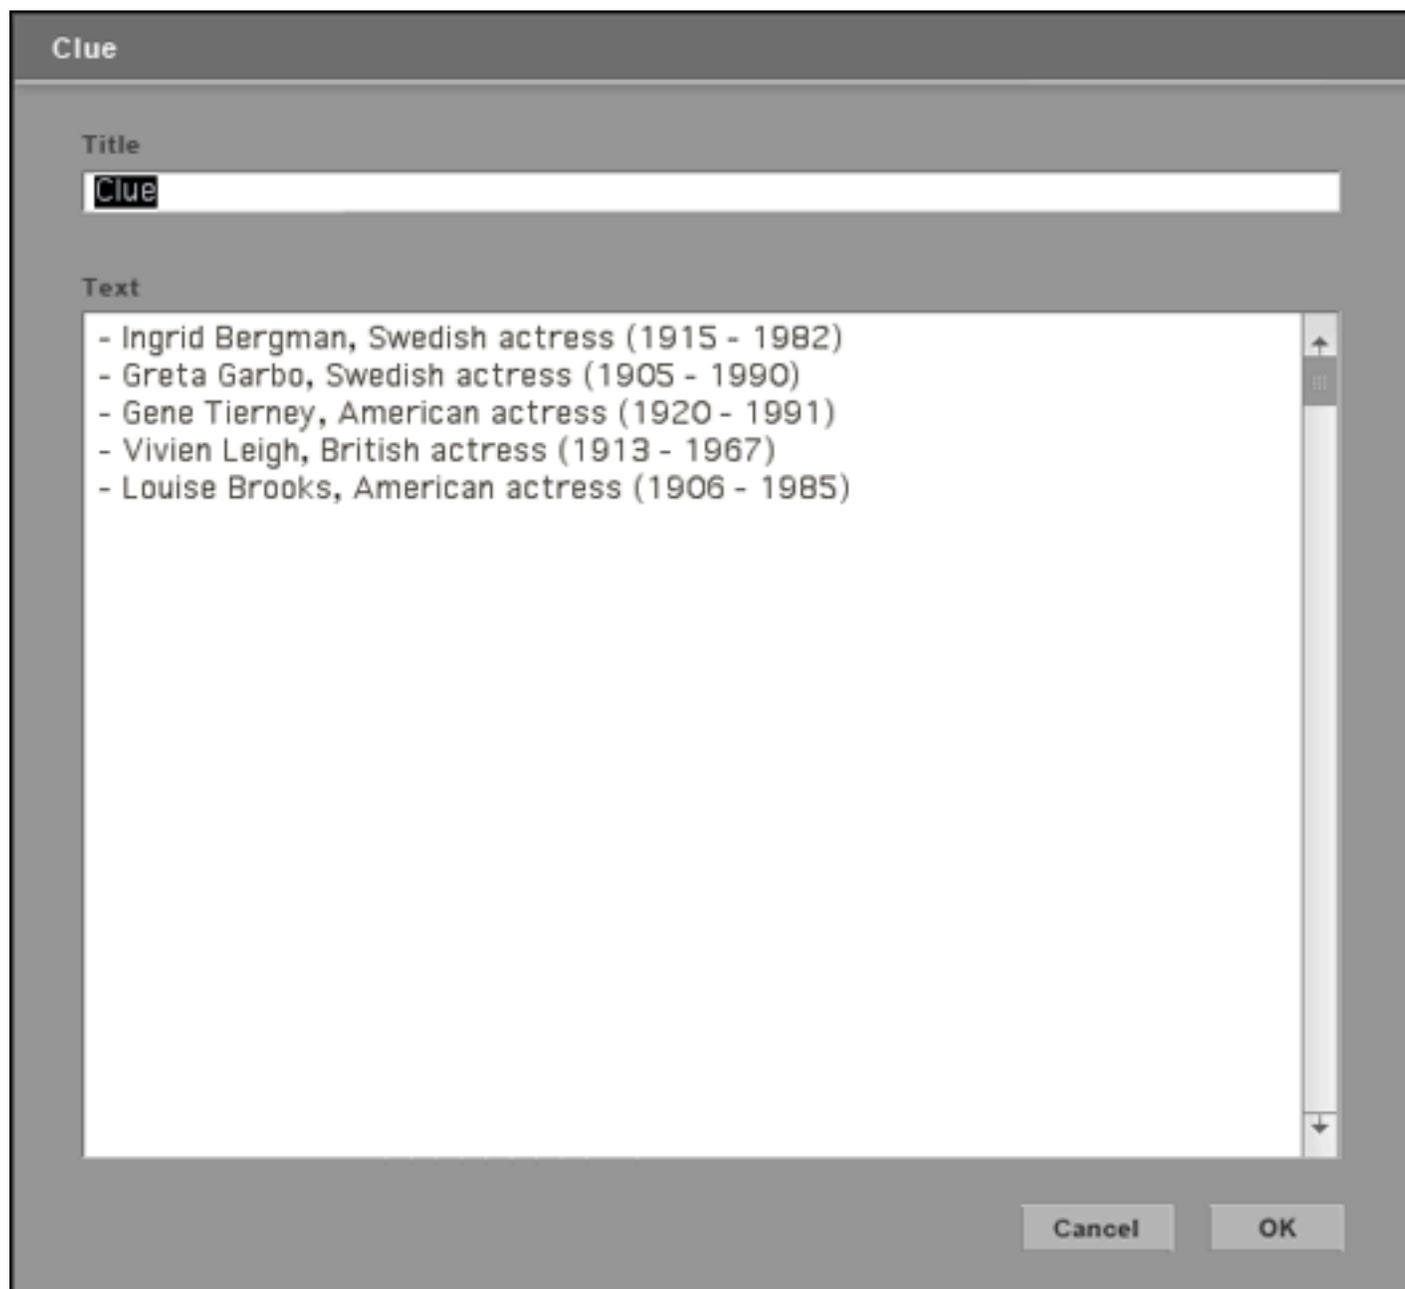

The screenshot shows the 'Edit' tab of a question editor. At the top, there are tabs for 'Properties' and 'Edit'. Below these are sections for 'Clue' and 'Source', each with a 'No image', 'No audio', 'No video', and 'No text' icon. The main area is titled 'Question or statement text' and contains a text box with the instruction: 'Drag and drop these films to the movie personalities who starred in them.' Below this are four rows of items, each with a 'First item' (a small image of a person), a 'Second item' (a list of film titles), a 'Positive feedback' text box, and a 'Negative feedback' text box. The 'Negative feedback' boxes all contain the text 'See the clue.' At the bottom, there are 'Web Preview', 'Cancel', and 'OK' buttons.

Item	First item	Second item	Positive feedback	Negative feedback
A		Casablanca; Joan of Arc; Stromboli		See the clue.
B		Gösta Berling's Saga; Queen Christina; Anna Karenina		See the clue.
C		Laura; Leave Her to Heaven; Whirlpool		See the clue.
D		Fire Over England; Gone with the Wind; A Streetcar Named Desire		See the clue.

Edit tab in the editing window of a question or section

Clues and Source Sections

In the top part of the edit tab, you will find two areas defined by an L-shaped line and a small arrow. By default, *Netquiz Pro 4* sets these two areas to "No Clue" and "No Source" to indicate that they are empty. If you want to include a clue or cite a source link (or both), click on the respective area(s) and a dialogue box will appear to let you enter a title and some text.

The image shows a dialog box titled "Clue". It has a "Title" field containing the word "Clue" and a "Text" area containing a list of actresses: Ingrid Bergman, Swedish actress (1915 - 1982); Greta Garbo, Swedish actress (1905 - 1990); Gene Tierney, American actress (1920 - 1991); Vivien Leigh, British actress (1913 - 1967); and Louise Brooks, American actress (1906 - 1985). The dialog box has "Cancel" and "OK" buttons at the bottom right.

Dialogue box for entering a clue

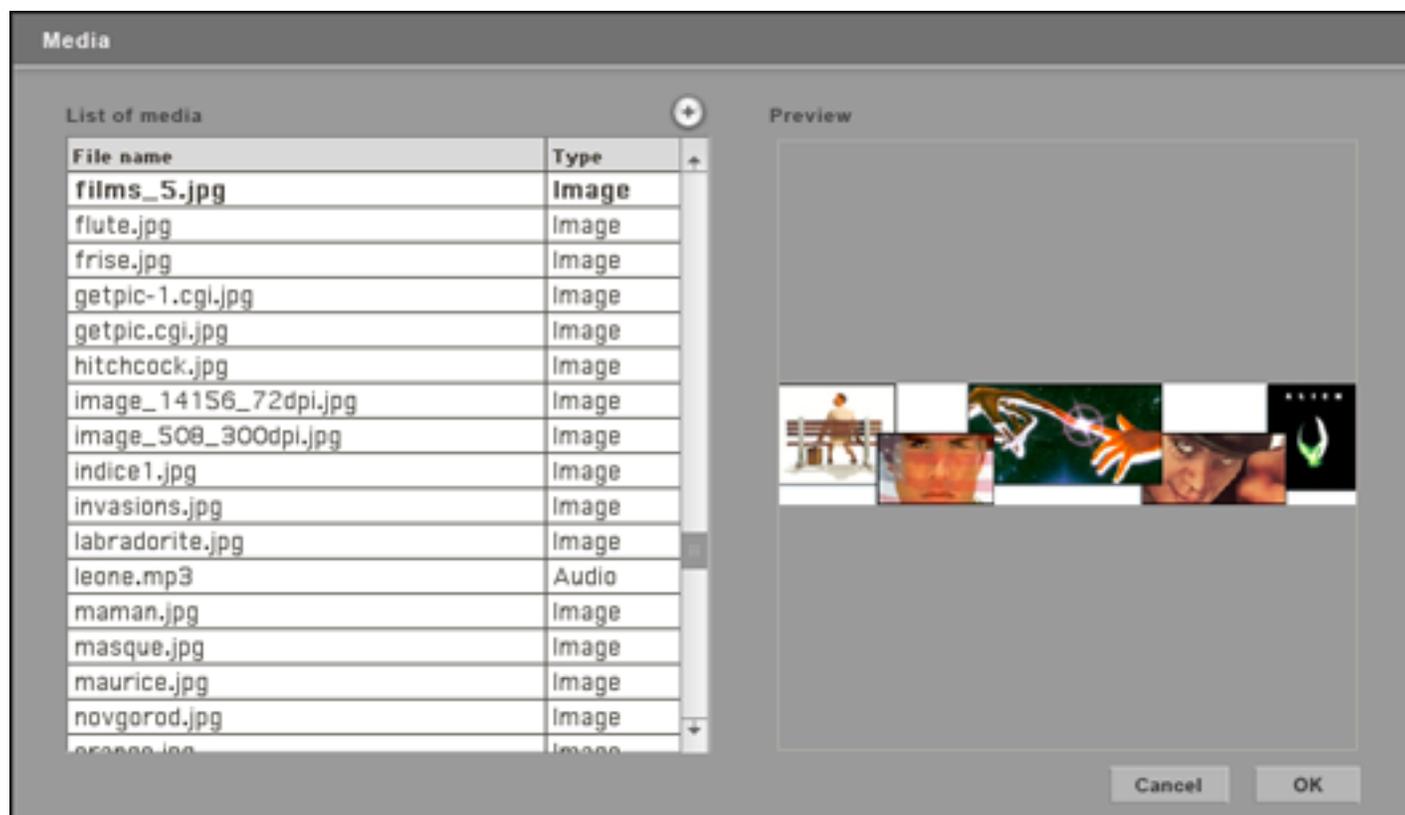

You can enter what you wish in the "Title" field, for example "Here is a little clue", "Reference", "To learn more...", etc. Alternately, these can be used for purposes other than giving a clue or a source; it depends on your needs. The text area in this window accepts changes in style. Refer to "The Edit Menu" section in [Menu Bar](#) to see how you can change the style or add web links and images to this field.

In the web version of the question, only the titles appear hyperlinks which must be clicked for the text to be displayed.

Image, Audio and Video Buttons

The top of the edit tab displays three buttons, which are used to insert image, audio, or video files into a question. If you wish to insert one or more of these media, click the corresponding button and choose the "Select" menu option. A dialog box will prompt you to select an image, audio, or video file

from the list of media previously imported to the “MEDIA” folder of your question bank. You can sort the list by “Filename” or “Type” by clicking the corresponding column header.

Dialogue box to insert an image, audio or video in the heading of a question or section

If the image, audio, or video file you want to insert into a question does not appear in the list, you can add it by clicking the "+" button in the "Media dialogue box". This displays the file dialogue box that allows you to locate and import media (by clicking the “Open” button in the dialogue box) to the “MEDIA” folder of your question bank.

N. B. Image formats that can be imported to the question bank include PICT, JPEG, BMP and PNG (*Netquiz* does not own the rights to display GIF images). Audio and video formats that can be imported are MP3, MP4, MOV, AIFF, WAVE, MPEG, MID and AVI.

Text Button

To the right of the "Image", "Audio" and "Video" buttons is a fourth button that allows you to insert "Text" that must be read before the question question itself. The "Title" and "Text" field are identical to the ones described above, in the "Clue" and "Source" sections. Unlike the text in the "Clue" and "Source" sections, all the text you enter here will be visible above the question or statement text in the web version of your question.

Question or Statement Text Field

The "Question or statement text" field is used to input the question text. It is not meant for instructions on how to answer the question; the question mark button on the right side of the question's the title bar offers specific instructions on how to answer each question type (see the “The Web Preview” section below).

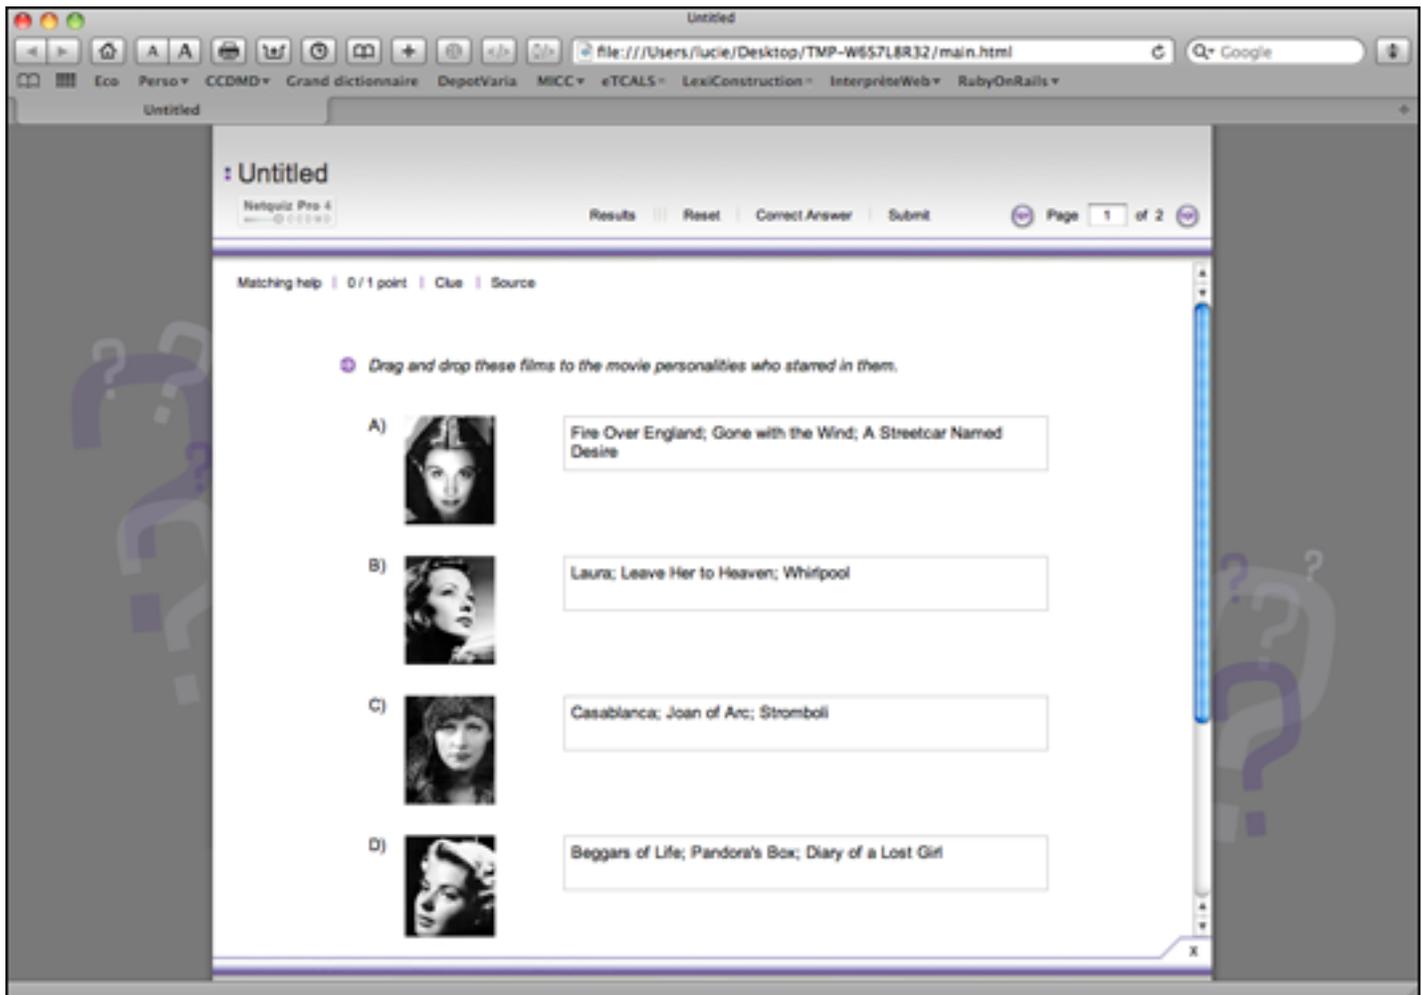

The Web Preview

To preview the web version of your question, you must have either *Internet Explorer* or *FireFox* for *Windows*, or *Safari* for *Mac OS X* installed on your computer. By clicking the "Web Preview" button in the edit tab of the question, the web question is displayed in a browser window. By default, the web preview of a question or a section appears with the "Classic" background. In Adding and Preparing Quizzes, you will see that you can modify the background for all the content of a given quiz (background image, colours of buttons and banners, etc).

Whether in a question or a section, a header at the upper part of the web page shows the title of the quiz (appears as "Untitled" in figures below because these are previews of a question and a section), the *Netquiz Pro 4* logo, and the following navigation buttons:

- "Results" displays the users's cumulative results for the entire quiz
- "Reset" erases answer fields for the question or resets them in random order
- "Correct Answer" displays the answer to the question
- "Submit" records the answer to the question, assigns a grade and displays feedback
- "<" and ">" arrows let users go from one question to the next or previous question
- "Page" (in Page X of Y) shows the current page number and allows users to enter the page number they wish to access

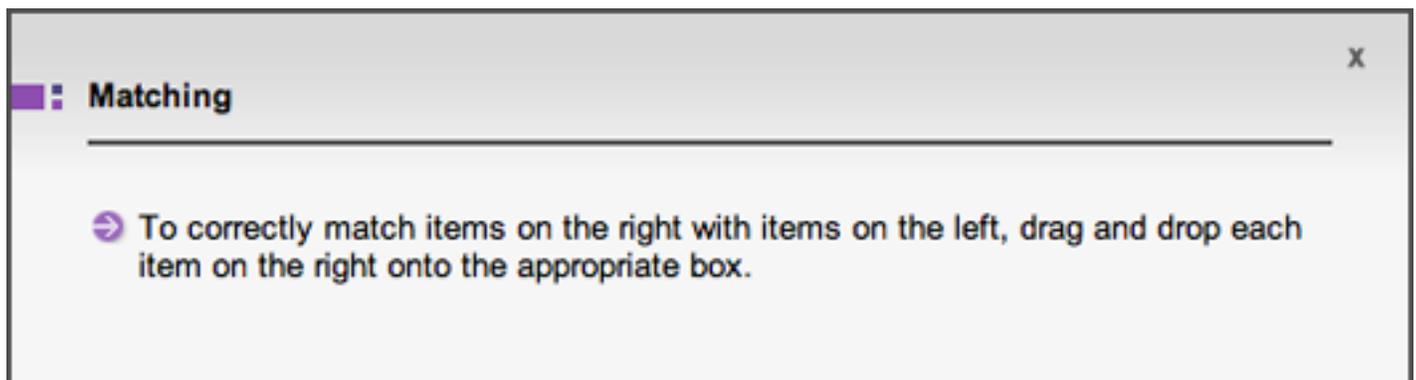

N. B. If you ask for web previews repeatedly, you may have to refresh the web page or empty your browser's cache in order to display the most recent changes. You will probably notice that each time you request a preview, a directory titled TMP-<sequence of random letters and numbers> appears on your desktop; this will disappear when you close your editing window.

Web preview of a question

Below the header of the web version of a question, you will find:

- the question type, with technical instructions for answering the question to be displayed;

Window displaying instructions for a specific question type

- and the grading, which appears as soon as the user clicks on "Submit".

Aside from the above elements common to all question types, and depending on the content entered when the question was edited, you will also find:

- "Clue" and/or "Source" (these tiles may have been modified during editing), which displays a small text window;

Clue window

- an image, audio clip, video, or text placed above the question.

Following this are the elements specific to the question type (for more details, see sections relating to each question type).

When the "Correct Answer" or "Submit" buttons are clicked, the area at the bottom of the page expands and displays the answer or feedback. To shrink this area, click on the "X" button to close it or enter another answer.

Drag and drop these films to the movie personalities who starred in them.

A)  Fire Over England; Gone with the Wind; A Streetcar Named Desire

B)  Laura; Leave Her to Heaven; Whirlpool

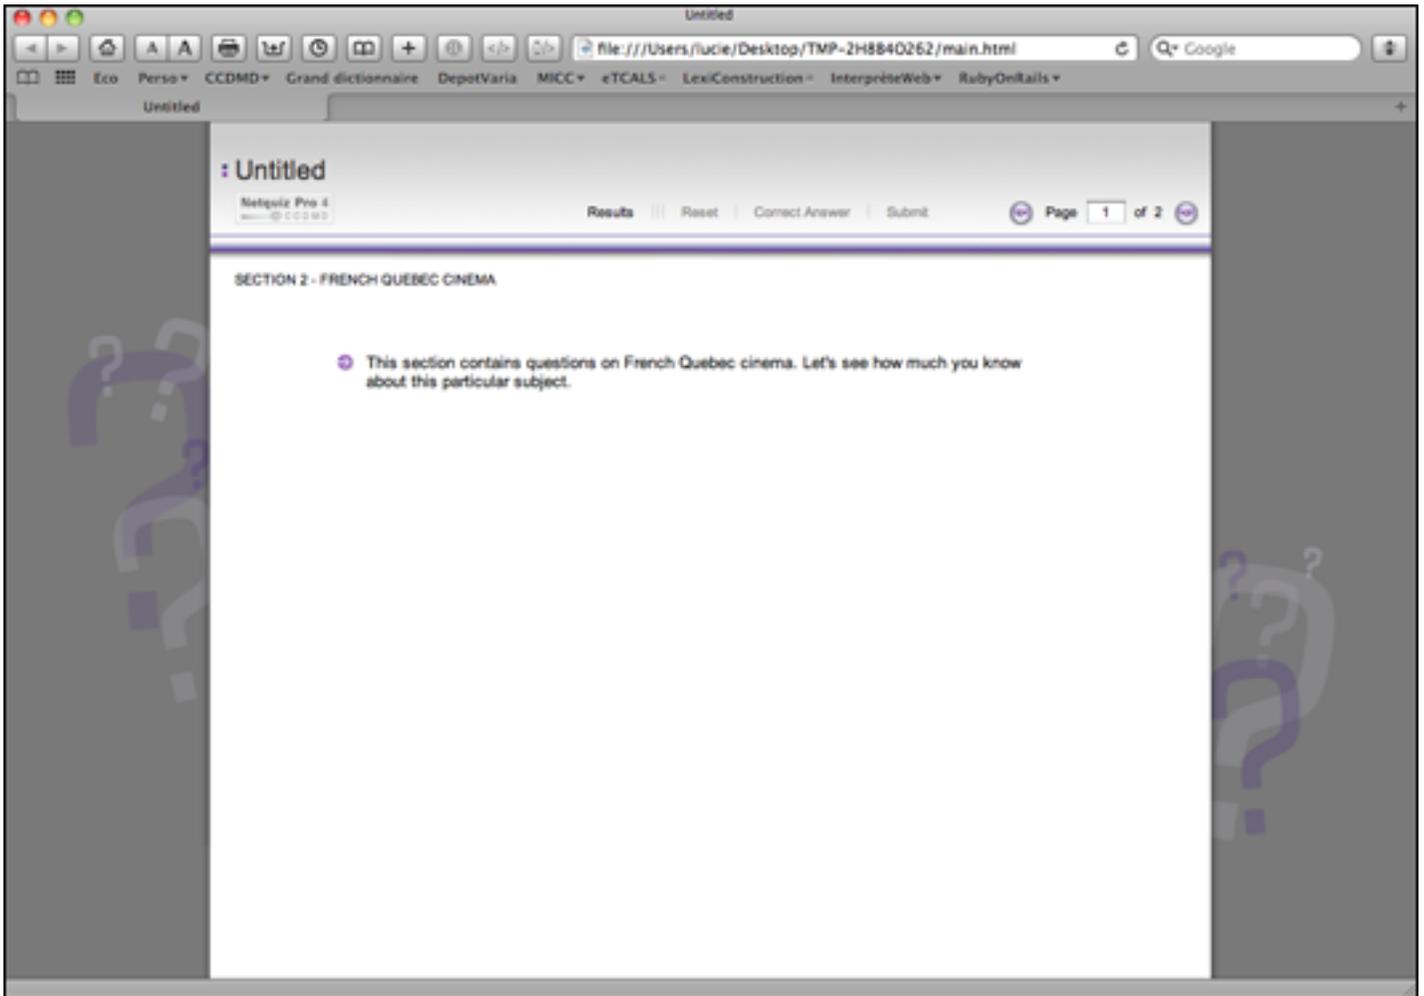

Correct Answer

A)  Fire Over England; Gone with the Wind; A Streetcar Named Desire

B)  Laura; Leave Her to Heaven; Whirlpool

Expanded area at the bottom of a page displaying the correct answer or feedback

In a web version of a section, the "Reset", "Correct Answer" and "Submit" buttons are greyed out, since these functions do not apply here. Below the banner are the section title in the upper left, the optional elements (image, audio, video, text) and the section text itself preceded by an arrow.

Web preview of a section

MATCHING QUESTIONS

In matching questions, quiz takers match items in a first column to items in a second column. Items within columns can contain either text or pictures. Apart from the properties and editing zones common to all types of questions (see [Questions and Sections](#)), matching questions have the following characteristics:

The Properties Tab

Under the second horizontal line in the lower part of the window, the "Properties" tab displays several parameters that let you customize a matching question.

The screenshot shows the 'Properties' tab for a matching question. The window title is 'C3 - Matching' and the subtitle is 'Question Preparation'. The 'Properties' tab is active, and the 'Edit' tab is also visible. The form contains the following fields and options:

- Question title:** A text input field containing 'Hollywood Stars'.
- Weighting:** A text input field containing '1.0'.
- Note:** A text area containing 'Section 1'.
- Quizzes containing this element:** A text input field containing 'Cinequiz'.
- Web parameters (Note: These parameters can be applied to all questions in the Web Quiz Preparation window under the Properties tab):**
 - User controls media
 - Automatically start AUDIO in the question
 - Automatically start VIDEO in the question
 - Display the Correct Answer button
- Number of matching pairs:** A text input field containing '5'.
- Pairing type:** A text input field containing 'Image - Text'.
- Order style:** A text input field containing 'Alphabetical'.
- Answer order:**
 - Random
 - Predetermined
 - A text input field containing 'A B C D E'.

At the bottom of the window, there are three buttons: 'Web Preview', 'Cancel', and 'OK'.

Properties tab for a matching question

Number of Matching Pairs

A matching question allows you to select between "2" and "15" matching pairs. Please note, however, that a large number of pairs can be difficult for the web browser to process.

Pairing Type

In the "Pairing type" drop-down menu, you can choose between "Text-Text", "Text-Image", "Image-Text" and "Image-Image". The first term defines the nature of the items in the first column; the second term defines that of the items in the second column for matching questions.

Order Style

In the "Order style" drop-down menu, you can choose between "None", "Alphabetical" and "Numerical". The result will be an alphabetical list letter, a number or nothing before each matching pair.

Answer Order

In the web version of this question (see "The Web Preview" section below), the items in the left column will always appear in the same order you entered them (see "The Edit Tab" section below). However, the items in the right column will appear either in a random or a predetermined order depending on what you choose. To indicate a predetermined order, sequence the alphabetical or numerical labels in the order you require. These labels are located in the box to the right of the "Predetermined" option.

The Edit Tab

Under the "Question or statement text" in the lower pane of the window, the "Edit" tab displays four columns in which you can select the content and respective feedback of the matching pairs.

Edit tab for a matching question

First Item and Second Item Columns

The "First" and "Second item" columns can contain text or images according to the "Pairing type" selected in the "Properties" of the question window.

If one of these columns contains text, you need only enter this text. Any characters with an ASCII code higher than 255 will not be accepted. Moreover, you should avoid the following special characters: ', ", <, > because they have a specific meaning for web pages. Refer to "The Edit Menu" section in [Menu Bar](#) to see how you can change a style or add web links and images in this field.

If one of these columns contains images, you need only click in the rectangle to display a dialogue box that will allow you to choose an image from the list of media already imported to the "MEDIA" folder of the question bank. If the image that you wish to insert is not found in this list, you can add it by clicking on the "+" button of the "MEDIA" dialogue box. Clicking this button prompts a window that allows you to find the image on your hard drive and import it into the "MEDIA" folder of your question bank by clicking on the "Open" button. An identical "MEDIA" dialogue box will appear when you insert an image, an audio clip or a video into the heading of a question (see [Questions and Sections](#)) or into the home page of a quiz (see [Home Page](#)).

Positive and Negative Feedback Columns

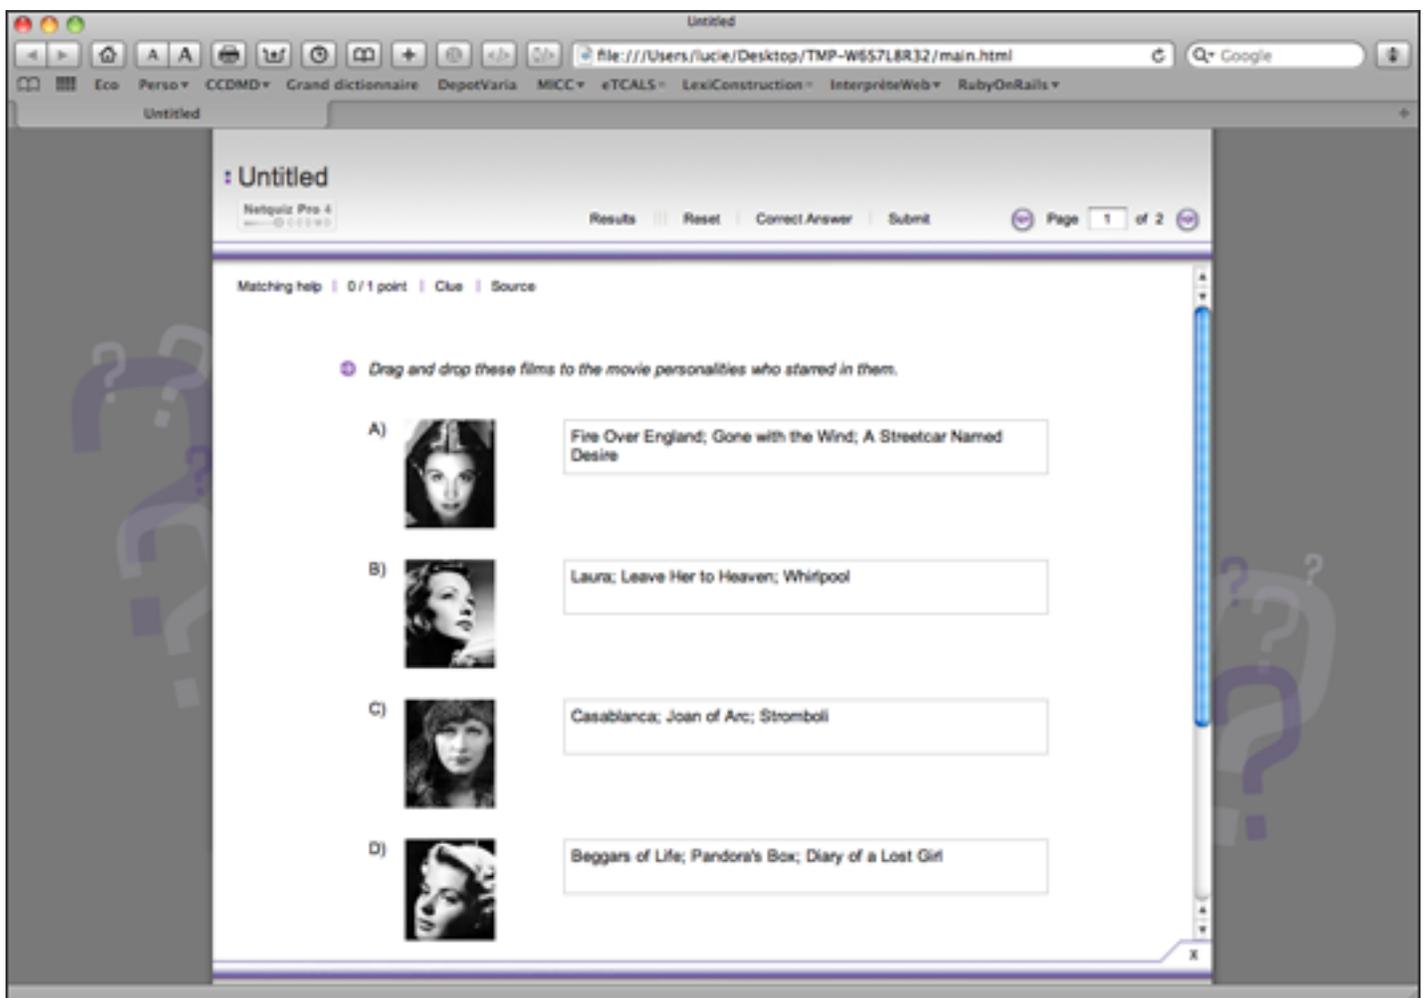

The "Positive" and "Negative Feedback" columns are used to enter an explanation or pertinent

feedback other than "Correct Answer" or "Incorrect Answer" since either one of these is automatically given to the user when an answer is checked, whether or not other feedback exists. "Incorrect answer" for a matching question is displayed when the second item (from the right column) is placed in the wrong spot. This text field accepts changes in style. Refer to "The Edit Menu" section in [Menu Bar](#) to see how you can change a style or add web links and images in this field.

The Web Preview

Below is an example of the web preview of a matching question.

N.B. If you ask for web previews repeatedly, you may have to refresh the web page or empty your browser's cache in order to display the most recent changes.

Web preview for a matching question

Submit

When a quiz taker clicks on the "Submit" button, he or she sees, at the bottom of the screen page, "Correct Answer" in green or "Incorrect Answer" in red. Then, for each matching pair, a green dot or red square indicates whether or not the match is correct, and a reminder of the contents of the pair matched by the quiz taker is displayed as well as positive or negative feedback if any has been entered for this particular pair.

The screenshot shows a web browser window with a matching quiz. The browser's address bar shows a local file path: `file:///Users/lucie/Desktop/TMP-W657LBR32/main.html`. The page title is "Untitled". The browser's menu bar includes "Eco", "Perso", "CCDMD", "Grand dictionnaire", "DepotVaria", "MICC", "eTCALS", "LexiConstruction", "InterprèteWeb", and "RubyOnRails".

The quiz interface includes a "Results" section with buttons for "Reset", "Correct Answer", and "Submit". It shows "Page 1 of 2". The question is a matching task: "Drag and drop these films to the movie personalities who starred in them." There are two options, A and B, each with a small portrait of a woman and a text box containing film titles.

Option A:  Fire Over England; Gone with the Wind; A Streetcar Named Desire

Option B:  Laura; Leave Her to Heaven; Whirlpool

The lower half of the screen shows the "Incorrect Answer" section. It displays the same two options, A and B, with green dots next to their labels, indicating they were selected as the answer.

Display of submitted answer for a matching question

Correct Answer

When the quiz taker clicks on the "Correct Answer" button, the correct answer is displayed as follows in the lower half of the screen page: the words "Correct Answer" followed by the correct answer for each matching pair.

The screenshot shows a web browser window with a matching question. The question is: "Drag and drop these films to the movie personalities who starred in them." There are two options, A and B, each with a small portrait of a woman and a list of film titles in a text box.

Question:

A)  Fire Over England; Gone with the Wind; A Streetcar Named Desire

B)  Laura; Leave Her to Heaven; Whirlpool

Correct Answer:

A)  Fire Over England; Gone with the Wind; A Streetcar Named Desire

B)  Laura; Leave Her to Heaven; Whirlpool

The answer revealed for a matching question

MULTIPLE CHOICE QUESTIONS

In multiple choice questions, quiz takers choose one answer from among several. Apart from the properties and editing zones common to all types of questions (see [Questions and Sections](#)), multiple choice questions have the following characteristics:

The Properties Tab

Under the second horizontal line in the lower part of the window, the "Properties" tab displays several parameters that let you customize a multiple choice question.

The screenshot shows the 'Properties' tab for a multiple choice question. The window title is 'C1 - Multiple choice' and the subtitle is 'Question Preparation'. The 'Properties' tab is selected, and the 'Edit' tab is also visible. The settings are as follows:

- Question title:** The Master of Suspense
- Weighting:** 1.0
- Note:** Section 1
- Quizzes containing this element:** Cinequiz
- Web parameters (Note: These parameters can be applied to all questions in the Web Quiz Preparation window under the Properties tab):**
 - User controls media
 - Automatically start AUDIO in the question
 - Automatically start VIDEO in the question
 - Display the Correct Answer button
- Number of answer choices:** 4
- Answer type:** Text
- Order style:** Alphabetical
- Answer order:**
 - Random
 - Predetermined: A B C D

At the bottom of the window, there are buttons for 'Web Preview', 'Cancel', and 'OK'.

Properties tab for a multiple choice question

Number of Answer Choices

A multiple answer question can be set to have between "2" and "99" choices. The minimum number of answer choices is "2", which is the default number appearing in the "Number of answer choices" box.

Answer Type

In the "Answer type" drop-down menu, you can choose between "Text" and "Image" depending on the kind of answer choices you want the quiz taker to work with.

Order Style

In the "Order style" drop-down menu, you can choose between "None", "Alphabetical" and "Numerical". The end result will be a letter, a number or nothing before each answer choice.

Answer Order

By default, the presentation order of the answer choices in the web version of the question is random. If you want to specify a predetermined order, click "Predetermined" and place the alphabetical or numerical labels in the box located to the right of the "Predetermined" option in the desired order.

The Edit Tab

Under the "Question or statement text" in the lower part of the window, the "Edit" tab displays a column for you to write the answer as well as two columns for the content and respective feedback of the answer choices.

The screenshot shows a software interface for editing a multiple choice question. The window title is "C1 - Multiple choice" and "Question Preparation". The "Edit" tab is active, showing a "Clue" field with "No source" and a "Question or statement text" field containing "Which of the following statements is false?". Below this are four answer choices, each with a radio button, a text field for the choice, and a text field for feedback. Choice C is selected. At the bottom, there are "Web Preview", "Cancel", and "OK" buttons.

Answer	Choices	Feedback
A	Hitchcock directed <i>Blackmail</i> , the first talking film in English cinema in 1929.	
B	The original idea for the shower scene in <i>Psycho</i> was not Hitchcock's. He found it in a Robert Bloch novel for which he bought the rights as well as all the copies he could in order to conserve the suspense of	
C	Hitchcock had long discussions on his art with writer Romain Gary in the nineteen sixties.	This assertion is actually false. It was filmmaker François Truffaut with whom Hitchcock had these discussions.
D	Tippi Hedren almost lost an eye while filming <i>The Birds</i> (1963) when a seagull gashed her eyelid.	

Edit tab for a multiple choice question

Answer Column

The "Answer" column contains radio buttons. You must indicate the correct answer by clicking on the appropriate button.

Answer Choices Column

The "Answer choices" column can contain text or images depending on the choice made under "Answer type" in the "Properties" window of the question.

If the column contains text, you need only write the text. Any characters with an ASCII code higher than 255 will not be accepted. Moreover, you should avoid the following special characters: ', ", <, > because they have a specific meaning for web pages. This text field accepts changes in style. Refer to "The Edit Menu" section in [Menu Bar](#) to see how you can change a style or add web links and images in this field.

If this column contains images, you need only click in the rectangle to display a dialogue box to choose an image from the list of media already imported to the "MEDIA" folder of the question bank. If the image that you wish to insert is not found in this list, you can add it by clicking on the "+" button of the "MEDIA" dialogue box. Clicking this button will display a window that allows you to find the image on your hard drive and import it into the "MEDIA" folder of your question bank by clicking on the "Open" button. An identical "MEDIA" dialogue box will appear when you insert an image, an audio clip or a video into the heading of a question (see [Questions and Sections](#)) or into the home page of a quiz (see [Home Page](#)).

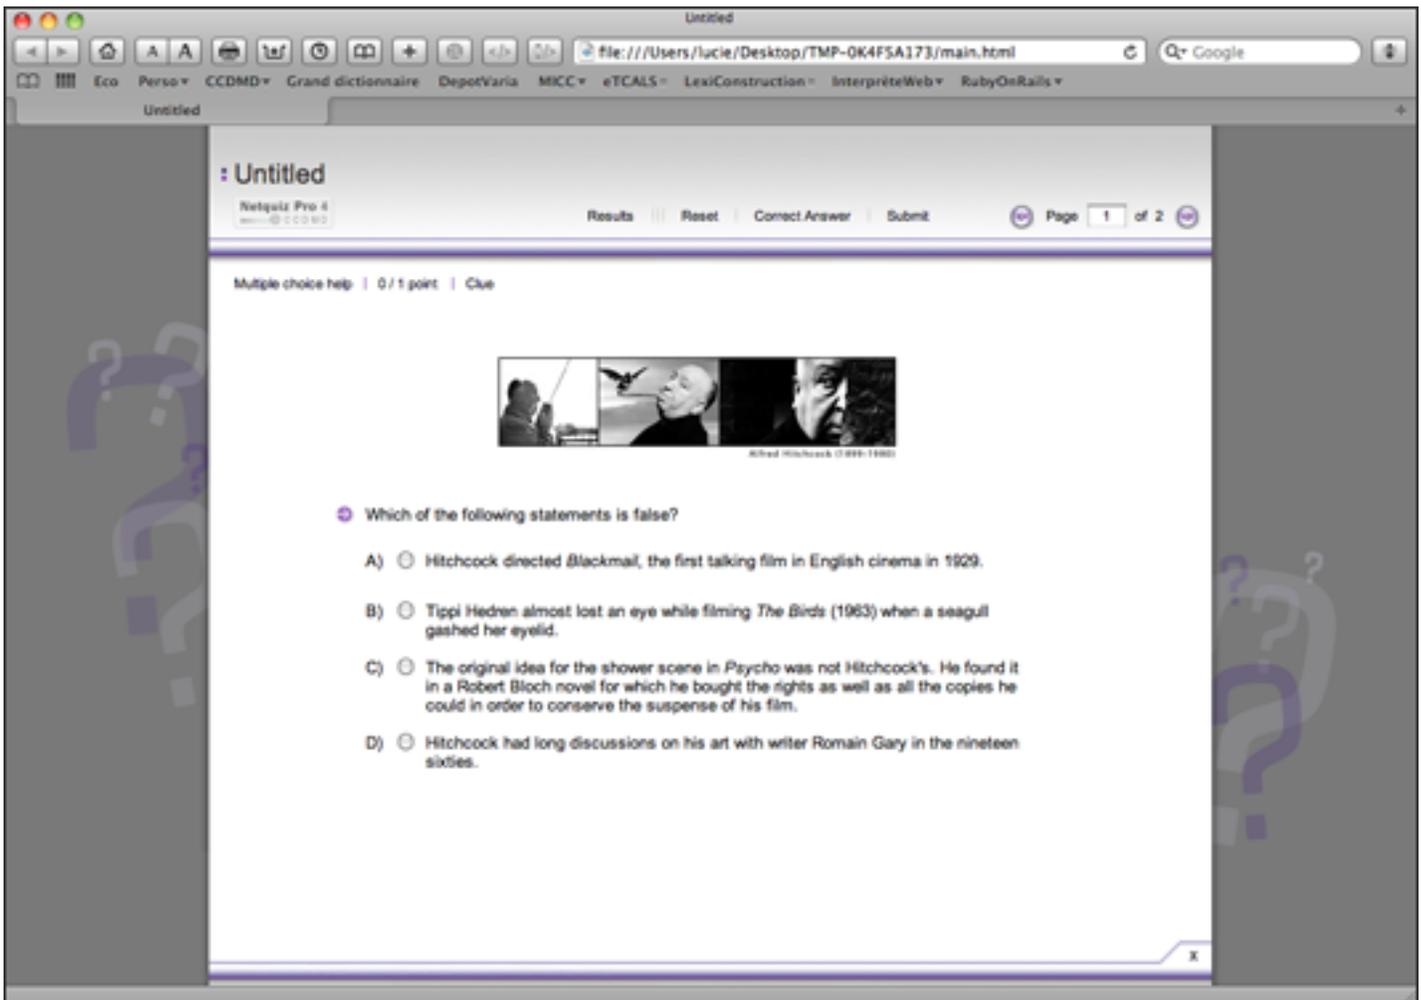

Feedback Column

The "Feedback" column is used to enter an explanation or pertinent feedback other than "Correct Answer" or "Incorrect Answer" since either one of these is automatically given to the user when an answer is checked, whether or not other feedback exists. This text field accepts changes in style. Refer to "The Edit Menu" section in [Menu Bar](#) to see how you can change a style or add web links and images in this field.

The Web Preview

Below is an example of the web preview of a multiple choice question.

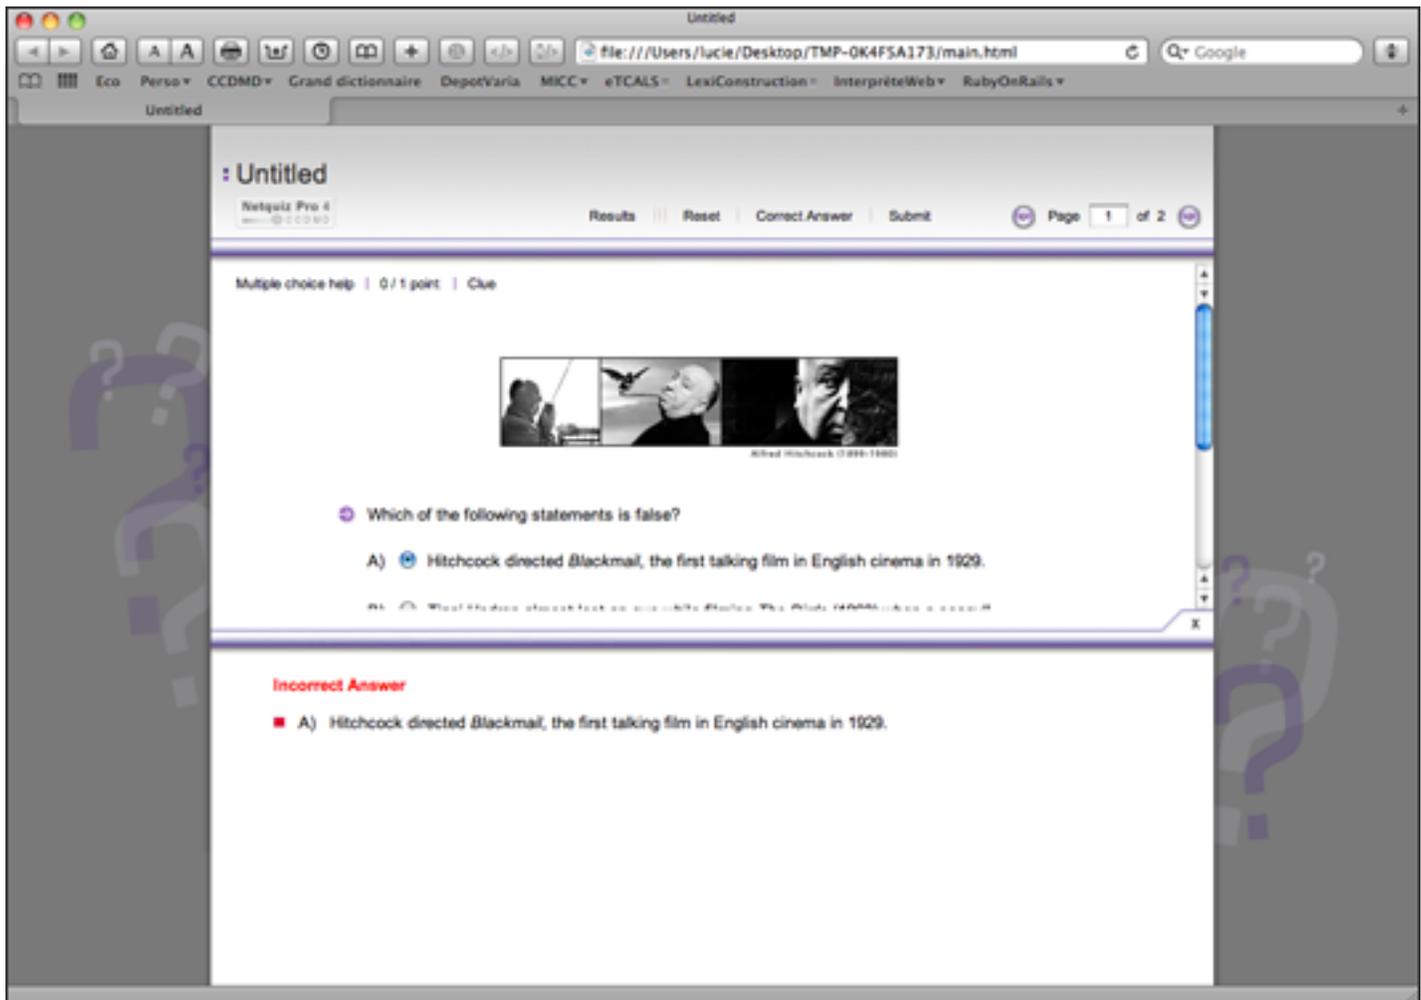

N.B. If you ask for web previews repeatedly, you may have to refresh the web page or empty your browser's cache in order to display the most recent changes.

Web preview of a multiple choice question

Submit

When a quiz taker clicks on the "Submit" button, he or she sees, at the bottom of the screen page, "Correct Answer" in green or "Incorrect Answer" in red. Then, for each of the answers, a green dot or red square indicates whether or not the answer is correct; a reminder of the contents of this answer is displayed, as well as feedback (if any has been entered for this choice).

Display of submitted answer for a multiple choice question

Correct Answer

When the quiz taker clicks on the "Correct Answer" button, the correct answer is displayed as follows: the words "Correct Answer" followed by all the possible correct answers.

The screenshot shows a web browser window titled "Untitled" with the address bar displaying "file:///Users/lucie/Desktop/TMP-0K4F5A173/main.html". The browser's menu bar includes "Eco", "Perso", "CCDMD", "Grand dictionnaire", "DepotVaria", "MCC", "eTCALS", "LexiConstruction", "InterprèteWeb", and "RubyOnRails". The main content area is titled "Netquiz Pro 4" and shows a multiple-choice question. The question text is "Which of the following statements is false?". Below the question are two visible options: "A) Hitchcock directed *Blackmail*, the first talking film in English cinema in 1929." and "D) Hitchcock had long discussions on his art with writer Romain Gary in the nineteen sixties." Option A is selected with a blue radio button. Below the question, the "Correct Answer" is revealed as "D) Hitchcock had long discussions on his art with writer Romain Gary in the nineteen sixties." The interface also includes a "Results" section with "Reset", "Correct Answer", and "Submit" buttons, and a "Page 1 of 2" indicator. A vertical scrollbar is visible on the right side of the question area.

The answer revealed for a multiple answer question

CLASSIFICATION QUESTIONS

In a classification question, the quiz taker is asked to sort items (text or images) into different classifiers defined by a text or image tag. Apart from the properties and editing zones common to all types of elements (see [Questions and Sections](#)), classification questions have the following characteristics:

The Properties Tab

In the lower part of the window beneath the second horizontal line, the "Properties" tab displays several parameters that let you customize a classification question.

The screenshot shows a window titled "C40 - Classification" with a "Question Preparation" header. The "Properties" tab is active, showing several configuration options:

- Question title:** Film titles and photo classifiers
- Weighting:** 1.0
- Note:** Section 2
- Quizzes containing this element:** Cinequiz
- Web parameters (Note: These parameters can be applied to all questions in the Web Quiz Preparation window under the Properties tab):**
 - User controls media
 - Automatically start AUDIO in the question
 - Automatically start VIDEO in the question
 - Display the Correct Answer button
- Number of classifiers:** 2
- Classification type (Tab - Item):** Image - Text
- Layout:** Horizontal

At the bottom of the window, there are buttons for "Web Preview", "Cancel", and "OK".

Properties tab for a classification question

Number of Classifiers

A classification question can have two to six classifiers.

Classification Type (Tab - Item)

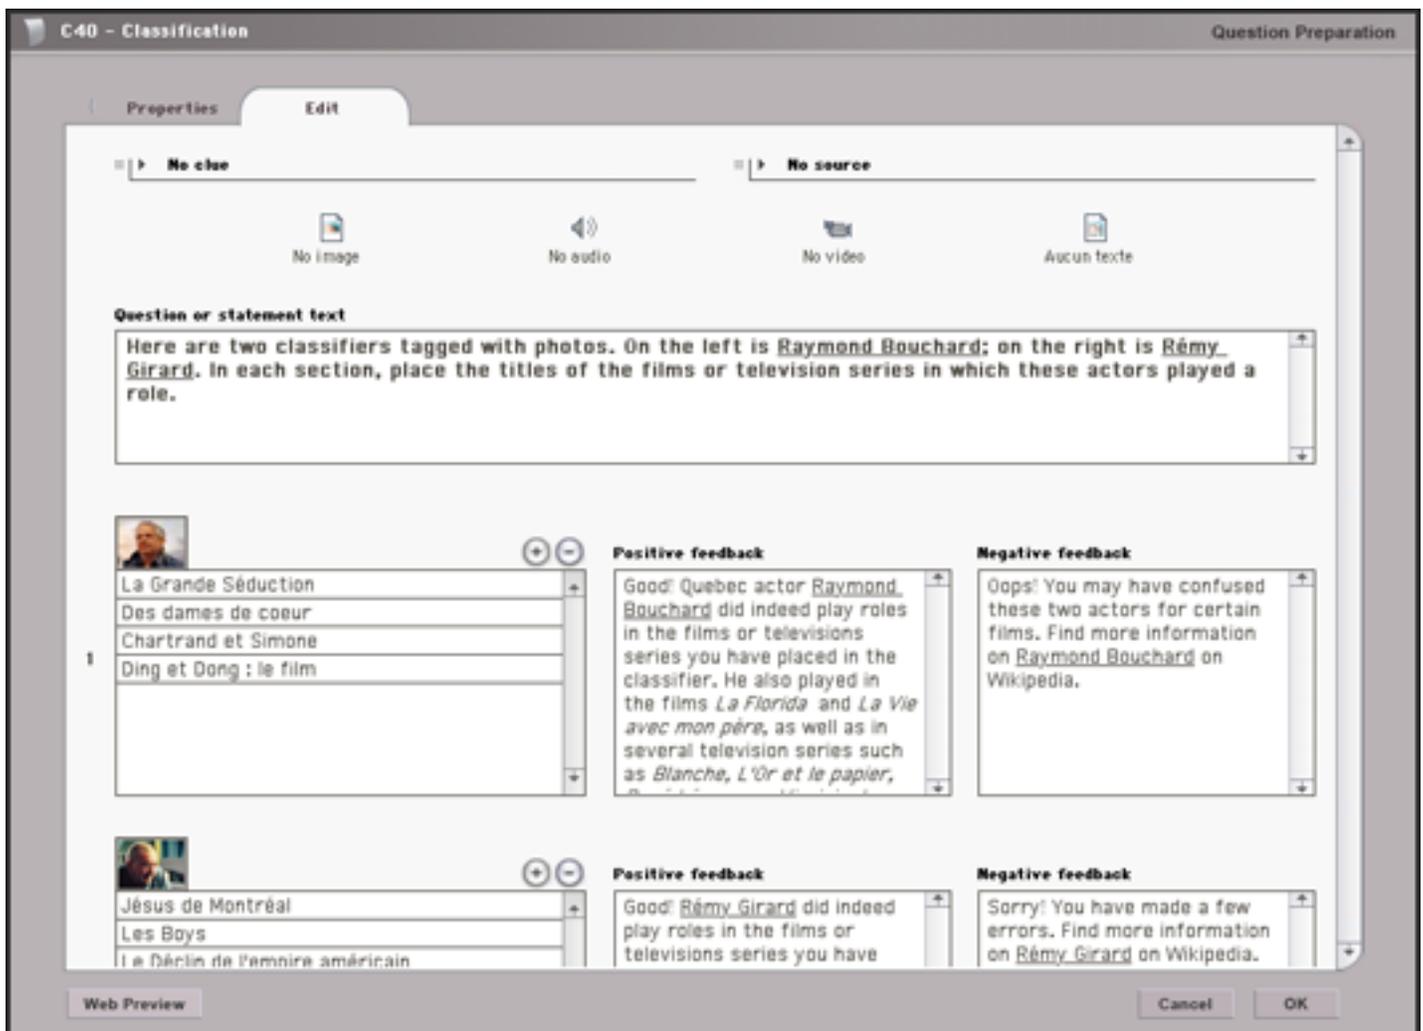

In the "Classification type" drop-down menu, you can choose between "Text -Text", "Text - Image", "Image - Text" and "Image - Image". The classification type identifies first the label of classifier tab (text or image) and second, the kind of item the classifier will contain (text or image).

Layout

You can choose how the items to be classified will be placed in the question. The "Horizontal" option places items side by side from left to right and top to bottom. The "Vertical" option places item one on top of the other in a column.

The Edit Tab

Under the "Question or statement text" in the lower part of the window, the "Edit" tab displays three columns in which to enter the content of the classifiers as well as the feedback.

Edit tab for a classification question

Classifier Column

The first column contains classifiers. Here's how to enter the contents for the different types of classifiers:

- *Text classifier*
If you defined a "Text" classifier type in the "Properties" tab, simply type the classifier heading directly into the grey field.
- *Image classifier*
If you defined an "Image" classifier type in the "Properties" tab, click in the grey field containing the image button; a dialogue box will open to allow you to select an image from the media already imported into the question bank's "MEDIA" folder. If the image you want is not on the list, you can add it by clicking the "+" button. A window will appear so you can locate for the image on your computer and import it. The "Media" dialogue box opens whether you insert an image, audio or video at the heading of a question (see [Questions and Sections](#)) or on a quiz's home page (see [Home Page](#)).
- *Text item*
If you defined a "Text" item type in the "Properties" tab, click on the "+" button; a text item is added below the classifier with the "Accepted item #" as default text. Click this text to edit it and enter the text you want. To delete an item, select it and click on the "-" button.
- *Image item*
If you defined an "Image" item type in the "Properties" tab, click on the "+" button; the "Media" dialogue box opens allowing you to choose an image, as with the Image tag. To delete an item, select it and click on the "-" button.

It is important that all the items added to a given classifier correspond to correct answers.

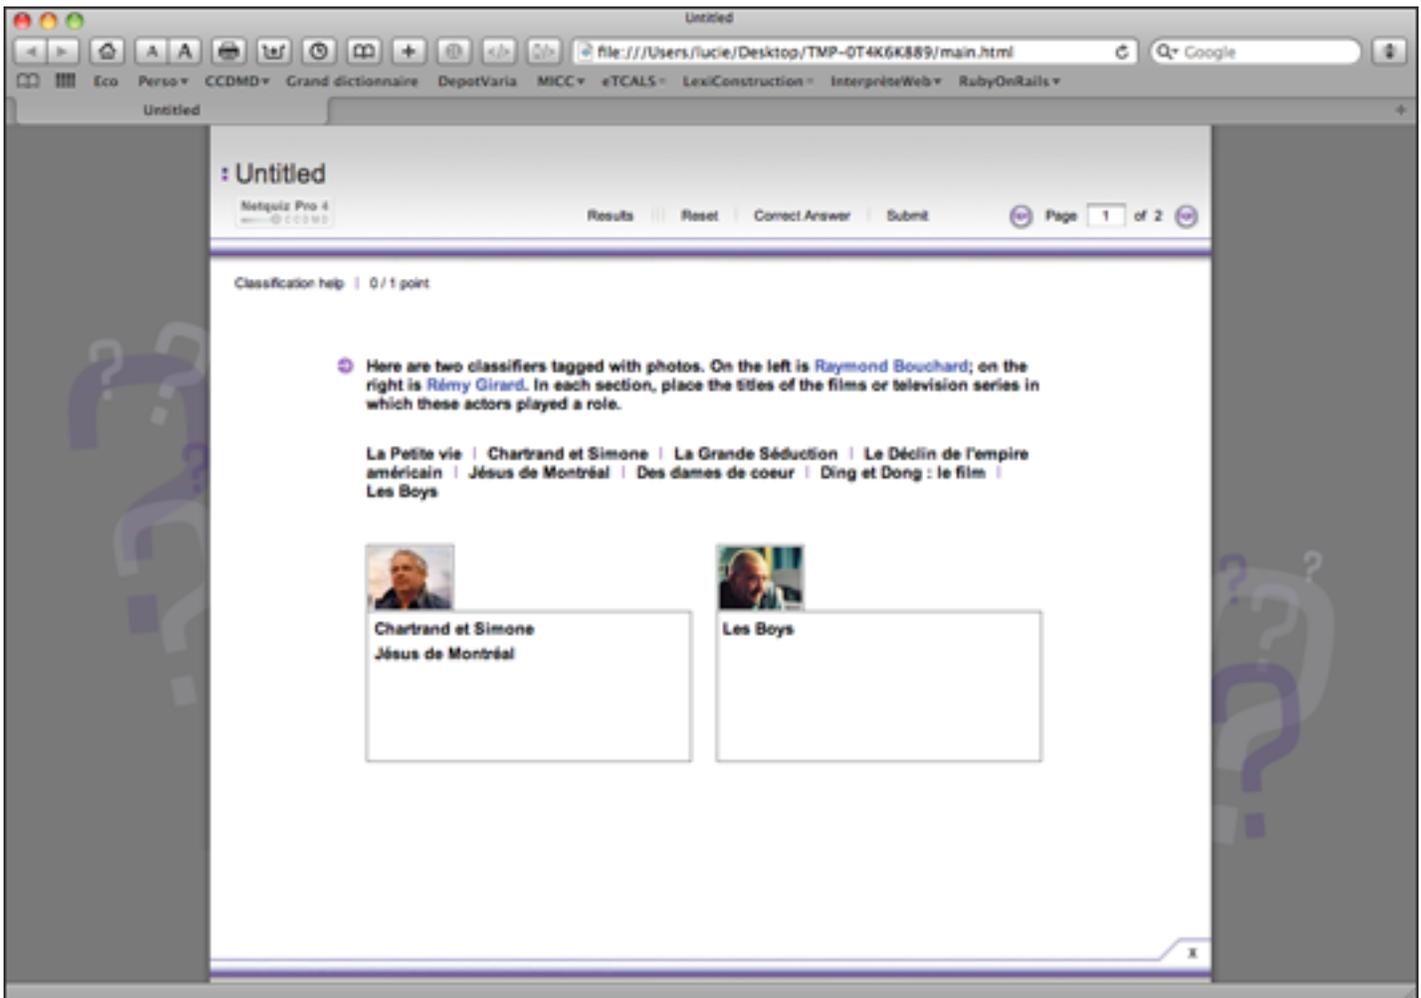

Positive and Negative Feedback Columns

The "Positive feedback" and "Negative feedback" columns are used to enter pertinent feedback. Do not use these fields to input the correct answer, incorrect answer or incomplete answer. This information is given automatically as the answers are checked, regardless of whether additional feedback exists. If the classifier contains only correct elements, the positive feedback will be displayed at the bottom of the page (even if some answers are missing). If there is at least one error, the negative feedback will appear.

The Web Preview

Below is an example of a web preview of a classification question.

N.B. If you request web previews repeatedly, you may need to refresh the web page or empty your browser's cache in order to display the most recent changes.

The screenshot shows a web browser window with the address bar displaying 'file:///Users/lucie/Desktop/TMP-DT4K6K889/main.html'. The browser's menu bar includes 'Eco', 'Perso', 'CCDMD', 'Grand dictionnaire', 'DepotVaria', 'MICC', 'eTCALS', 'LexiConstruction', 'InterpréWeb', and 'RubyOnRails'. The main content area is titled 'Untitled' and features a 'Netquiz Pro 4' logo. At the top right of the content area, there are buttons for 'Results', 'Reset', 'Correct Answer', and 'Submit', along with a page indicator 'Page 1 of 2'. The question text reads: 'Classification help | 0 / 1 point' followed by a purple question mark icon and the text: 'Here are two classifiers tagged with photos. On the left is **Raymond Bouchard**; on the right is **Rémy Girard**. In each section, place the titles of the films or television series in which these actors played a role.' Below this, a list of titles is provided: 'La Petite vie | Chartrand et Simone | La Grande Séduction | Le Déclin de l'empire américain | Jésus de Montréal | Des dames de coeur | Ding et Dong : le film | Les Boys'. Two photo boxes are shown: the left one contains a photo of Raymond Bouchard and the right one contains a photo of Rémy Girard. Below each photo is a text input field. The left field contains the text 'Chartrand et Simone' and 'Jésus de Montréal'. The right field contains the text 'Les Boys'. Large, faint question mark icons are visible on the left and right sides of the browser window.

Web preview of a classification question

Submit

When a quiz taker clicks on the "Submit" button before having finished matching the items, an "Incomplete Answer" message will appear in the zone at the bottom of the screen page. If the exercise is complete, "Correct Answer" or "Incorrect Answer" will appear in this zone; correct answers will be marked in green, while incorrect answers will be marked in red. Positive or negative feedback will also be displayed if it exists for that classifier.

Here are two classifiers tagged with photos. On the left is [Raymond Bouchard](#); on the right is [Rémy Girard](#). In each section, place the titles of the films or television series in which these actors played a role.

La Petite vie

La Grande Séduction

Incorrect Answer

La Petite vie
Chartrand et Simone
Jésus de Montréal

La Grande Séduction
Le Déclin de l'empire américain
Des dames de coeur
Ding et Dong : le film
Les Boys

Dops! You may have confused these two actors for certain films. Find more information on [Raymond Bouchard](#) on Wikipedia.

Sorry! You have made a few errors. Find more information on [Rémy Girard](#) on Wikipedia.

Display of submitted answer and feedback for a classification question

Correct Answer

When the quiz taker clicks on the "Correct Answer" button, the answer is displayed in the lower part of the screen. The words "Correct Answer" is followed by the classifiers containing the correct answers.

Correct Answer

	
Chartrand et Simone	La Petite vie
La Grande Séduction	Le Déclin de l'empire américain
Des dames de coeur	Jésus de Montréal
Ding et Dong : le film	Les Boys

The answer revealed for a classification question

MATCHING BOARD QUESTIONS

In matching board questions, quiz takers match item pairs on a board of squares. These items can comprise either text or images. At the beginning, the board squares can be hidden or visible. Apart from the properties and editing zones common to all types of questions (see [Questions and Sections](#)), matching board questions have the following characteristics:

The Properties Tab

Under the second horizontal line in the lower part of the window, the "Properties" tab displays several parameters that let you customize a matching board question.

The screenshot shows the 'Properties' tab for a matching board question. The window title is 'C10 - Matching board' and the subtitle is 'Question Preparation'. The 'Properties' tab is active, showing various configuration options. The 'Question title' is 'Main characters' and 'Weighting' is '1.0'. The 'Note' is 'Section 2'. The 'Quizzes containing this element' is 'Cinequiz'. Under 'Web parameters', 'User controls media' is checked, and 'Automatically start AUDIO in the question' and 'Automatically start VIDEO in the question' are unchecked. 'Display the Correct Answer button' is checked. The 'Number of squares' is '12', 'Matching type' is 'Image - Text', and 'Item display' is 'Visible at the beginning'. The 'Background colour of the first item' is 'White' and the 'Background colour of the second item' is 'Grey'. At the bottom, there are 'Web Preview', 'Cancel', and 'OK' buttons.

Properties tab for a matching board question

Number of Squares

A matching board question allows you to select "4", "8", "12", "16" or "20" squares in the "Number of squares" drop-down menu.

Matching Type

In the "Matching type" drop-down menu, you can choose between "Text-Text", "Text-Image", "Image-Text" and "Image-Image". The first term defines the nature of the first item of the pair and the second term defines that of the second item of the pair.

Item Display

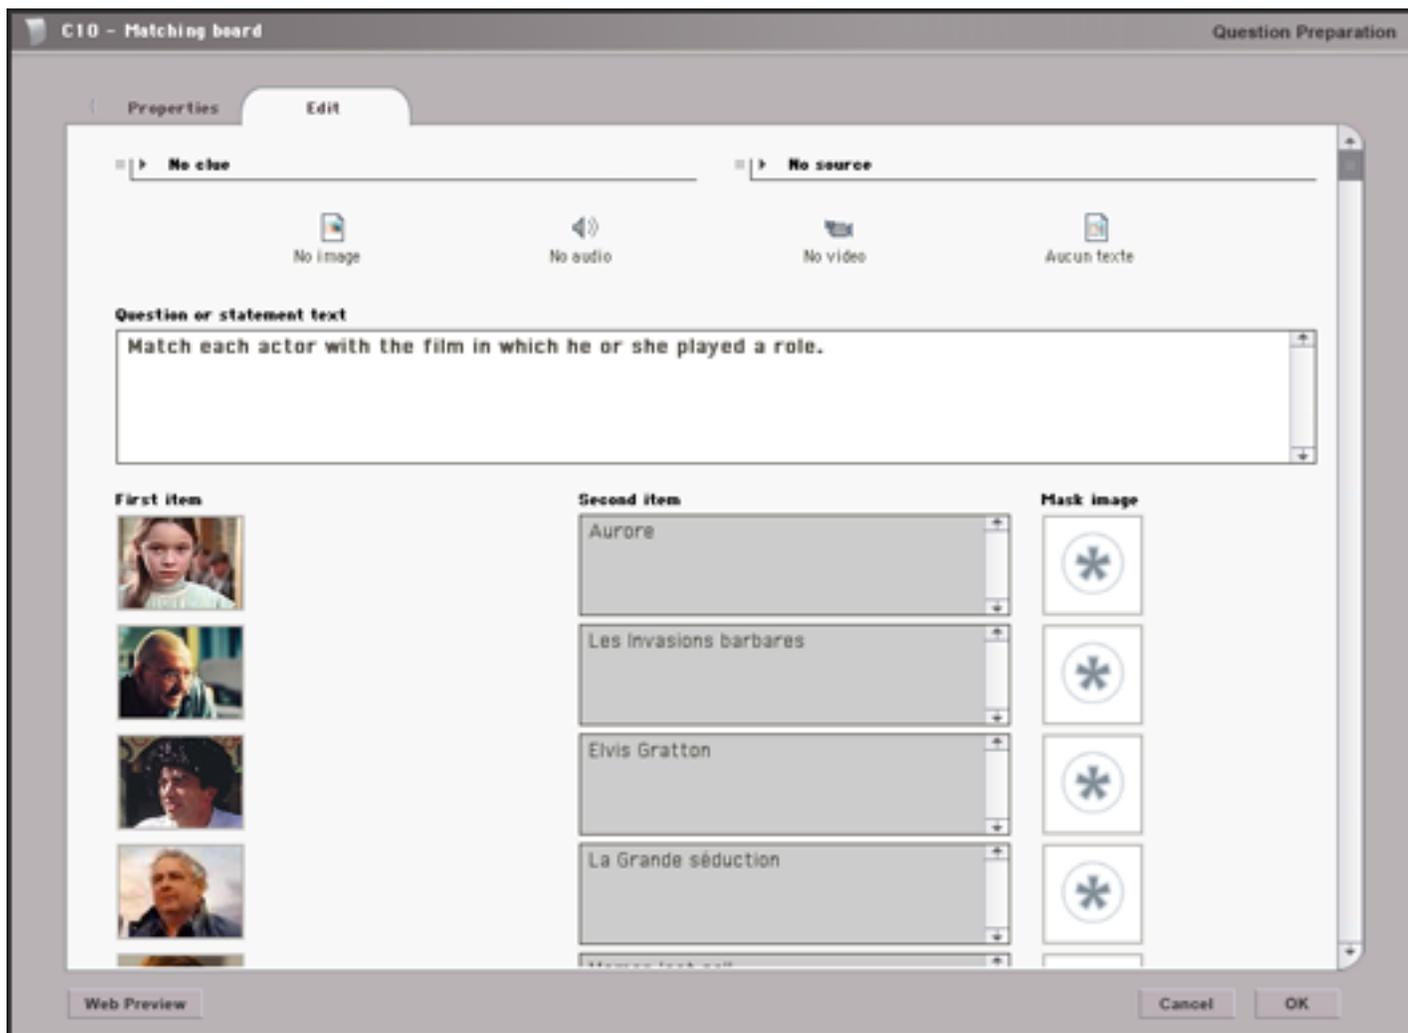

In the "Item display" drop-down menu, you can choose between "Hidden at the beginning" and "Visible at the beginning". In the first case, the board squares are hidden at the beginning and the quiz taker must uncover them by successively finding the items composing a pair. The exercise in this case resembles a memory game. In the second case, the board squares are visible at the start of the quiz and the quiz taker must hide them by successively finding the items composing a pair. The exercise resembles an matching game.

Background Colour of the First and Second Items

By default, the selected background colour is white. From the drop-down menus, you can choose a background colour from the following list: "White", "Grey", "Blue", "Yellow", "Red", or "Green". Please note, however, that the background colour can only be used for text items, not for images. This option is particularly useful to differentiate between two types of items to pair on a board that is visible at the beginning (e.g. matching terms on a yellow background to definitions on a red background).

The Edit Tab

Under the "Question or statement text" field in the lower part of the window, the "Edit" tab displays three columns: the first two columns allow you to enter the contents of the items to match and the third lets you choose the image used as a mask.

Edit tab for a matching board question

First Item and Second Item Columns

The "First item" and "Second item" columns can contain text or images according to the choice made for "Matching type" in the "Properties" tab of the question window.

If one of these columns contains text, you need only enter this text. Any characters with an ASCII code higher than 255 will not be accepted. Moreover, you should avoid the following special characters: ', ", <, > because they have a specific meaning for web pages. Refer to "The Edit Menu" section in [Menu Bar](#) to see how you can change a style or add web links and images in this field.

If one of these columns is for images, you need only click in the rectangle to open a dialogue box to choose an image from media already imported to the "MEDIA" folder of the question bank. If the image that you wish to insert is not in this list, you can add it by clicking on the "+" button of the "Media" dialogue box. Clicking this button allows you to find the image on your hard drive and import it into the "MEDIA" folder. The "Media" dialogue box appears whether you insert an image, an audio clip or a video into the heading of a question (see [Questions and Sections](#)) or into the home page of a quiz (see [Home Page](#)).

Mask Image

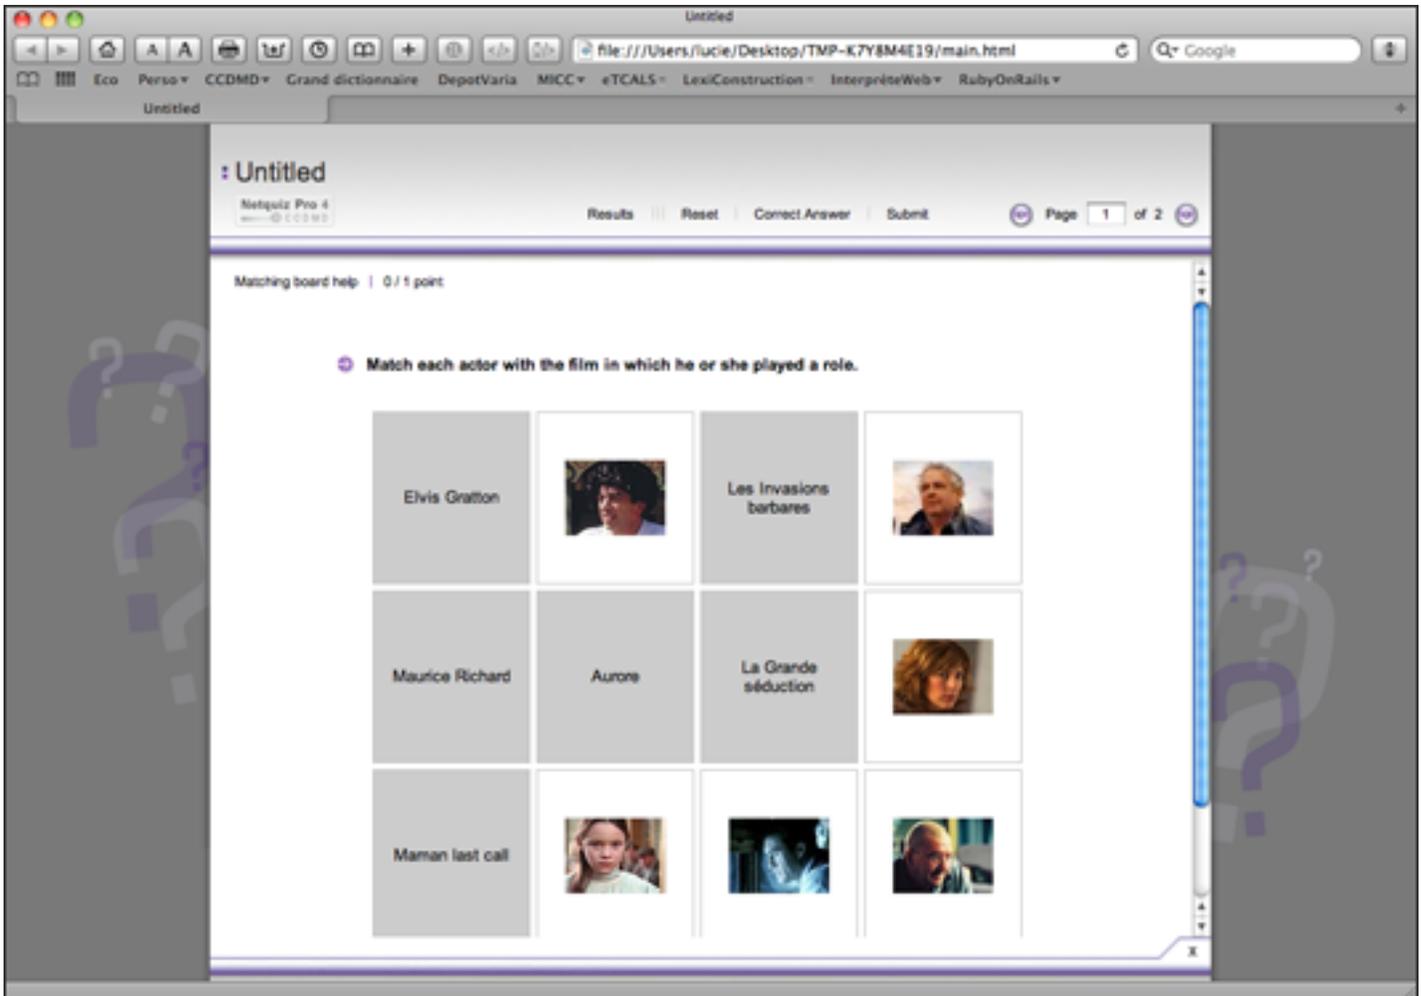

The "Mask image" column contains the images used to mask each of the boxes. The items in this column contain default images which you can change as needed. Inserting a mask image by clicking

in the rectangle to open and choose from the "Media" dialogue box (see the previous section).

The Web Preview

Below is an example of the web preview of a matching board question.

N.B. If you ask for web previews repeatedly, you may have to refresh the web page or empty your browser's cache in order to display the most recent changes.

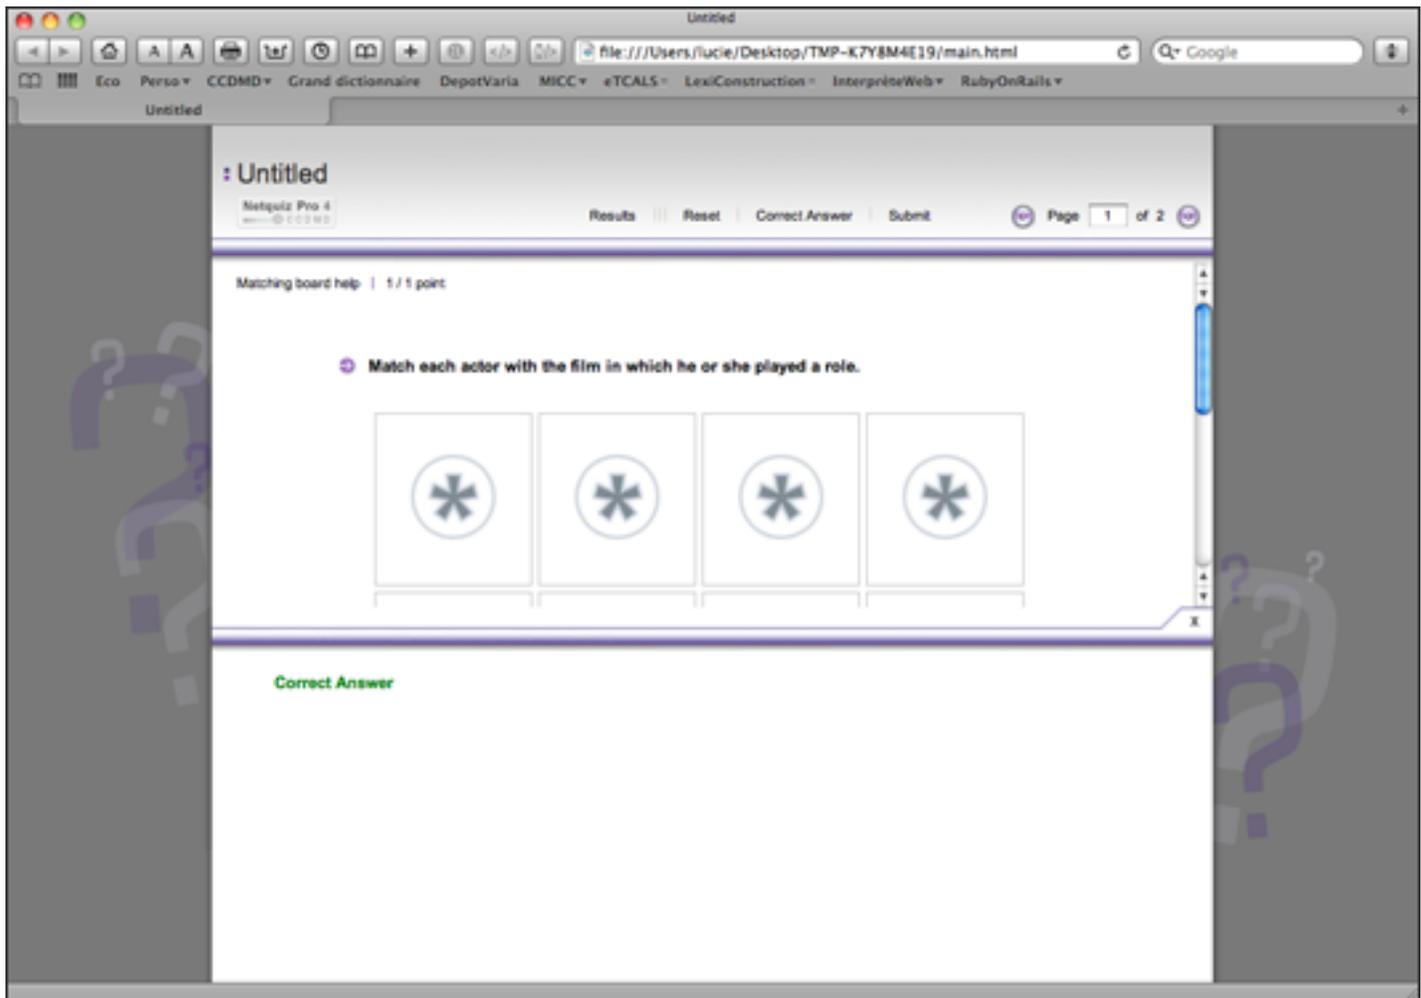

Web preview of a matching board question

Submit

When a quiz taker clicks on the "Submit" button before having finished matching the items, an "Incomplete Answer" message will appear in the zone at the bottom of the screen page. If the checkerboard is complete, "Correct Answer" will be displayed.

The following shows a checkerboard visible at the beginning. The squares become hidden as the quiz taker correctly matches the items.

Display of submitted answer for a checkerboard matching question

Correct Answer

When the quiz taker clicks on the "Correct Answer" button, the correct answer is displayed as follows in the lower half of the screen page: the words "Correct Answer" followed by the correct answer for each matching pair of the matching board.

The screenshot shows a web browser window with a Netquiz Pro 4 interface. The browser's address bar shows a local file path: `file:///Users/lucie/Desktop/TMP-K7Y8M4E19/main.html`. The page title is "Untitled". The interface includes a navigation bar with "Results", "Reset", "Correct Answer", and "Submit" buttons, and a page indicator showing "Page 1 of 2".

The main content area displays a matching question: "Match each actor with the film in which he or she played a role." Below this, there are four items in a row: a grey box labeled "Elvis Graton", a photo of a man with dark curly hair, a grey box labeled "Les Invasions barbares", and a photo of a man with grey hair.

Below the question, the "Correct Answer" section shows three items: a photo of a woman with the name "Aurore", a photo of a man with the name "Les Invasions barbares", and a photo of a man with dark curly hair with the name "Elvis Graton".

The answer revealed for a checkerboard matching question

ESSAY QUESTIONS

In essay questions, quiz takers write their own answer to a question or express themselves on a given subject. Apart from the properties and editing zones common to all types of questions (see [Questions and Sections](#)), dictation questions have the following characteristics:

The Properties Tab

As you can see, this type of question only has properties common to all types of questions.

The screenshot shows a 'Question Preparation' window for an 'Essay' question. The 'Properties' tab is selected, displaying the following configuration:

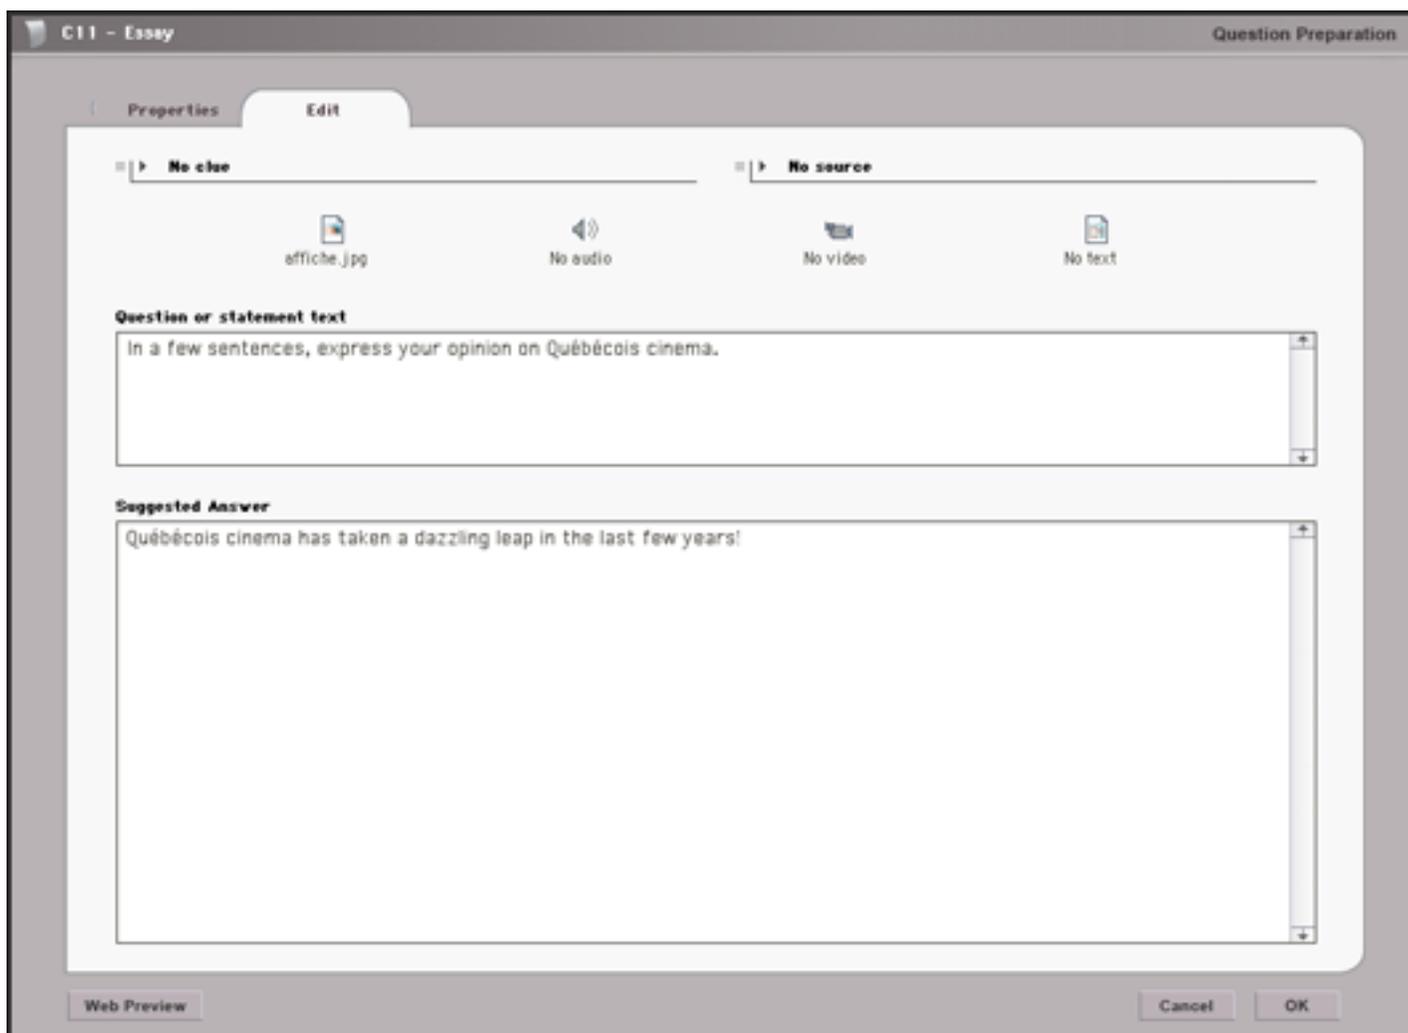

- Question title:** Your opinion is important
- Weighting:** 0
- Note:** Section 2
- Quizzes containing this element:** Cinequiz
- Web parameters:**
 - User controls media
 - Automatically start AUDIO in the question
 - Automatically start VIDEO in the question
 - Display the Correct Answer button

Buttons at the bottom include 'Web Preview', 'Cancel', and 'OK'.

Properties tab for an essay question

The Edit Tab

Under the "Question or statement text" in the lower part of the window, the "Edit" tab displays one text field in which you can enter a "Suggested Answer".

Edit tab for an essay question

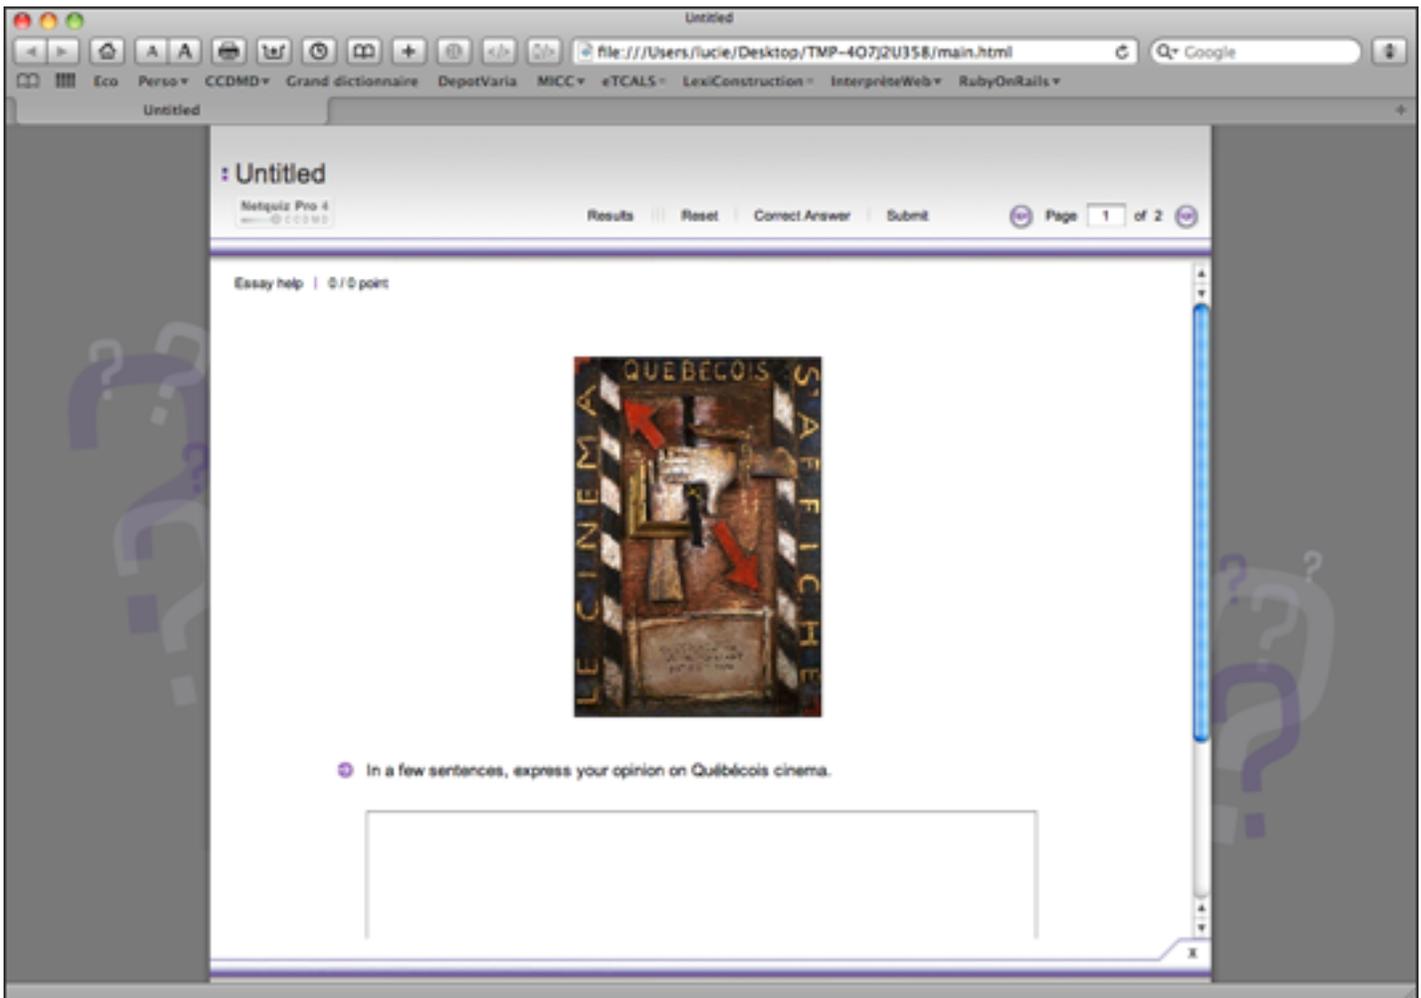

Suggested Answer

The "Suggested Answer" text field lets you write a comment or answer that the quiz takers can compare to their own answer when they click on the "Submit" or "Correct Answer" buttons (see "The Web Preview" section below). Any characters with an ASCII code higher than 255 will not be accepted. Moreover, you should avoid the following special characters: ', ", <, > because they have a specific meaning for web pages. This text field accepts changes in style. Refer to the "Edit Menu" section in [Menu Bar](#) to see how you can change a style or add web links and images in this field.

The Web Preview

Below is an example of the web preview of an essay question.

N.B. If you ask for web previews repeatedly, you may have to refresh the web page or empty your browser's cache in order to display the most recent changes.

Web preview for an essay question

Submit

When the quiz takers click on the "Submit" button, they see the suggested answer displayed in the lower half of the screen under "Suggested Answer". To check their answer, the quiz takers must then compare their own answer with the suggested one.

The screenshot shows a web browser window with a Netquiz Pro 4 interface. The browser's address bar shows a file path: file:///Users/lucie/Desktop/TMP-407J2U358/main.html. The interface includes a navigation bar with 'Results', 'Reset', 'Correct Answer', and 'Submit' buttons, and a page indicator 'Page 1 of 2'. Below this, the text 'Essay help | 0/0 point' is visible. The main content area features a movie poster for 'CINEMA QUÉBÉCOIS S'AFFIC' with two red arrows pointing to the top and bottom of the poster. Below the poster, the section 'Suggested Answer' contains the text: 'Québécois cinema has taken a dazzling leap in the last few years!'.

The answer submitted for an essay question

DICTATION QUESTIONS

In dictation questions, quiz takers listen to an audio or video clip at their own pace and transcribe what they hear in a text field. Apart from the properties and editing zones common to all types of questions (see [Questions and Sections](#)), dictation questions have the following characteristics:

The Properties Tab

Under the second horizontal line of the lower part of the window, the "Properties" tab displays several parameters that let you customize a dictation question.

The screenshot shows the 'Properties' tab of a dictation question configuration window. The window title is 'C14 - Dictation' and the subtitle is 'Question Preparation'. The 'Properties' tab is selected, and the 'Edit' tab is also visible. The configuration includes:

- Question title:** Short film "Nelligan. Profil et regards."
- Weighting:** 1.0
- Note:** Section 2
- Quizzes containing this element:** Cinequiz
- Web parameters (Note: These parameters can be applied to all questions in the Web Quiz Preparation window under the Properties tab):**
 - User controls media
 - Automatically start AUDIO in the question
 - Automatically start VIDEO in the question
 - Display the Correct Answer button
- Marks subtracted for spelling mistakes:** 0.05
- When correcting, take into account...**
 - capital/small letters
 - punctuation

At the bottom of the window, there are buttons for 'Web Preview', 'Cancel', and 'OK'.

Properties tab for a dictation question

Marks Subtracted for Spelling Mistakes

By default, the number of points subtracted for each word misspelled is "0.05". You can change this value in the corresponding field. It is important to adjust the weighting to take into account the number of words in the dictation. This avoids giving, for example, a mark of "0" to a student who has made only

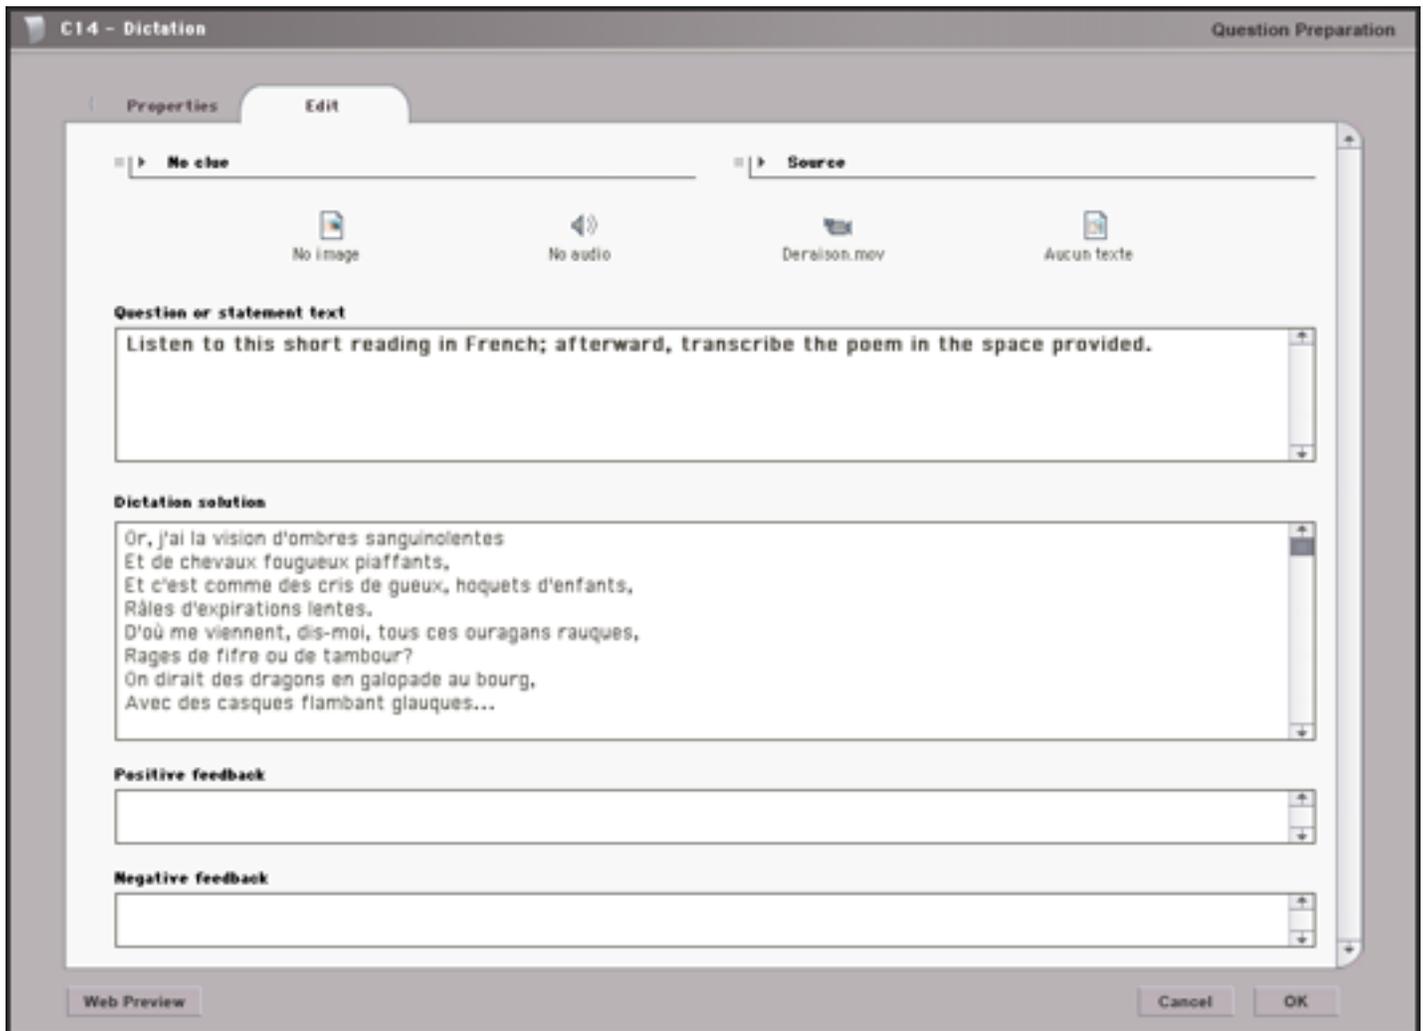

one mistake in a long dictation or a mark of "9.0 / 10.00" for a sentence in which nothing is right!

Punctuation and Capital/Small Letters

Punctuation and capital/small letters can be taken into account when correcting a dictation. Check these options if you want these types of mistakes to be recorded when the dictation is corrected.

The Edit Tab

The "Edit" tab displays text fields in which you can enter a question or statement, dictation solution as well as positive and negative feedback.

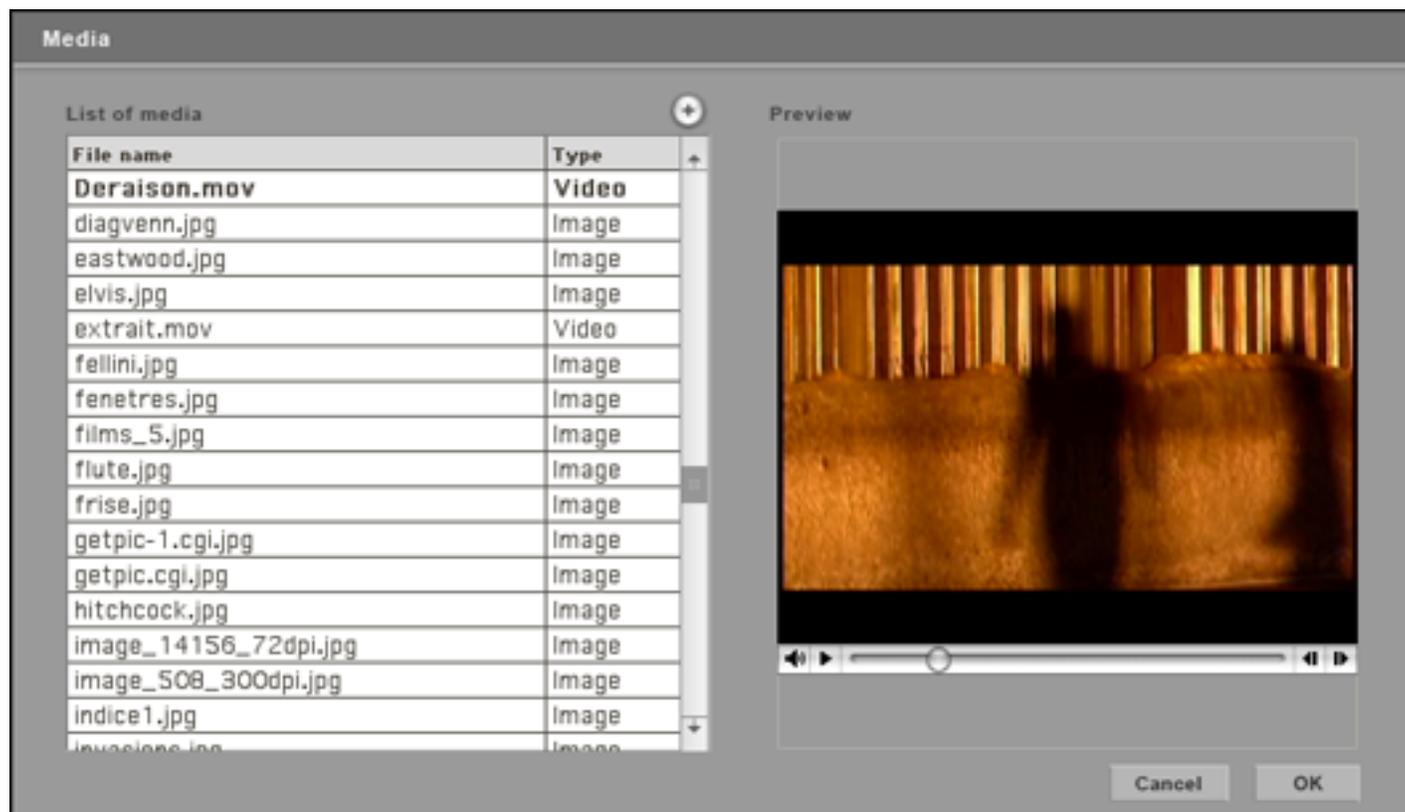

Edit tab for a dictation question

Dictation Audio Source

A dictation requires an audio source to be added:

- You can insert the audio source for the dictation using the "Audio" or "Video" buttons at the top of the "Edit" tab (see the "Image, Audio and Video Buttons" section of [Questions and Sections](#)).

Dialogue box for inserting a sound source in a dictation question

- You can also insert a web hyperlink in the "Question or statement text" field and link to another site that hosts an audio or video clip for the dictation (see "Insert a Web Hyperlink" in Menu Bar).

Dictation Solution

The "Dictation solution" text field lets you input the text that will be used to correct the dictation. Please note that style changes cannot be made in this text field. Any characters with an ASCII code higher than 255 will not be accepted. Moreover, avoid the following special characters: ', ", <, > because they have a specific meaning within web page coding.

- N.B. Use short dictations in order to avoid anomalies that interfere with the performance of the correction algorithm. A long text can be easily subdivided into short excerpts that are each the object of a separate dictation question.

It is not recommended to use dictation questions in a summative quiz because the correction algorithm will give "0" as a grade if it encounters too many anomalies.

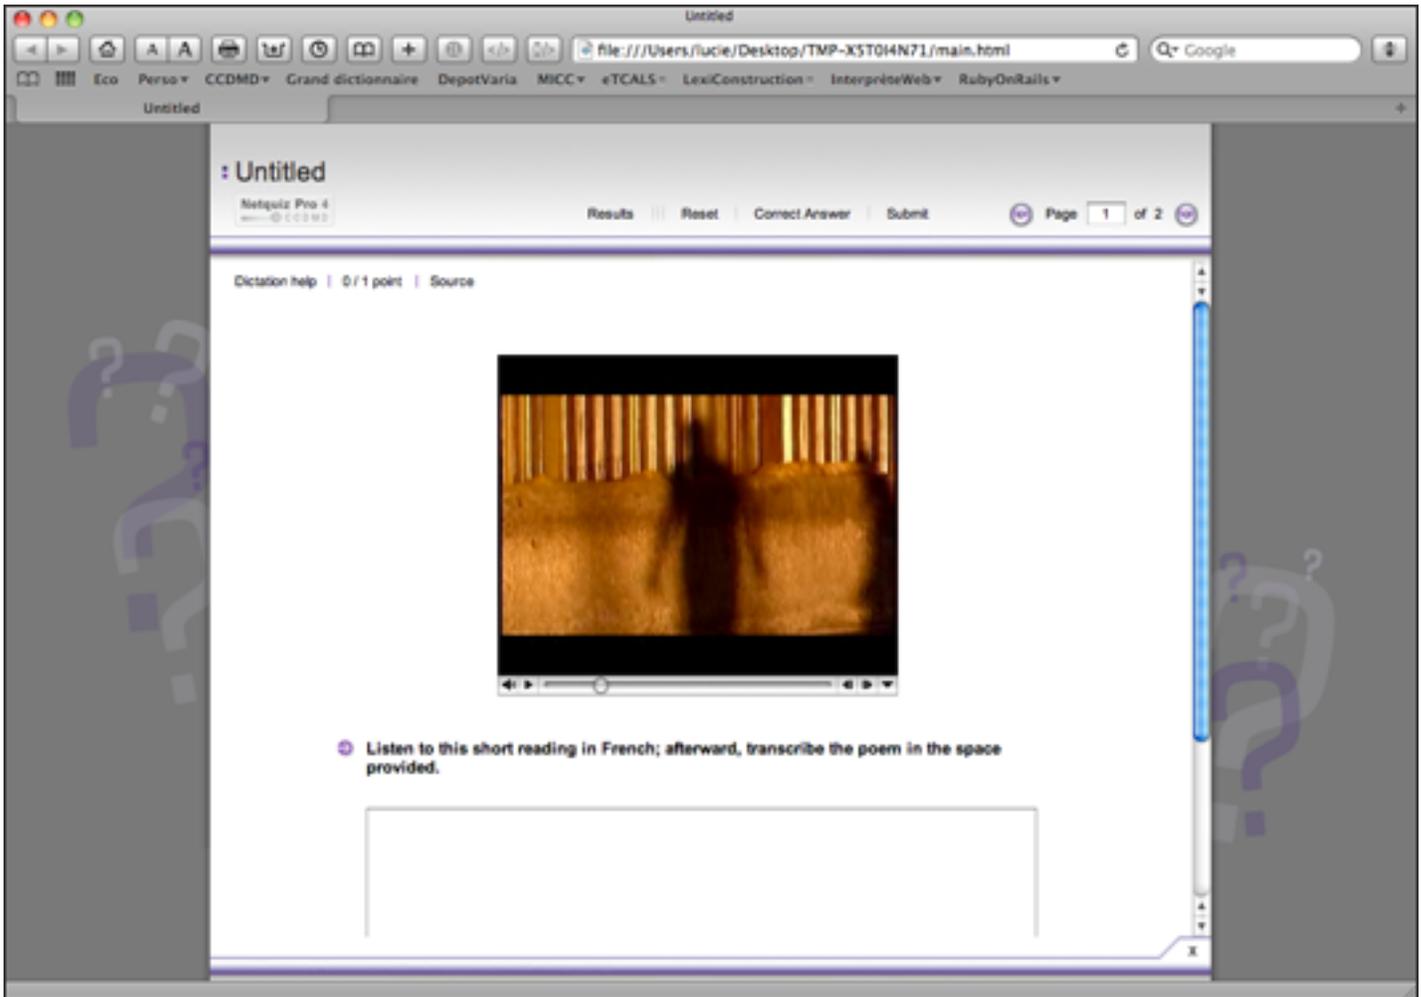

Positive and Negative Feedback

The "Positive feedback" and "Negative feedback" text fields are used to enter pertinent feedback. Do not use these fields to input the correct answer or incorrect answer. This information is given automatically as the answers are checked, regardless of whether additional feedback exists. This text field accepts changes in style. Refer to "The Edit Menu" section in Menu Bar to see how you can change a style or add web links and images to this field.

The Web Preview

Below is an example of the web preview of a dictation question. In this type of question, the "Source" is optional.

N.B. If you ask for web previews repeatedly, you may have to refresh the web page or empty your browser's cache in order to display the most recent changes.

Web preview for a dictation question

Submit

When quiz takers click on the "Submit" button, they receive feedback for what they have written in the input field of the dictation:

- If they have written nothing, "Incomplete Answer" will appear in the lower part of the screen page.
- If the dictation has no mistakes, "Correct Answer" will appear in green followed by positive feedback if any has been provided.
- If there are mistakes in the dictation, "Incorrect Answer" will appear in red followed by negative feedback if any has been provided. There will also be red marks indicating misspelled words, missing words (underlined) and superfluous words (between brackets).

HIGHLIGHT TEXT QUESTIONS

A highlight text question allows the user to use up to five marker colours to identify up to five types elements within a text. Apart from the properties and editing zones common to all types of elements (see [Questions and Sections](#)), highlight text questions have the following characteristics:

The Properties Tab

In the lower part of the window beneath the second horizontal line, the "Properties" tab displays several parameters that let you customize a highlight text question.

The screenshot shows a window titled "C15 - Highlight text" with a "Question Preparation" header. The "Properties" tab is active, showing the following fields and options:

- Question title:** A text box containing "Deceased film personalities".
- Weighting:** A text box containing "1.0".
- Note:** A text box containing "Section 2" with expand/collapse arrows on the right.
- Quizzes containing this element:** A text box containing "Cinequiz".
- Web parameters (Note: These parameters can be applied to all questions in the Web Quiz Preparation window under the Properties tab):**
 - User controls media
 - Automatically start AUDIO in the question
 - Automatically start VIDEO in the question
 - Display the Correct Answer button
- Add marker colours and enter their classification labels:** A list of five items, each with a colored square and a text box:
 - Personality who is still alive on September 14, 2010
 - Personality who died before September 14, 2010
 - Sans titre
 - Sans titre
 - Sans titre
- Marks subtracted for incorrect answer:** A text box containing "0.1".

At the bottom of the window, there are buttons for "Web Preview", "Cancel", and "OK".

Properties tab for a highlight text question

Select Marker Colours and Enter Their Classification Labels

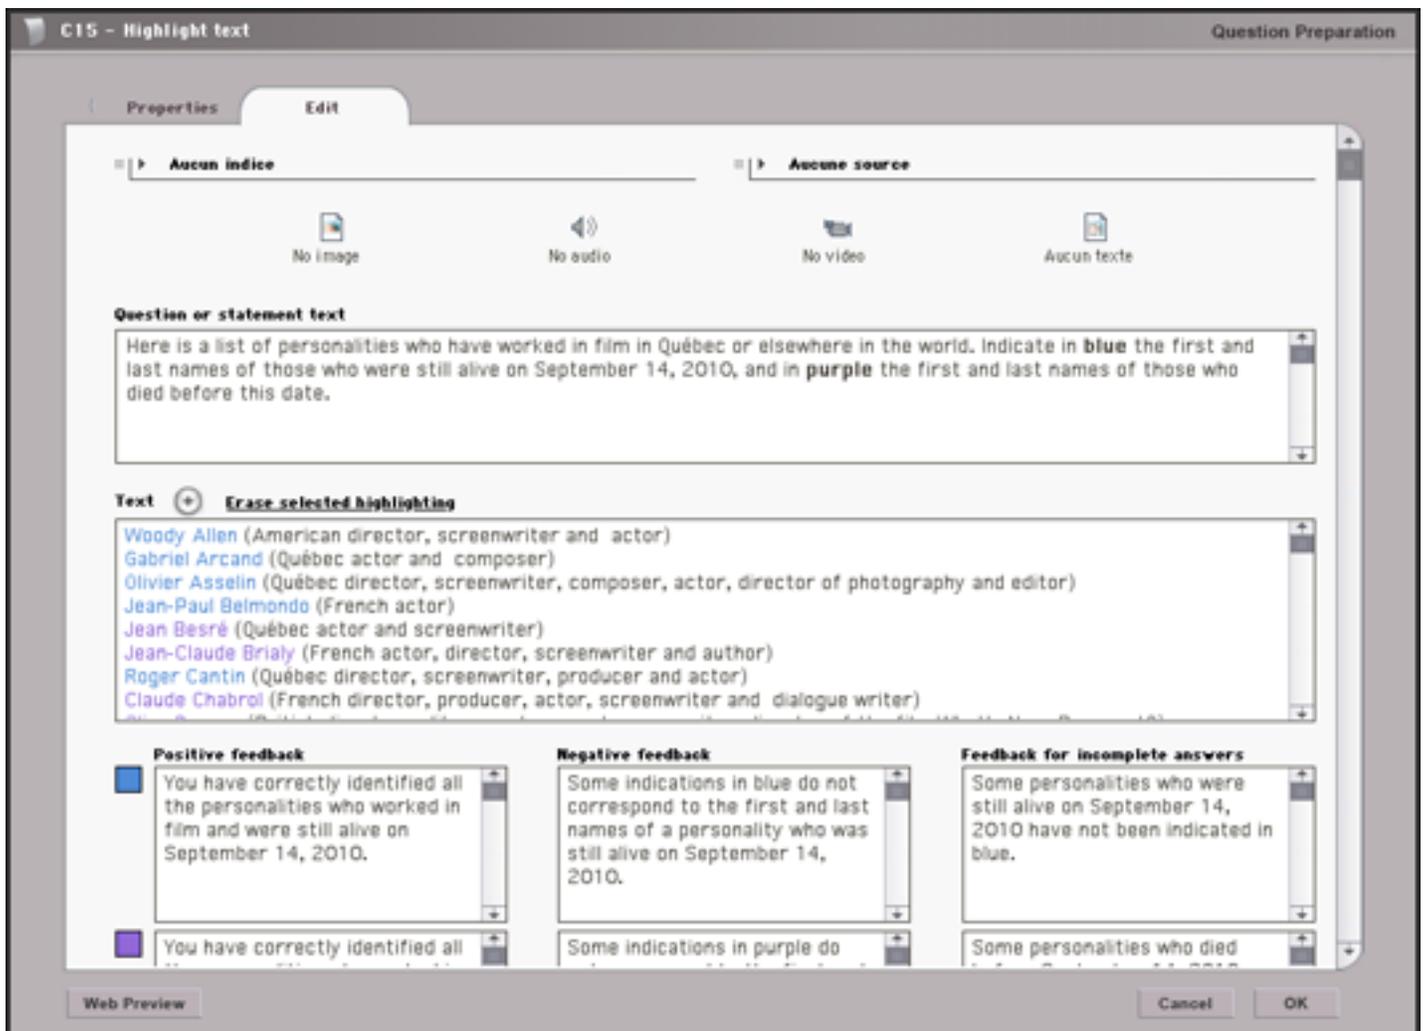

The first marker, which is yellow by default, is always selected. It is possible to select up to five markers and enter a distinctive label for each. You can also change the colour of the markers by clicking the respective coloured squares and selecting a new colour from the menu. Be sure to choose a different colour for each marker.

Deductions for Incorrect Answers

The number of points deducted for an incorrect answer is "0.1". You can change this value as necessary. Adjust this value in terms of the number of possible answers so as to avoid disproportionate marks such as a "0" for one incorrect answer or a "9/10" when several answers are wrong.

The Edit Tab

Under the "Question or statement text" in the lower part of the window, the "Edit" tab displays "+" button used to mark text in different colours, an "Erase highlighting" button, as well as fields for text associated with each marker, "Positive feedback", "Negative feedback", and "Feedback for incomplete answers".

Edit tab for a highlight text question

Text Field

The text field is where the text that needs to be highlighted is entered. This field does not accept style modifications from the "Edit" menu. This text can, however, be highlighted with the "+" button.

"+" Button

When the "+" button is clicked, a drop-down menu displays the coloured labels defined in the "Properties" tab. To add coloured highlighting to the text, select the text first, then choose the appropriate coloured label from the drop-down menu.

"Erase Selected Highlighting" Button

To remove highlighting, select the highlighted text first then click the "Erase selected highlighting" button.

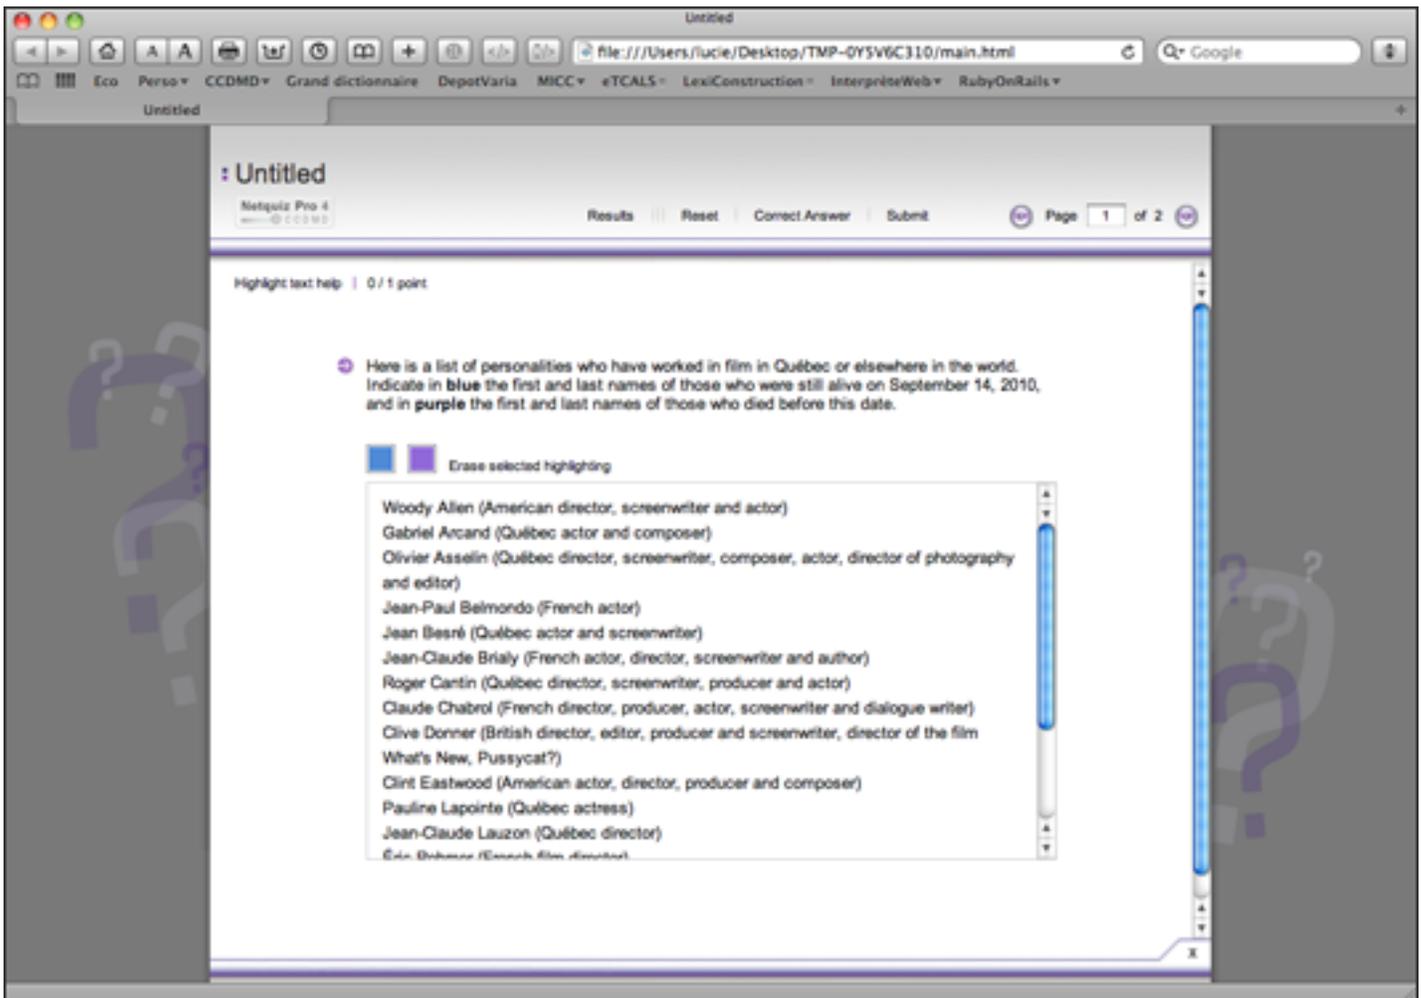

Fields for Positive Feedback, Negative Feedback and Feedback for Incomplete Answers

The text fields for "Positive feedback", "Negative feedback" and "Feedback for incomplete answers" are used to enter relevant feedback other than what is automatically given: "Correct answer", "Incorrect answer" and "Incomplete answer". Refer to "The Edit Menu" section in [Menu Bar](#) to see how you can change a style or add web links and images to this field.

The Web Preview

The following is an example of the web version of a highlight text question.

N.B. If you request web previews repeatedly, you may need to refresh the web page or empty your browser's cache in order to display the most recent changes.

Web preview of a highlight text question

Submit

When a quiz taker clicks on the "Submit" button before having finished the question, an "Incomplete answer" message will appear in the zone at the bottom of the screen page. If the exercise contains at least one highlighted word, "Correct Answer", "Incorrect Answer" or "Incomplete Answer" will appear in this zone. For each answer, the highlighted words will be preceded by green or red bullets in a list to indicate whether they are correct or not. Positive or negative feedback will also be displayed below the lists if it exists

Page 1 of 2

Highlight text help | 0.5 / 1 point

Here is a list of personalities who have worked in film in Québec or elsewhere in the world. Indicate in **blue** the first and last names of those who were still alive on September 14, 2010, and in **purple** the first and last names of those who died before this date.

Erase selected highlighting

Jean-Claude Brialy (French actor, director, screenwriter and author)

Roger Cantin (Québec director, screenwriter, producer and actor)

Claude Chabrol (French director, producer, actor, screenwriter and dialogue writer)

Clive Donner (British director, editor, producer and screenwriter, director of the film *What's New, Pussycat?*)

Incorrect Answer

Personality who is still alive on September 14, 2010

- Woody Allen
- Gabriel Arcand
- Jean-Paul Belmondo
- Jean-Claude Brialy
- Roger Cantin
- Clint Eastwood

Personality who died before September 14, 2010

- Olivier Asselin
- Jean Besré
- Claude Chabrol
- Clive Donner
- Pauline Lapointe
- Jean-Claude Lauzon
- Éric Rohmer
- Erich Segal
- Marcel Simard

Some indications in blue do not correspond to the first and last names of a personality who was still alive on September 14, 2010.

At the bottom, there are buttons for "Web Preview", "Cancel", and "OK".

Properties tab for a sequencing question

Number of Items

A sequencing question contains between 2 and 15 items to put in order. Please note, however, that manipulating too great a number of items can be difficult in the web version of the question.

Item Type

In the "Item Type" drop-down menu, you can choose between "Text" and "Image" depending on the kind of the items you want placed in order.

Order Style

In the "Order Style" drop-down menu, you can choose between "Alphabetical" and "Numerical". The end result will be a letter or a number before each item to be put in order.

Answer Order

By default, the presentation order of the answer choices in the web version of the question is random. If you want to specify a predetermined order, click "Predetermined" and place the alphabetical or numerical labels in the box located to the right of the "Predetermined" option in the desired order.

The Edit Tab

Under the "Question or statement text" in the lower part of the window, the "Edit" tab displays three columns in which you can enter the content and respective positive and negative feedback of the items to order.

The screenshot shows the 'Edit' tab of a sequencing question editor. The window title is 'C2 - Sequencing' and 'Question Preparation'. The 'Edit' tab is active, showing a 'Question or statement text' field with the text 'Put these films in order from the oldest to the most recent.' Below this are three columns: 'Correct answer order', 'Positive feedback', and 'Negative feedback'. The 'Correct answer order' column contains a list of films: 'A Clockwork Orange', 'Alien I', 'E.T.', and 'Born on the Fourth of July', numbered 1 to 4. The 'Positive feedback' column contains the years: '1971', '1979', '1982', and '1989'. The 'Negative feedback' column is empty. At the bottom, there are 'Web Preview', 'Cancel', and 'OK' buttons.

	Correct answer order	Positive feedback	Negative feedback
1	A Clockwork Orange	1971	
2	Alien I	1979	
3	E.T.	1982	
4	Born on the Fourth of July	1989	

Edit tab for a sequencing question

Correct Answer Order

The "Correct answer order" column can contain text or images according to the choice made for the "Item type" in the "Properties" window of the question.

If the column contains text, you need only write the text. Any characters with an ASCII code higher than 255 will not be accepted. Moreover, you should avoid the following special characters: ', ", <, > because they have a specific meaning for web pages. This text field accepts changes in style. Refer to "The Edit Menu" section in [Menu Bar](#) to see how you can change a style or add web links and images in this field.

If this column contains images, you need only click in the rectangle to display a dialogue box to choose an image from the list of media already imported to the "MEDIA" folder of the question bank. If the image that you wish to insert is not found in this list, you can add it by clicking on the "+" button of the "MEDIA" dialogue box. Clicking this button will display a window that allows you to find the image on your hard drive and import it into the "MEDIA" folder of your question bank by clicking on the "Open" button. An identical "MEDIA" dialogue box will appear when you insert an image, an audio clip or a video into the heading of a question (see [Questions and Sections](#)) or into the home page of a quiz (see [Home Page](#)).

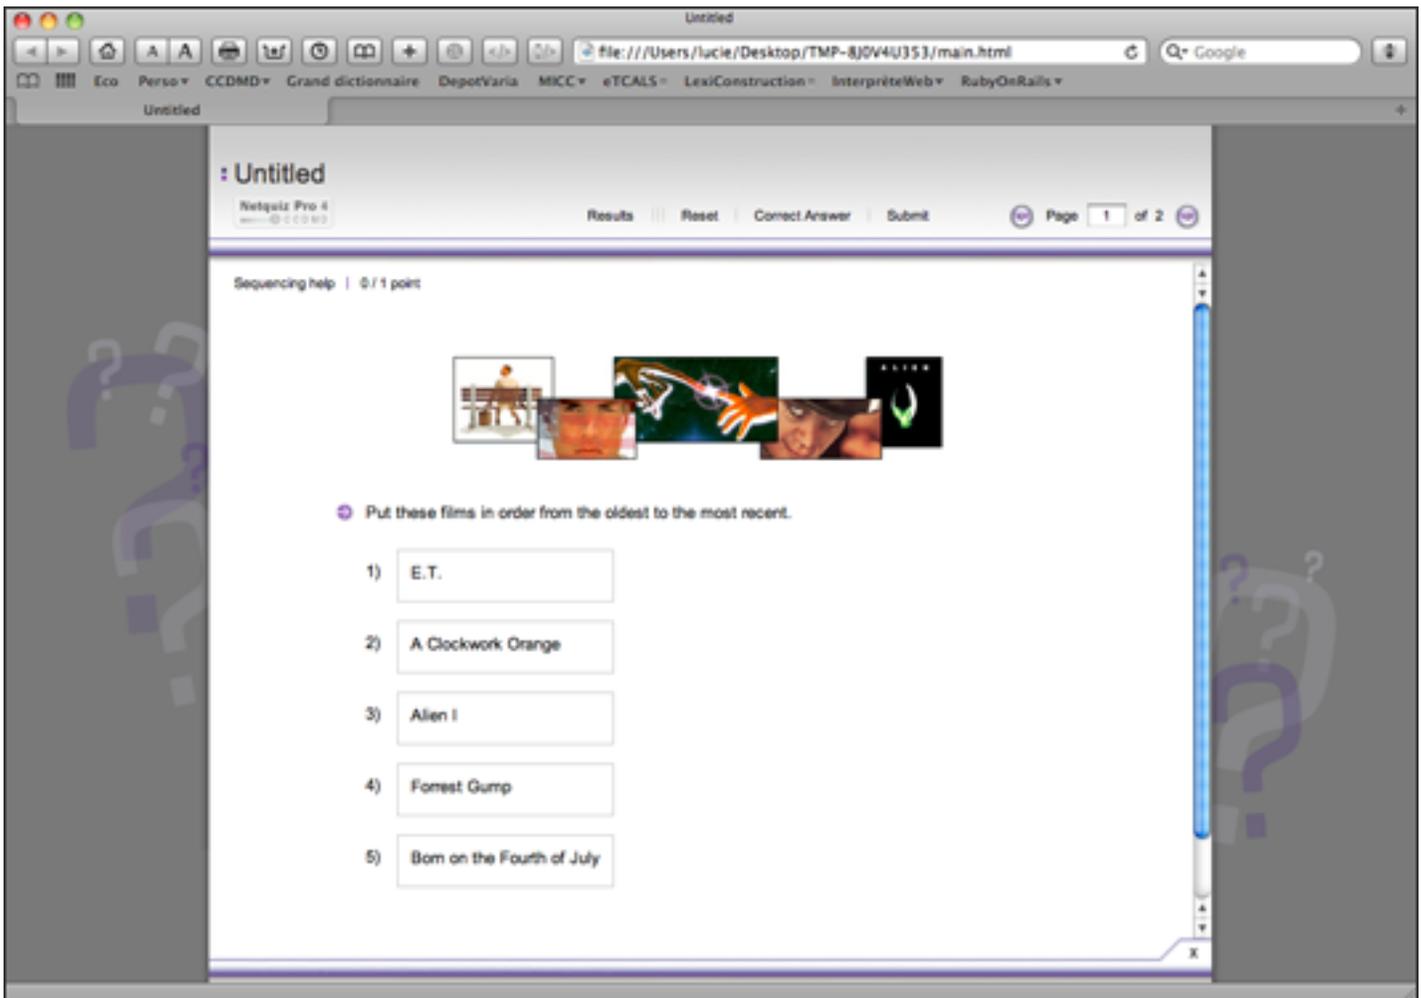

Positive and Negative Feedback Columns

The "Positive" and "Negative feedback" columns are used to enter an explanation or pertinent feedback other than "Correct answer" or "Incorrect answer" since either one of these is automatically given to the user when an answer is checked, whether or not other feedback exists. This text field accepts changes in style. Refer to "The Edit Menu" section in [Menu Bar](#) to see how you can change a style or add web links and images in this field.

The Web Preview

Below is an example of the web preview of a sequencing question.

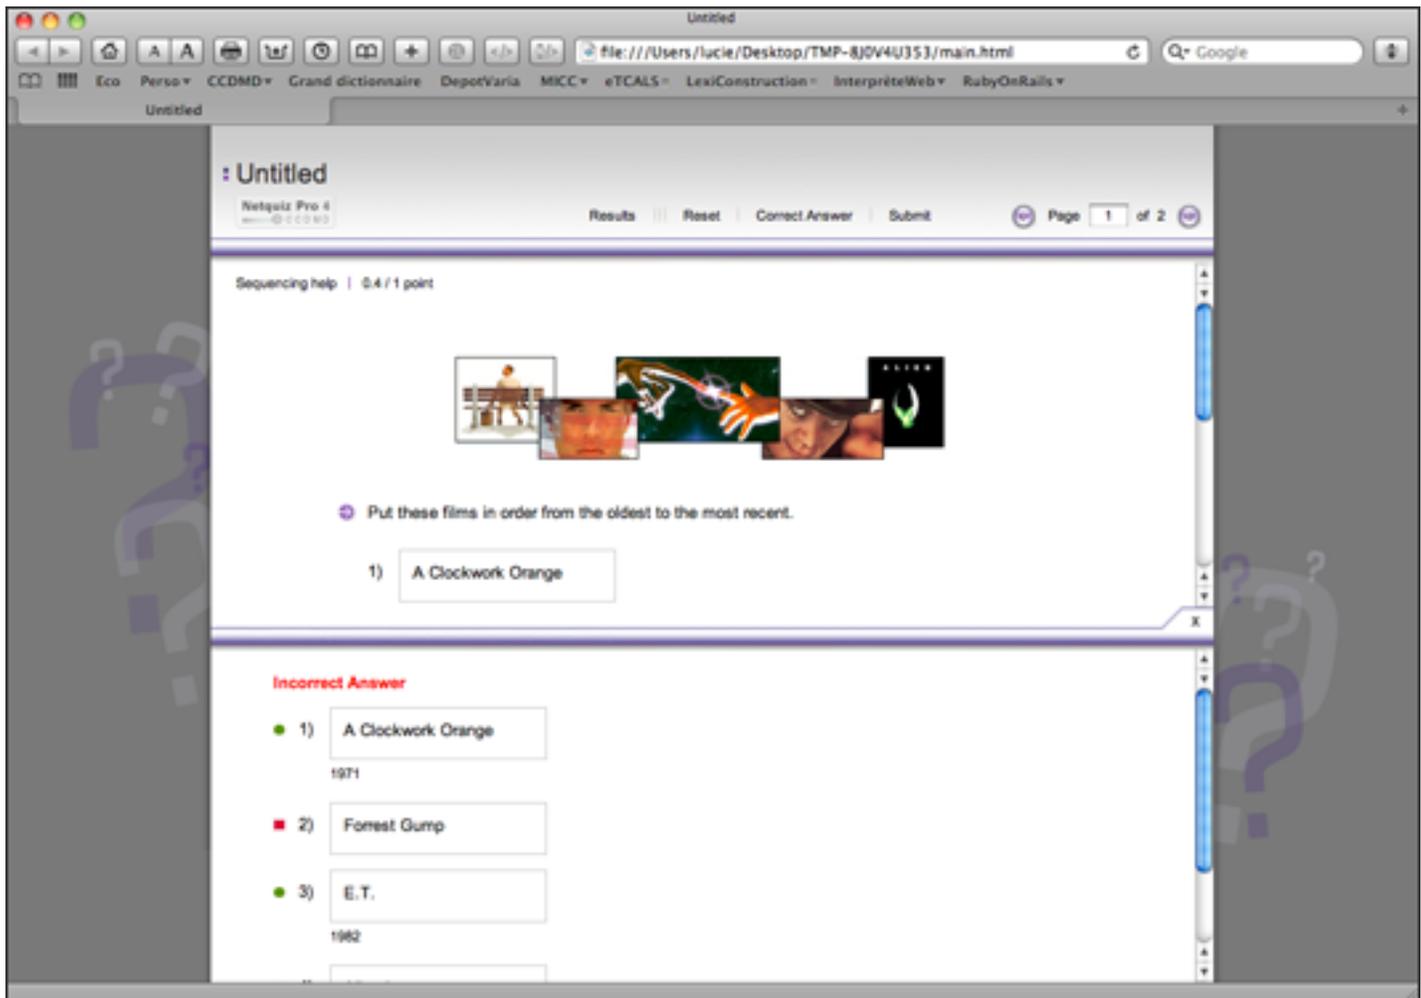

N.B. If you ask for web previews repeatedly, you may have to refresh the web page or empty your browser's cache in order to display the most recent changes.

Web preview of a sequencing question

Submit

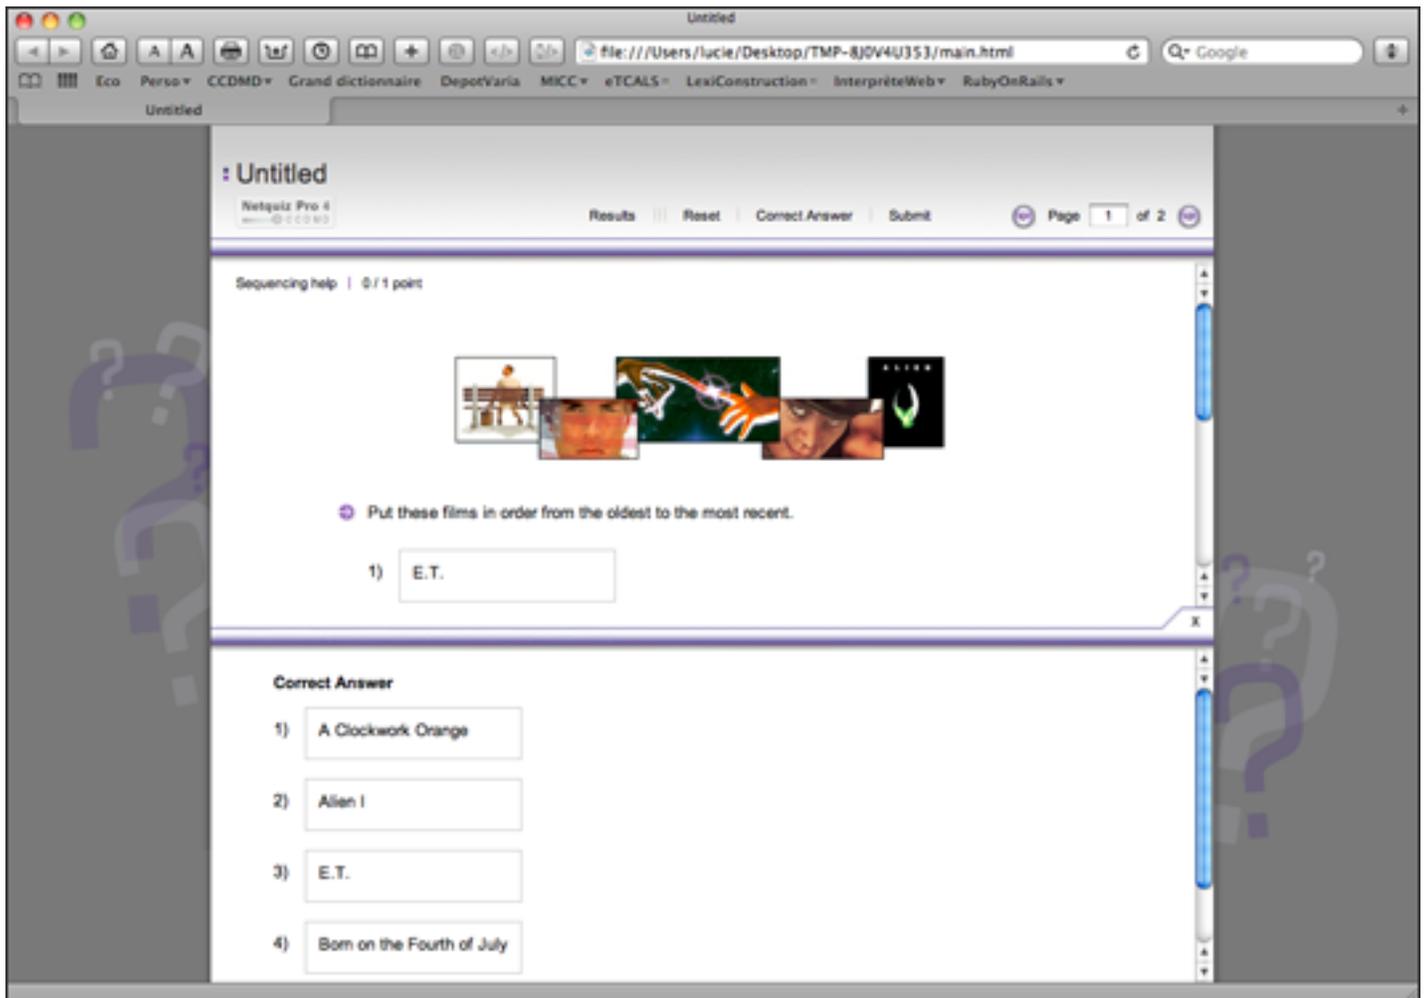

When a quiz taker clicks on the "Submit" button, he or she sees, at the bottom of the screen page, "Correct answer" in green or "Incorrect answer" in red at the bottom of the screen page. Then, for each item put in order, a green dot or red square indicates whether or not the order of the item is correct; a reminder of the contents of the item is displayed, as well as positive or negative feedback (if any has been entered).

Display of the answer verification for a sequencing question

Correct Answer

When the quiz taker clicks on the "Correct Answer" button, the correct answer is displayed as follows in the lower half of the screen: the words "Correct Answer" is followed by the content of each item placed in the right order.

The screenshot shows a web browser window with the address bar displaying "file:///Users/lucie/Desktop/TMP-8J0V4U353/main.html". The browser's menu bar includes "Eco", "Perso", "CCDMD", "Grand dictionnaire", "DepotVaria", "MCC", "eTCALS", "LexiConstruction", "InterprèteWeb", and "RubyOnRails". The page title is "Untitled". Below the title, there are navigation links: "Results", "Reset", "Correct Answer", and "Submit". A progress indicator shows "Page 1 of 2".

The main content area is titled "Sequencing help | 0 / 1 point". It features a horizontal strip of five movie posters: "A Clockwork Orange", "Alien I", "E.T.", "Born on the Fourth of July", and "E.T." (repeated). Below the posters, the instruction reads: "Put these films in order from the oldest to the most recent." A single input field is shown with "1) E.T." entered.

The "Correct Answer" section is located below the question. It lists the correct sequence of movies in four numbered input fields:

- 1) A Clockwork Orange
- 2) Alien I
- 3) E.T.
- 4) Born on the Fourth of July

The answer revealed for a sequencing question

SHORT ANSWER QUESTIONS

In short answer questions, quiz takers write a short answer to a given question. Apart from the properties and editing zones common to all types of questions (see [Questions and Sections](#)), short answer questions have the following characteristics:

The Properties Tab

Under the second horizontal line in the lower part of the window, the "Properties" tab displays several parameters that let you customize a short answer question.

The screenshot shows the 'Properties' tab of a 'Question Preparation' window. The window title is 'C6 - Short answer'. The 'Properties' tab is selected, and the 'Edit' tab is also visible. The 'Question title' field contains 'Quebec cinema'. The 'Weighting' field contains '1.0'. The 'Note' field contains 'Section 2'. The 'Quizzes containing this element' field contains 'Cinequiz'. Below these fields are 'Web parameters' with the following options: 'User controls media' (checked), 'Automatically start AUDIO in the question' (unchecked), 'Automatically start VIDEO in the question' (unchecked), and 'Display the Correct Answer button' (checked). At the bottom, 'When correcting, take into account...' includes 'capital/small letters' and 'punctuation' (both unchecked). Buttons for 'Web Preview', 'Cancel', and 'OK' are at the bottom.

Properties tab for a short answer question

Web Parameters

These parameters allow you to indicate whether the user controls the audio and video when the question loads or whether you want the audio and video to start automatically. Another parameter allows you to control the display of the "Correct Answer" button which allows the viewer to see the question answer. "Web parameters" are also affected globally within a quiz "Properties" tab. The radio-button "User controls media" and the "Display the Correct Answer button" check box are selected

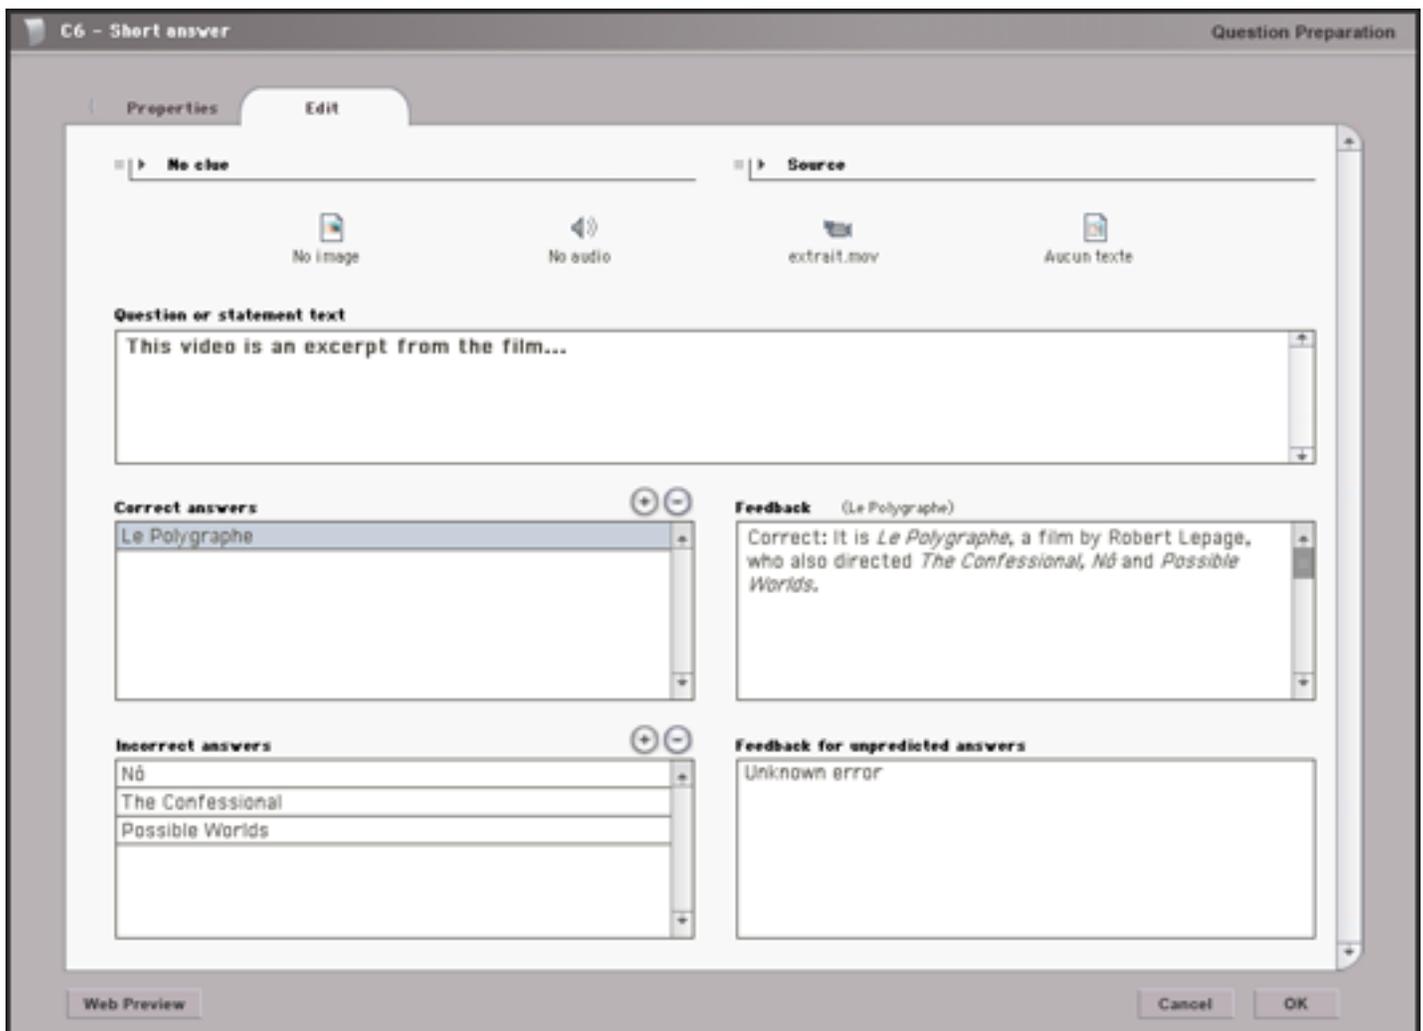

by default. Note that these parameters can be customized as needed in a given quiz (see [Adding and Preparing Quizzes](#)).

When Correcting, Take Into Account...

Two elements can be taken into account when it comes time to correct: capital/small letters and punctuation. Check one or both of these options if you would like them to be considered when the answer is verified.

The Edit Tab

Under the "Question or statement text" in the lower part of the window, the "Edit" tab displays a zone to enter the accepted correct answers, a zone for entering the predicted incorrect answers, a text field for entering the respective feedback and a field for entering more general feedback for unpredicted answers.

Edit tab for a short answer question

Correct Answers and Incorrect Answers

In a short answer question, quiz takers write their answers in a text field. The validation of the answer will take into account what has been defined in the "Correct answers" and "Incorrect answers" lists. To

insert an answer into one of these zones, click on the "+" button; a line will be added to the zone with a default text ("Corect answer x" or "Incorrect answer x"); click this element and enter the text of your choice. To delete an answer, click the "-" button. Aside from the "Capital and small letters" or "Punctuation" options chosen in the "Properties" tab, note that style changes are not permitted in this zone, because quiz takers must write exactly what you have written in these text fields in order to get the appropriate feedback.

Feedback

You will notice that each time you enter an answer in the "Correct answer" or "Incorrect answer" zones, this answer automatically appears in brackets next to the word "Feedback". You may then enter the feedback that corresponds to this answer choice.

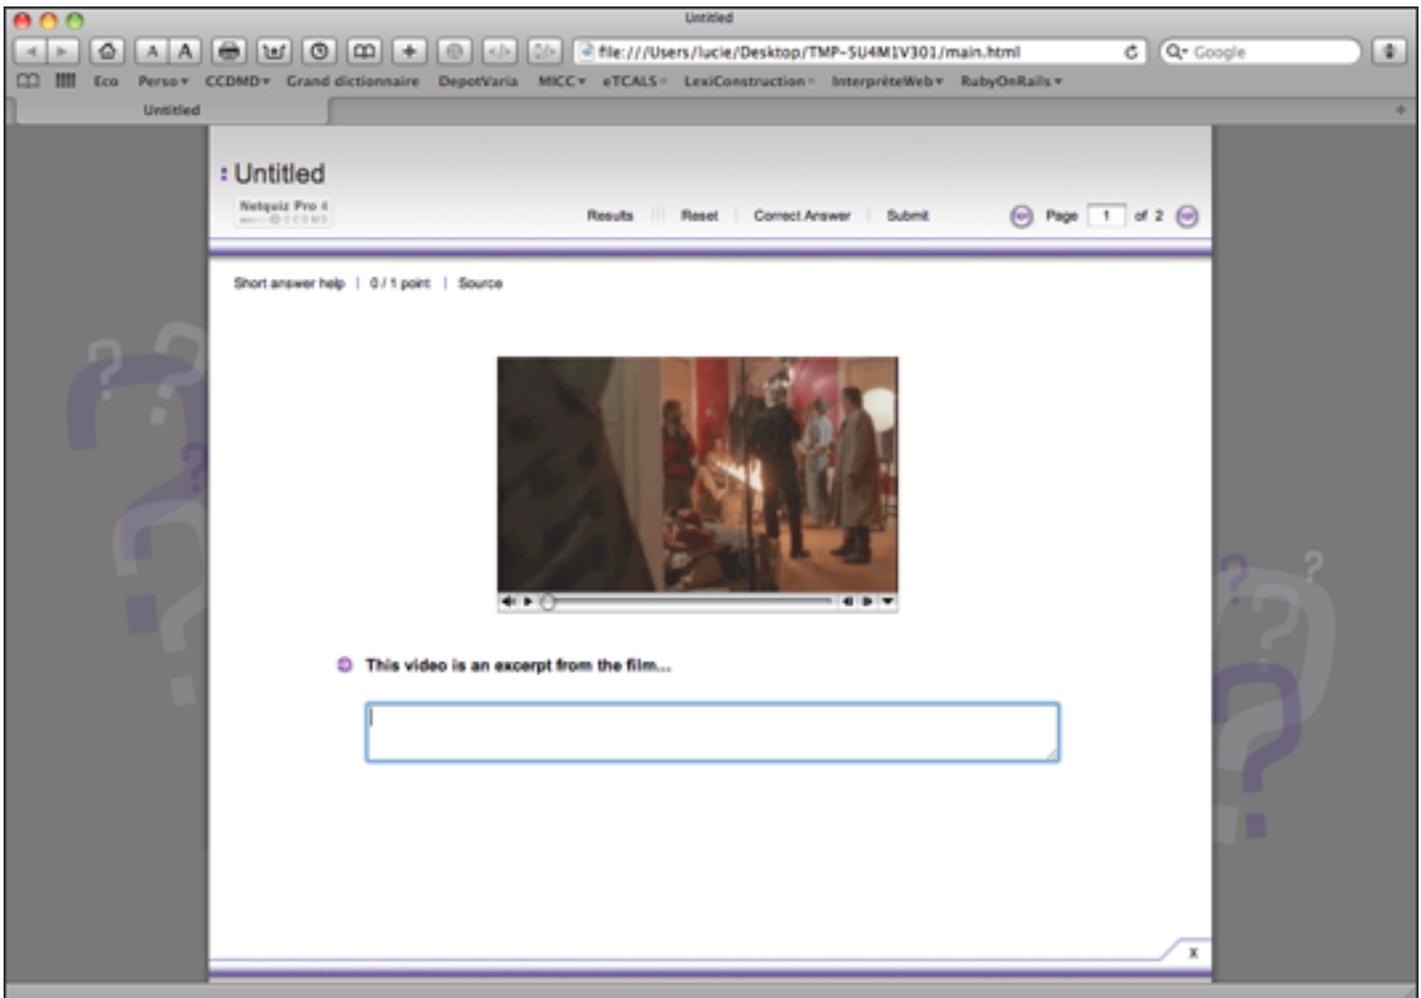

Feedback for Unpredicted Answers

If a quiz taker enters an answer that is neither an "Correct answer" or a "Incorrect answer", the feedback entered in the field "Feedback for unpredicted answers" will be displayed when the answer is verified. This field contains the default term "Unknown error", but you can replace it by entering another of your choice.

The Web Preview

Below is an example of the web preview of a short answer question.

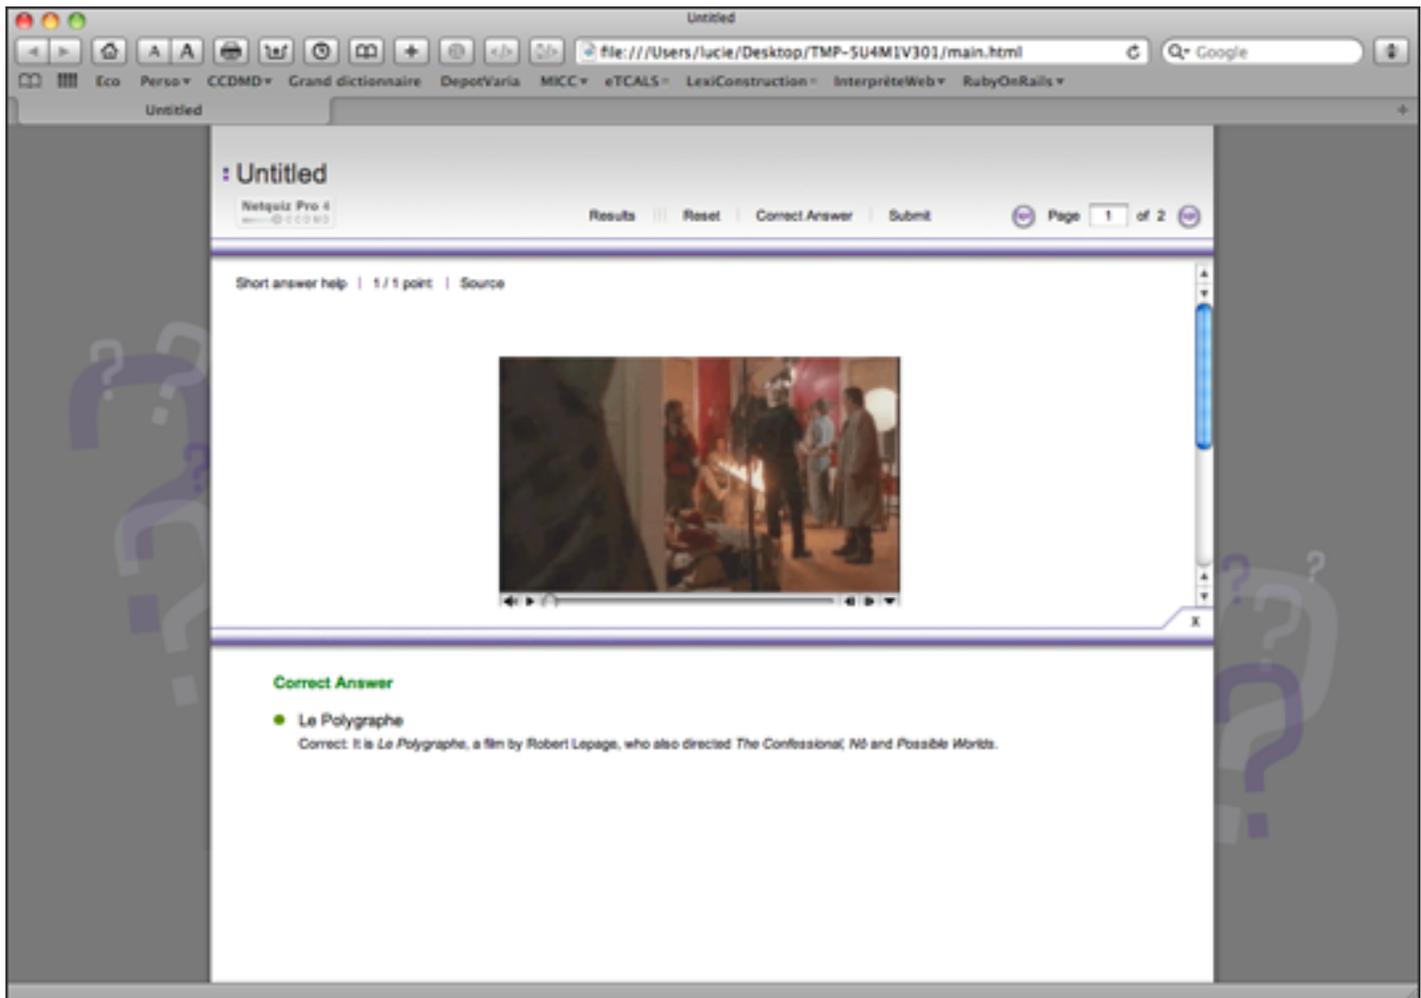

N.B. If you ask for web previews repeatedly, you may have to refresh the web page or empty your browser's cache in order to display the most recent changes.

Web preview for a short answer question

Submit

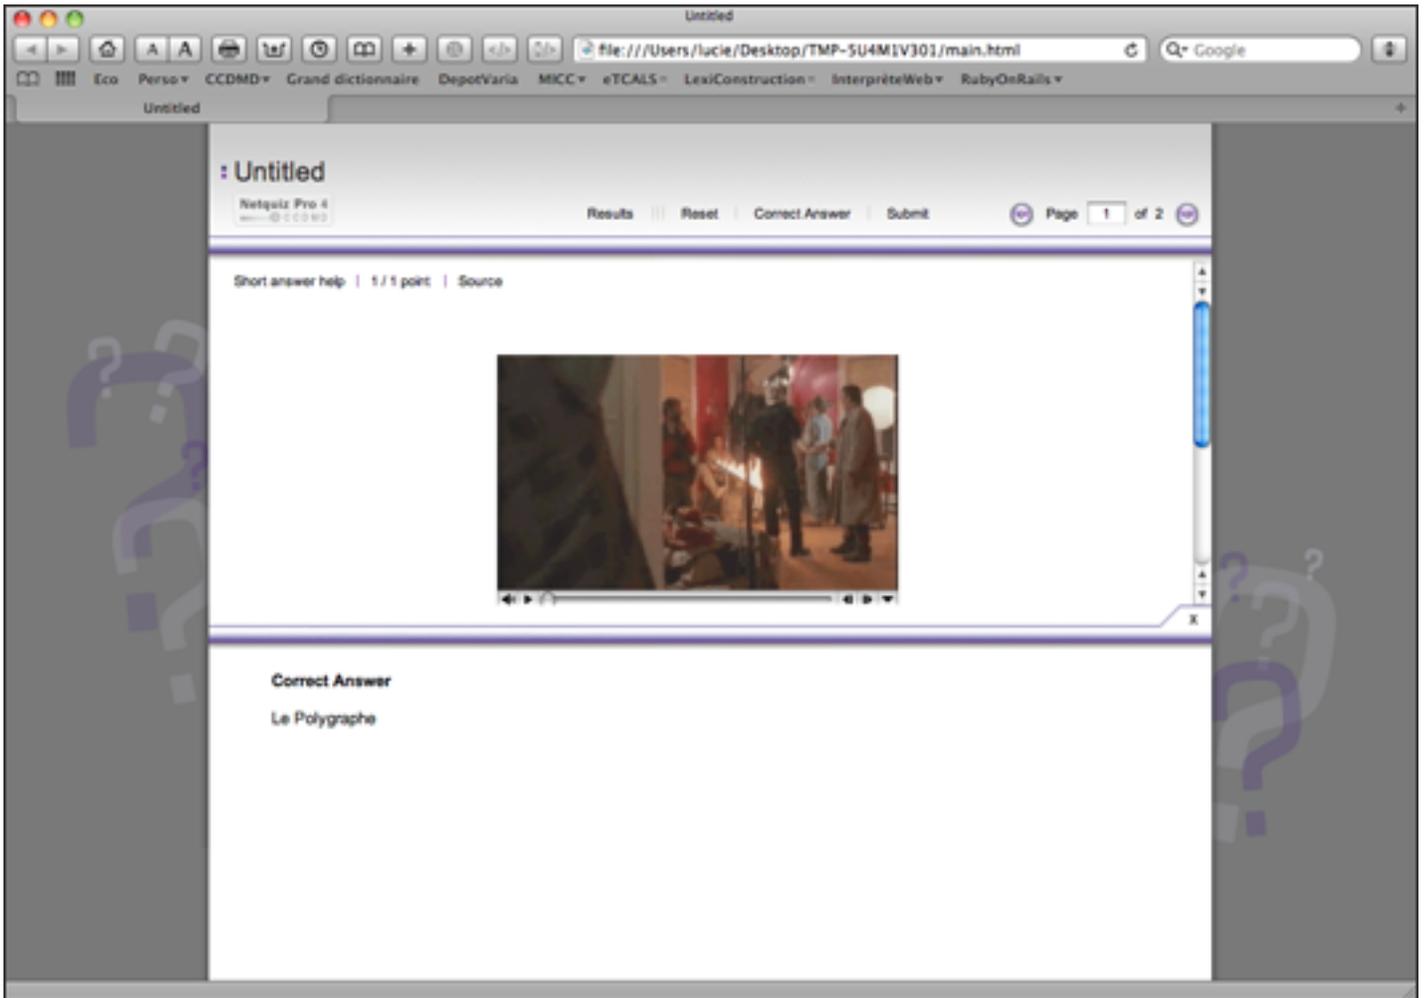

When a quiz taker clicks on the "Submit" button, he or she sees, at the bottom of the screen page, "Correct answer" in green or "Incorrect answer" in red. Then a green dot or red square indicates whether or not the answer is correct, and a reminder of the contents of the answer chosen by the quiz taker is displayed as well as feedback, if any has been entered for this choice of answer.

Display of submitted answer for a short answer question

Correct Answer

When the quiz taker clicks on the "Correct Answer" button, the correct answer is displayed as follows: the words "Correct Answer" followed by the correct answer.

Answer revealed for a short answer question

MULTIPLE ANSWER QUESTIONS

In multiple answer questions, quiz takers choose more than one answer from among several choices. Apart from the properties and editing zones common to all types of questions (see [Questions and Sections](#)), multiple answer questions have the following characteristics:

The Properties Tab

Under the second horizontal line in the lower part of the window, the "Properties" tab displays several parameters that let you customize a multiple answer question.

The screenshot shows the 'Properties' tab for a multiple answer question. The window title is 'C5 - Multiple answer' and the subtitle is 'Question Preparation'. The 'Properties' tab is selected, and the 'Edit' tab is also visible. The settings are as follows:

- Question title:** Serquel M. Eisenstein
- Weighting:** 1.0
- Note:** Section 1
- Quizzes containing this element:** Cinequiz
- Web parameters (Note: These parameters can be applied to all questions in the Web Quiz Preparation window under the Properties tab):**
 - User controls media
 - Automatically start AUDIO in the question
 - Automatically start VIDEO in the question
 - Display the Correct Answer button
- Number of answer choices:** 4
- Answer type:** Text
- Order style:** Alphabetical
- Answer requirements:**
 - All the correct answers
 - At least one correct answer among the choices
- Answer order:**
 - Random
 - Predetermined

At the bottom of the window, there are buttons for 'Web Preview', 'Cancel', and 'OK'.

Properties tab for a multiple answer question

Number of Answer Choices

A multiple answer question can be set to have "2" to "99" choices. The minimum number of answer choices is "2", which is the default number appearing in the "Number of answer choices" box.

Answer Type

In the "Answer type" drop-down menu, you can choose between "Text" and "Image" depending on the kind of answer choices you want the quiz taker to work with.

Order Style

In the "Order style" drop-down menu, you can choose between "None", "Alphabetical" and "Numerical". The end result will be a letter, a number or nothing before each answer choice.

Answer Order

By default, the presentation order of the answer choices in the web version of the question is random. If you want to specify a predetermined order, click "Predetermined" and place the alphabetical or numerical labels in the box located to the right of the "Predetermined" option in the desired order.

Answer Requirements

At the bottom of the "Properties" window of the multiple answer question, you have a choice between two options: you can require that quiz takers provide "All the correct answers" (default option), or "At least one correct answer among the choices".

The Edit Tab

Under the "Question or statement text" in the lower part of the window, the "Edit" tab displays a column in which you can write all the possible correct answers as well as two columns for indicating the content and respective feedback of the answer choices.

FILL IN THE BLANKS QUESTIONS

In fill in the blanks questions, quiz takers complete a text by writing in the missing expressions or words. Apart from the properties and editing zones common to all types of questions (see [Questions and Sections](#)), fill in the blanks questions have the following characteristics:

The Properties Tab

Under the second horizontal line in the lower part of the window, the "Properties" tab displays several parameters that let you customize a fill in the blanks question.

The screenshot shows a window titled "C4 - Fill in the blanks" with a "Question Preparation" header. The "Properties" tab is active, showing the following settings:

- Question title:** The Krzysztof Kieslowski Trilogy (1993-94)
- Weighting:** 4.0
- Note:** Section 1 (with a choice-of-answer menu)
- Quizzes containing this element:** Cinequiz
- Web parameters (Note: These parameters can be applied to all questions in the Web Quiz Preparation window under the Properties tab):**
 - User controls media
 - Automatically start AUDIO in the question
 - Automatically start VIDEO in the question
 - Display the Correct Answer button
- Answer type:**
 - Drop-down answer lists
 - Answer fields
 - Drag and drop answers

OR

 - Small answer fields
 - Medium answer fields
 - Large answer fields

Buttons at the bottom include "Web Preview", "Cancel", and "OK".

Properties tab for a fill in the blanks question

Answer Type

In a fill in the blanks text, you insert one or more blank spaces in which quiz takers must enter an answer to complete the text. There are three possible ways of creating a fill in the blanks text (see the web preview of the question below):

- *Drop-down Answer Lists*

If you select the "Drop-down answer lists" option, quiz takers must choose from answers in in drop-down lists that make up the blanks in the text.

- *Answer Fields*

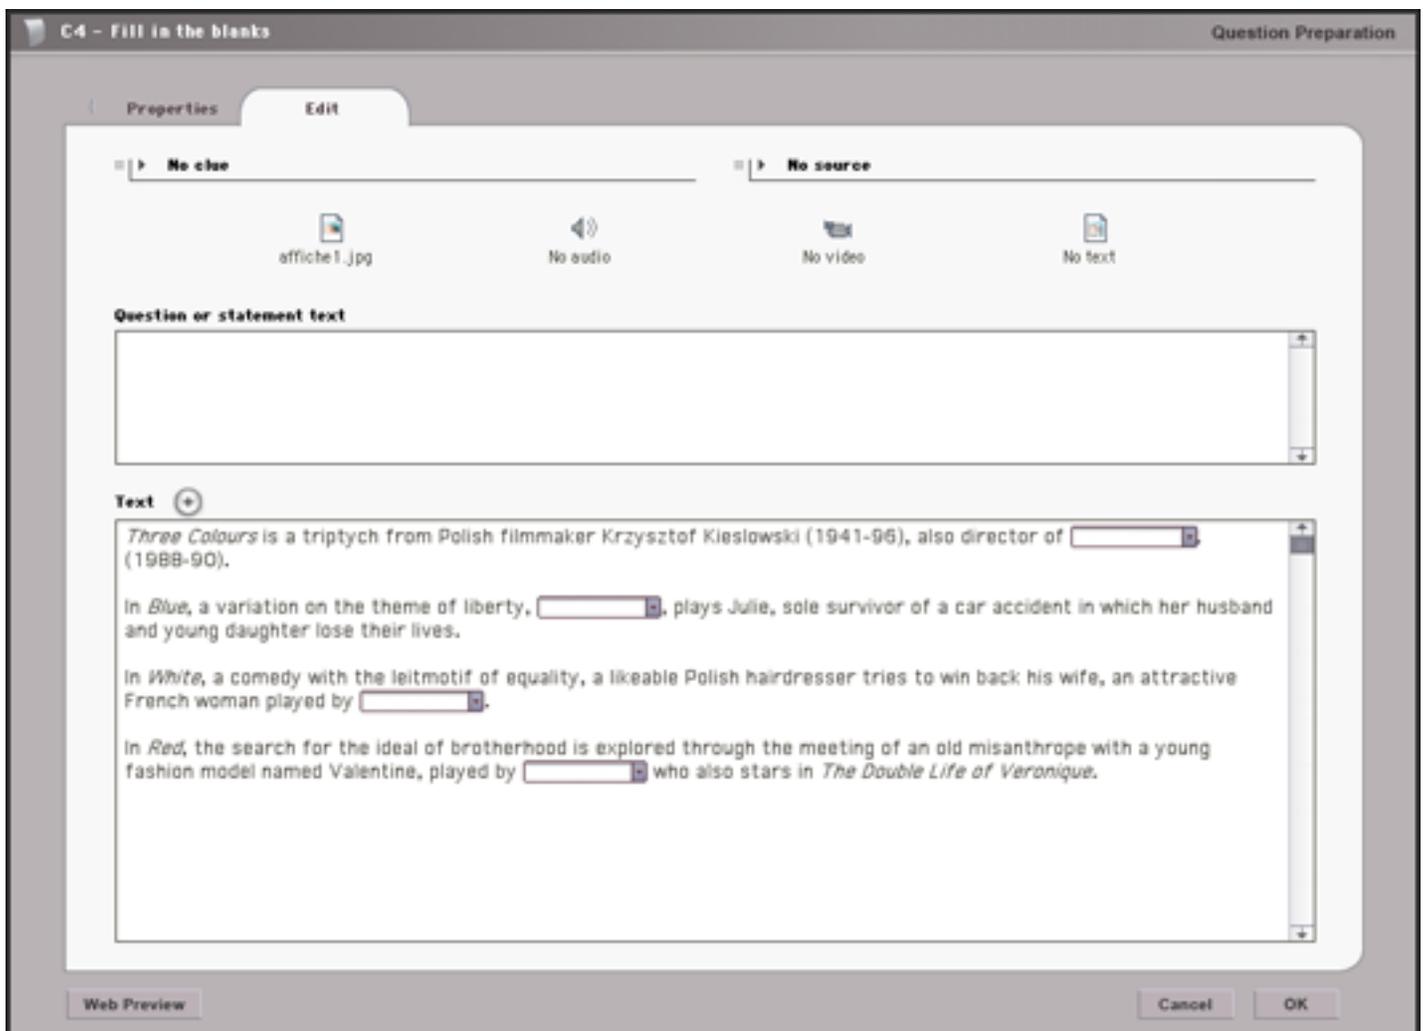

If you check the "Answer fields" option, by default the quiz takers must write their answers in the small answer fields of each blank. You can also choose medium or large answer fields.

- *Drag and Drop Answers*

If you select "Answer fields" and "Drag and drop answers" options, quiz takers must drag and drop answers to the appropriate blanks.

The Edit Tab

Beneath the "Question or statement text" field, the "Edit" tab displays a "Text" field where text can be entered. A "+" button lets you create blanks from selected words within the text.

Edit tab for a fill in the blanks question

Text Field

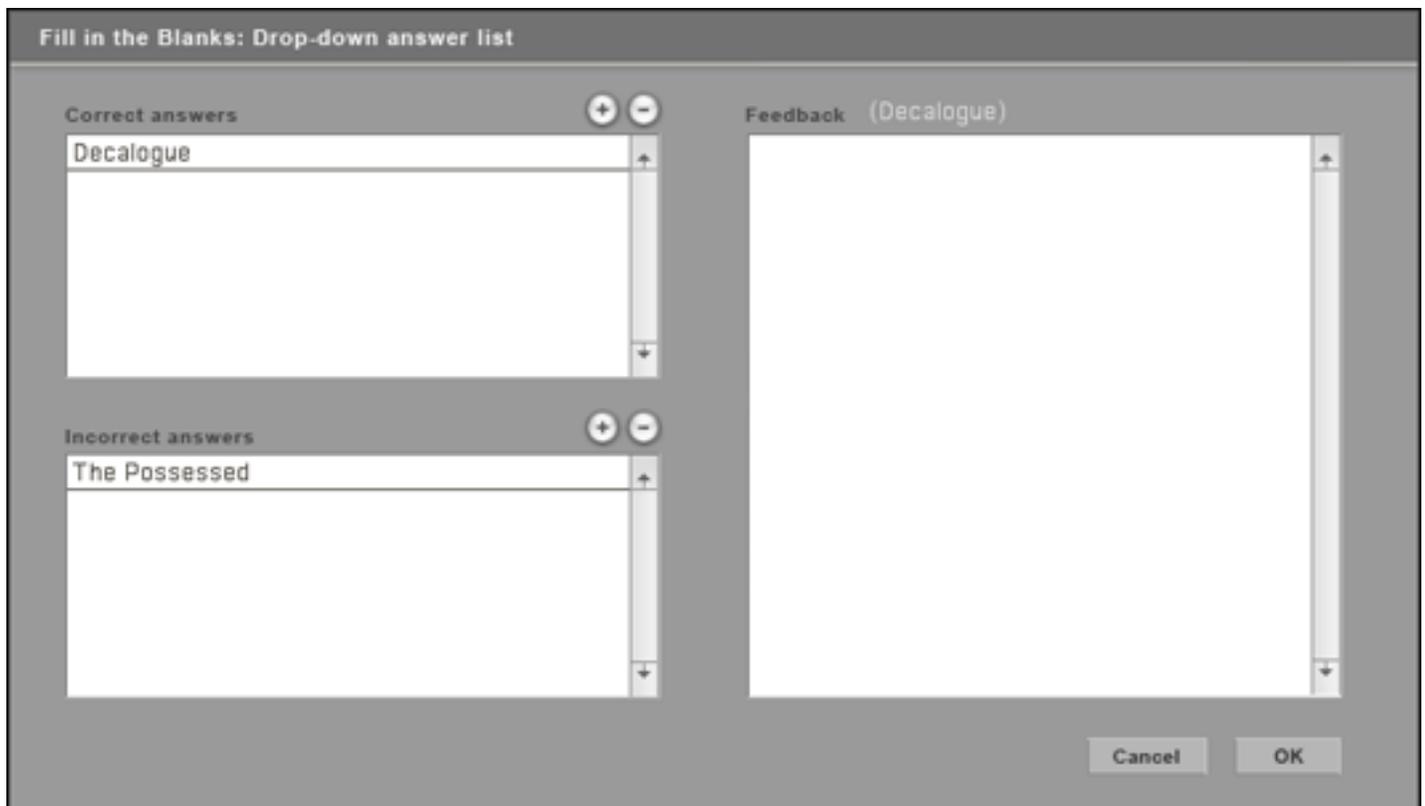

The "Text" field is used to enter the complete fill in the blanks text. Any characters with an ASCII code higher than 255 will not be accepted. Moreover, you should avoid the following special characters: ', ", <, > because they have a specific meaning for web pages. This text field accepts changes in style. Refer to "The Edit Menu" section in [Menu Bar](#) to see how you can change a style or add web hyperlinks and images to this field.

"+" Button

The "+" button above the text field lets you insert a blank to replace selected words. As soon as you add a blank, an input window appears.

- *Drop-down Answer List Dialogue Box*

This dialogue box contains the following three zones: "Correct Answers", "Incorrect Answers" and "Feedback". All answers written in the first two zones will make up the drop-down answer list (in random order) for that blank. To insert an answer, click on the "+" button; a line will be added to the zone with a default text ("Correct answer #" or "Incorrect answer #"). Click the default text to enter the text of your choice. To delete an answer, select it and click on the "-" button. You will notice that each time you enter an answer in the answer zones, it also appears in brackets next to "Feedback". You can also enter the feedback that relevant to that answer.

Dialogue box for a blank with drop-down answer list

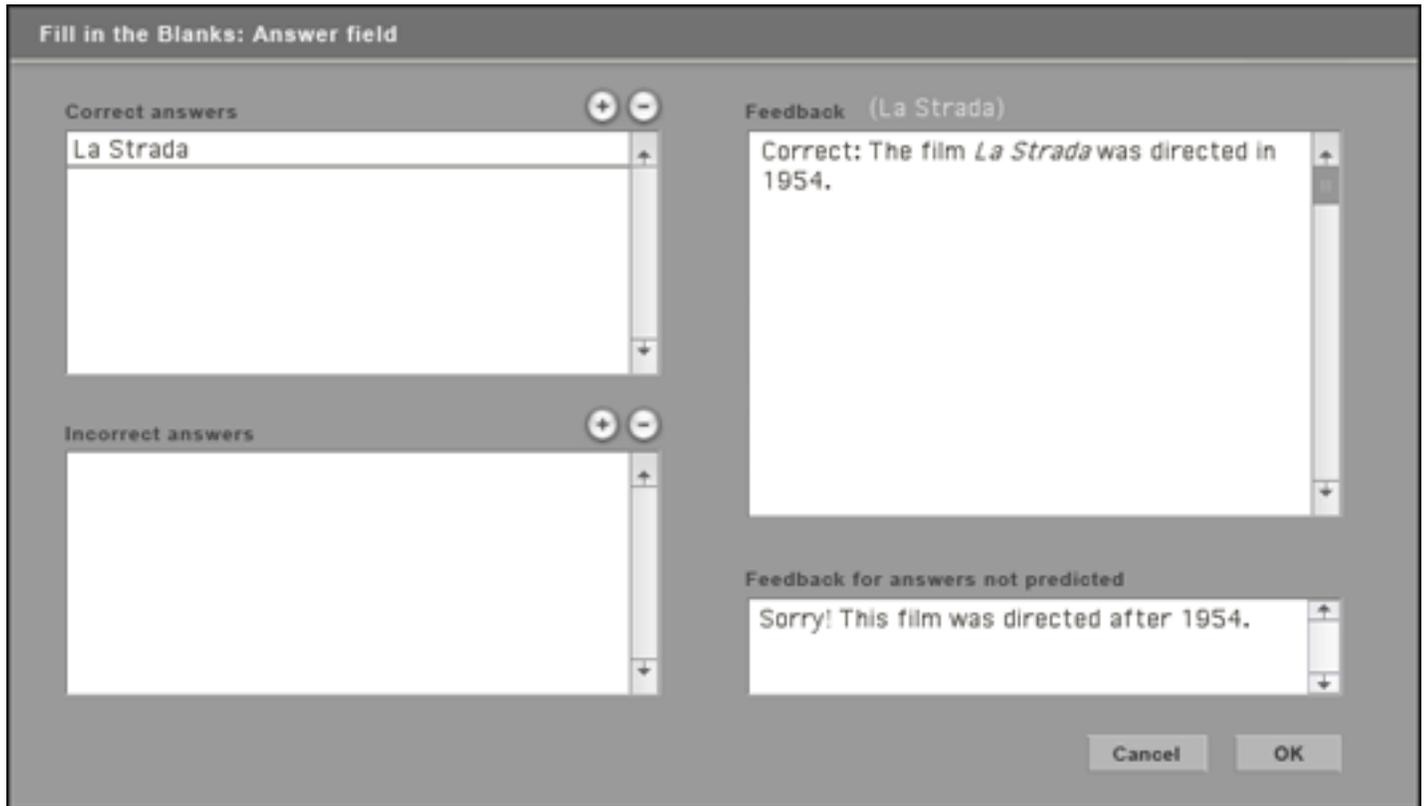

- *Answer Fields Dialogue Box*

The dialogue box for a standard blank (answer field) resembles the one for drop-down answer lists. However, a zone titled "Feedback for unpredicted answers" is now available. Since quiz-takers write their own answers, they cannot always correspond to a correct or incorrect answer. The "Feedback for unpredicted answers" will be displayed when the "Submit" button is clicked. This field contains "Unknown error" by default, but this can be replaced by a term of your

choice.

- *Drag and Drop Answer Dialogue Box*

The dialogue box for a drag and drop answers is the same as for the standard answer field.

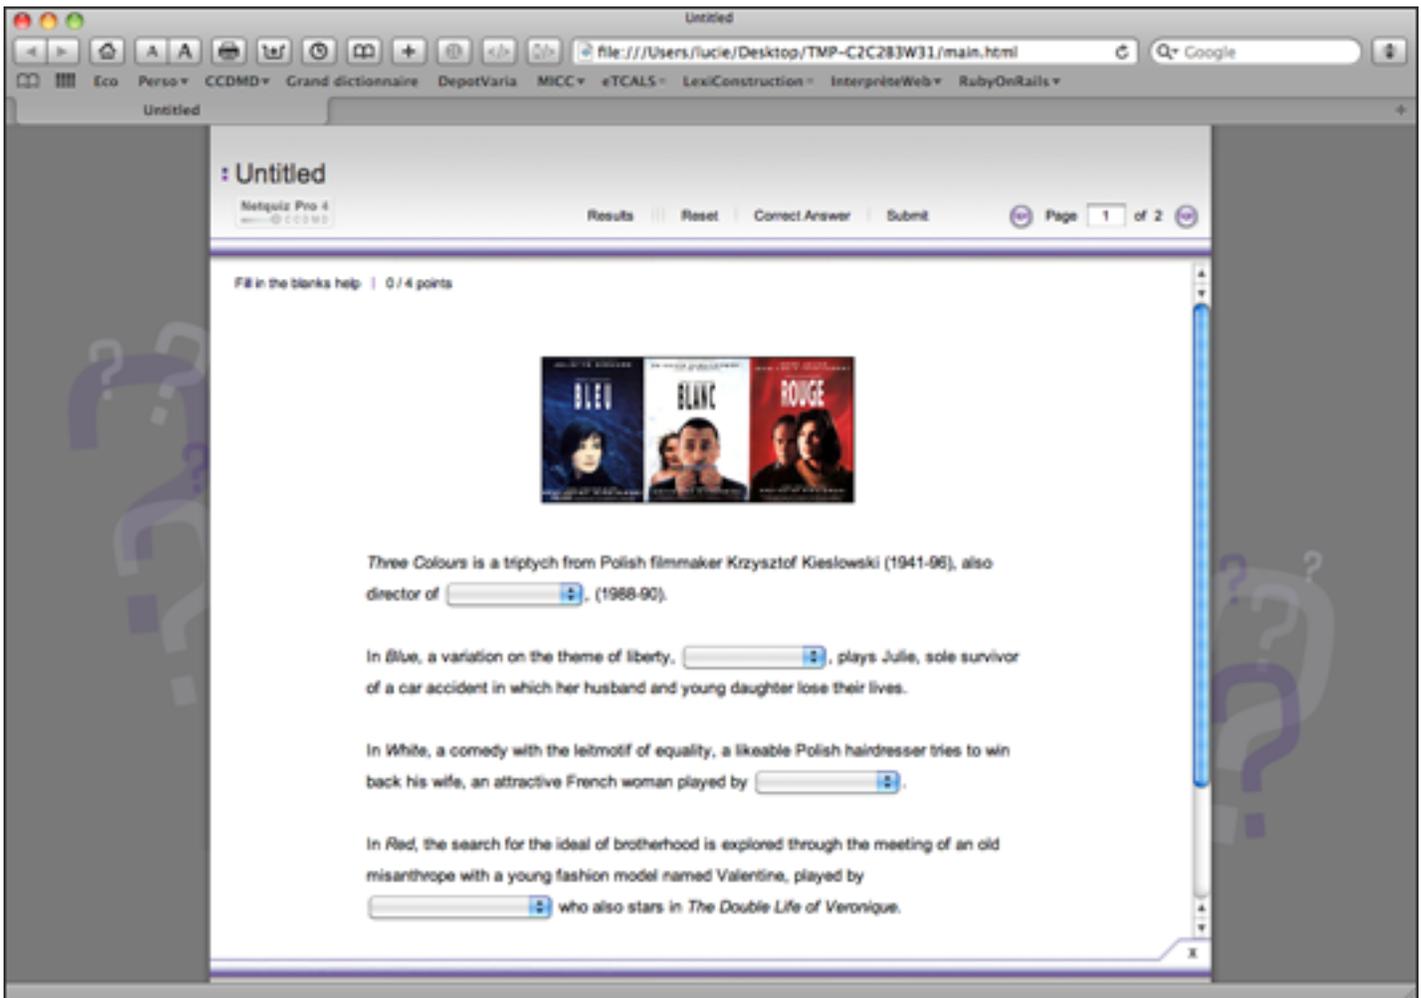

Dialogue box for a standard fill in the blank answer field, or drag and drop answer list

The Web Preview

Below are examples of the web preview of a fill in the blanks question. The first shows a fill in the blanks text with drop-down answer lists. The second shows a fill in the blanks question with a large answer fields. The third shows a fill in the blanks question with a list of drag and drop answers.

N.B. If you ask for web previews repeatedly, you may have to refresh the web page or empty your browser's cache in order to display the most recent changes.

The screenshot shows a web browser window with the address bar displaying a local file path. The browser's menu bar includes options like 'Eco', 'Perso', 'CCDMD', 'Grand dictionnaire', 'DepotVaria', 'MICC', 'eTCALS', 'LexiConstruction', 'InterpréWeb', and 'RubyOnRails'. The page title is ': Untitled' and the browser's address bar shows 'file:///Users/lucie/Desktop/TMP-C2C283W31/main.html'. The page content is a quiz titled 'Fill in the blanks help | 0 / 4 points'. It features three movie posters for 'Bleu', 'Blanc', and 'Rouge'. Below the posters, there are four paragraphs of text, each with a drop-down menu for a missing name. The first paragraph asks for the director of the 1988-90 film 'Three Colours'. The second paragraph asks for the name of the actress who plays Julie in 'Blue'. The third paragraph asks for the name of the French woman played by in 'White'. The fourth paragraph asks for the name of the young fashion model named Valentine in 'Red'.

Submit

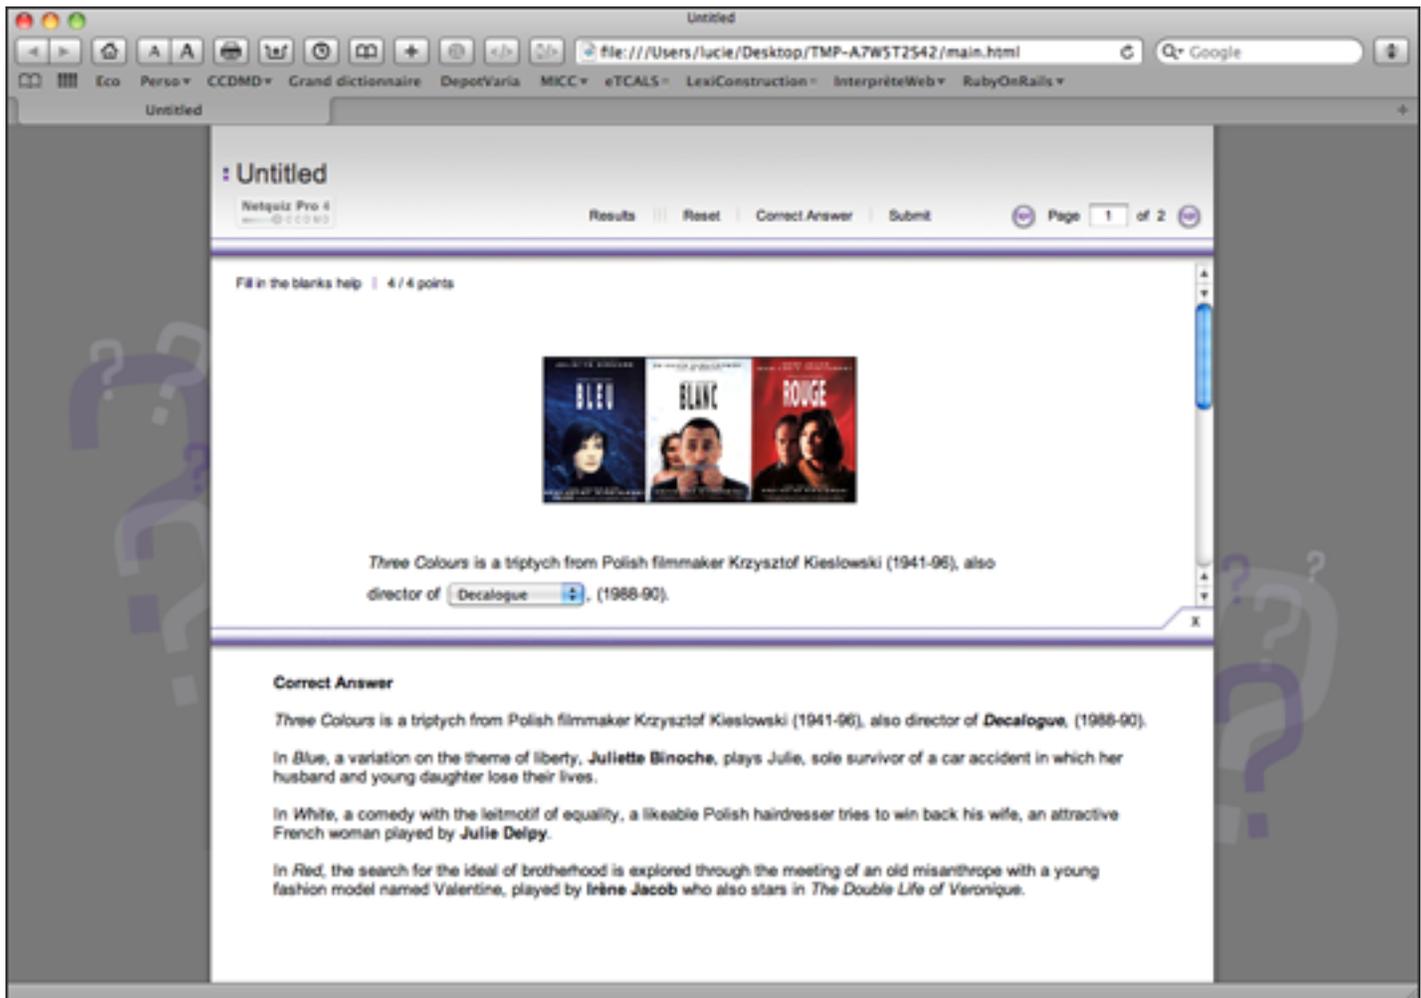

When the quiz taker clicks on the "Submit" button, the question is registered; a "Correct Answer" message is presented in green or an "Incorrect Answer" message is presented in red. Green and red dots indicate whether or not answers are correct. Appropriate feedback is provided, if any has been input for the question.

Display of the feedback for a fill in the blanks question

Correct Answer

When the quiz taker clicks the "Correct Answer" button, the correct answer is displayed as follows: the words "Correct Answer" followed by the complete corrected text with answers in bold characters.

The screenshot shows a web browser window with the address bar displaying 'file:///Users/lucie/Desktop/TMP-A7W5T2542/main.html'. The browser's menu bar includes 'Eco', 'Perso', 'CCDM', 'Grand dictionnaire', 'DepotVaria', 'MCC', 'eTCALS', 'LexiConstruction', 'InterprèteWeb', and 'RubyOnRails'. The page title is 'Untitled'. The application interface includes a 'Results' section with 'Reset', 'Correct Answer', and 'Submit' buttons, and a 'Page 1 of 2' indicator. The main content area is titled 'Fill in the blanks help | 4 / 4 points' and features three movie posters for 'Bleu', 'Blanc', and 'Rouge'. Below the posters, a text prompt reads: 'Three Colours is a triptych from Polish filmmaker Krzysztof Kieslowski (1941-96), also director of (1988-90)'. The 'Correct Answer' section provides detailed information: 'Three Colours is a triptych from Polish filmmaker Krzysztof Kieslowski (1941-96), also director of **Decalogue**, (1988-90). In *Blue*, a variation on the theme of liberty, **Juliette Binoche**, plays Julie, sole survivor of a car accident in which her husband and young daughter lose their lives. In *White*, a comedy with the leitmotif of equality, a likeable Polish hairdresser tries to win back his wife, an attractive French woman played by **Julie Delpy**. In *Red*, the search for the ideal of brotherhood is explored through the meeting of an old misanthrope with a young fashion model named Valentine, played by **In ne Jacob** who also stars in *The Double Life of Veronique*.'

Answer revealed for a fill in the blanks question

TRUE/FALSE QUESTIONS

In true/false questions, quiz takers answer a question through a simple dichotomic choice. Apart from the properties and editing zones common to all types of questions (see [Questions and Sections](#)), true/false questions have the following characteristics:

The Properties Tab

Under the second horizontal line in the lower part of the window, the "Properties" tab displays several parameters that let you customize a true/false question.

The screenshot shows the 'Properties' tab for a true/false question. The window title is 'C7 - True/False' and the subtitle is 'Question Preparation'. The 'Properties' tab is active, showing several fields and options:

- Question title:** That Obscure Object of Desire
- Weighting:** 1.0
- Note:** Section 1
- Quizzes containing this element:** Cinequiz
- Web parameters (Note: These parameters can be applied to all questions in the Web Quiz Preparation window under the Properties tab):**
 - User controls media
 - Automatically start AUDIO in the question
 - Automatically start VIDEO in the question
 - Display the Correct Answer button
- Order style:** Alphabetical
- Answer order:**
 - Random
 - Predetermined

At the bottom of the window, there are three buttons: 'Web Preview', 'Cancel', and 'OK'.

Properties tab for a true/false question

Order Style

In the "Order Style" drop-down menu, you can choose between "Alphabetical" and "Numerical". The end result will be a letter or a number before each item to be put in order.

Answer Order

By default, the order of the answer choices is random in the web version of the question. If you want to specify a predetermined order, click "Predetermined" and place the alphabetical or numerical labels in the box in the desired order.

The Edit Tab

Under the "Question or statement text" in the lower part of the window, the "Edit" tab displays a column in which you can write the answer as well as two columns for indicating the content and respective feedback of the answer choices.

The screenshot shows a software window titled "C7 - True/False" with a "Question Preparation" subtitle. It features two tabs: "Properties" and "Edit", with "Edit" being the active tab. At the top, there are two fields: "No clue" and "No source". Below these are four icons: a file icon labeled "busuel.jpg", a speaker icon labeled "No audio", a video camera icon labeled "No video", and a document icon labeled "No text".

The main section is titled "Question or statement text" and contains a text box with the following text: "Luis Buñuel gave the role of Conchita to two actresses who alternate playing the part in the film." Below this text box are three columns: "Answer", "Choices", and "Feedback".

Answer	Choices	Feedback
A <input checked="" type="radio"/>	True	The part of Conchita is played by both Carole Bouquet and Angela Molina.
B <input type="radio"/>	False	

At the bottom of the window, there are three buttons: "Web Preview", "Cancel", and "OK".

Edit tab for a true/false question

Answer Column

The "Answer" column contains radio buttons. You must indicate the correct answer by clicking the appropriate button.

Choices Column

The "Choices" column contains, by default, the terms "True" and "False", which you can replace with other terms. Any characters with an ASCII code higher than 255 will not be accepted. Moreover, you

should avoid the following special characters: ', ", <, > because they have a specific meaning for web pages. This text field accepts changes in style. Refer to "The Edit Menu" section in [Menu Bar](#) to see how you can change a style or add web links and images in this field.

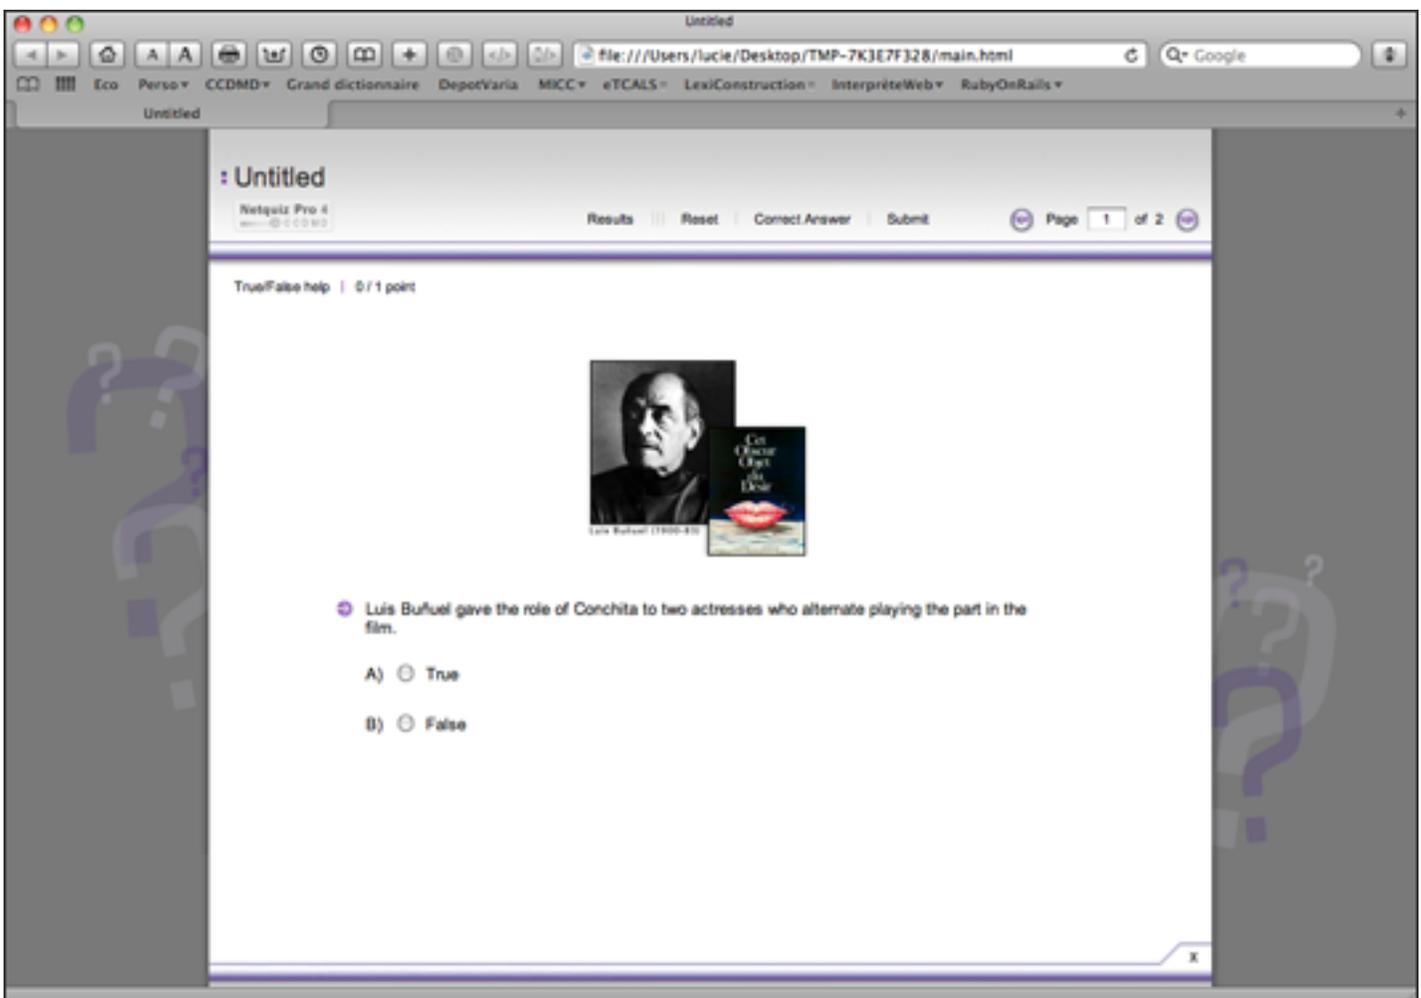

Feedback Column

The "Feedback" column is used to enter an explanation or pertinent feedback other than "Correct Answer" or "Incorrect Answer" since either one of these is automatically given to the user when an answer is checked, whether or not other feedback exists. This text field accepts changes in style. Refer to "The Edit Menu" section in [Menu Bar](#) to see how you can change a style or add web links and images in this field.

The Web Preview

Below is an example of the web preview of a true/false question.

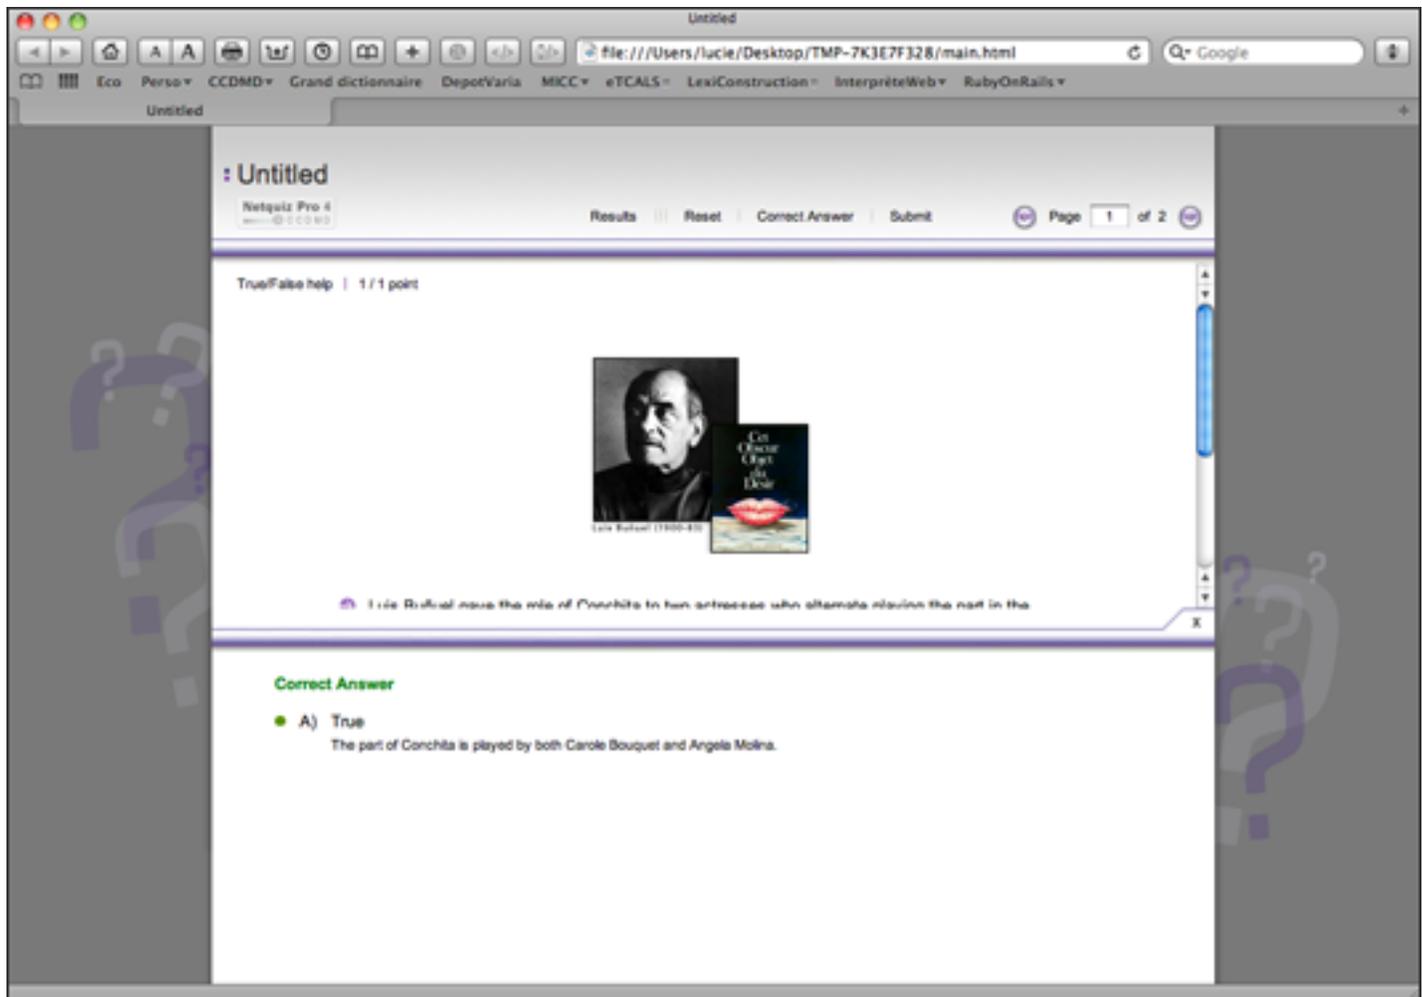

N.B. If you create web previews repeatedly, you may have to refresh the web page or empty your browser's cache in order to display the most recent changes.

Web preview of a true/false question

Submit

When a quiz taker clicks on the "Submit" button, he or she sees, at the bottom of the screen page, "Correct Answer" in green or "Incorrect Answer" in red. A green dot or red square indicates whether or not the answer is correct, and a reminder of the contents of the answer chosen by the quiz taker is displayed as well as feedback, if any has been entered for this choice of answer.

Display of the answer verification for a true/false question

Correct Answer

When the quiz taker clicks on the "Correct Answer" button, the correct answer is displayed as follows: the words "Correct Answer" followed by the correct answer.

The screenshot shows a web browser window with the address bar displaying 'file:///Users/lucie/Desktop/TMP-7K3E7F328/main.html'. The browser's menu bar includes 'Eco', 'Perso', 'CCDMD', 'Grand dictionnaire', 'DepotVaria', 'MCC', 'eTCALS', 'LexiConstruction', 'InterpreteWeb', and 'RubyOnRails'. The main content area is titled ': Untitled' and features a 'Netquiz Pro 4' logo. Navigation buttons for 'Results', 'Reset', 'Correct Answer', and 'Submit' are visible, along with a 'Page 1 of 2' indicator. The question is a true/false type, worth 0/1 point, and includes a portrait of a man and a book cover. The correct answer is revealed as 'A) True'.

The answer revealed for a true/false question

IDENTIFY PARTS OF AN IMAGE QUESTIONS

In identify parts of an image questions, quiz takers identify parts of an image by dragging and dropping answer tags to them. Apart from the properties and editing zones common to all types of questions (see [Questions and Sections](#)), identify parts of an image questions have the following characteristics:

The Properties Tab

Under the second horizontal line in the lower part of the window, the "Properties" tab displays several parameters that let you customize the identify parts of an image question.

The screenshot shows the 'Properties' tab of a 'Question Preparation' window. The window title is 'C12 - Identify parts of an image'. The 'Properties' tab is active, showing various configuration options. The 'Question title' is 'Directors and trailers' and 'Weighting' is '1.0'. The 'Note' is 'Section 2'. The 'Quizzes containing this element' is 'Cinequiz'. Under 'Web parameters', 'User controls media' is checked, and 'Display the Correct Answer button' is also checked. 'Number of parts to identify' is '6', 'Tag type' is 'Text', and 'Order style' is 'Alphabetical'. 'Outline colour for drop-zones' is 'Black'. 'Answer order' is 'Random', with a sequence of 'A B C D E F' shown in a field.

Properties tab for identify parts of an image question

Number of Parts to Identify

An identify parts of an image question, you can select "2" to "99" answer tags. You can modify the minimum number of tags, "2", which appears in the "Number of parts to identify" field by default. Please note, however, that a large number of parts can be difficult for the web browser to process.

Tag Type

In the "Tag type" drop-down menu, you can choose between "Text" and "Image", depending on what form you want the answers to be.

Order Style

In the "Order style" drop-down menu, you can choose between "Alphabetical" and "Numerical". The end result will be a letter or number placed before each part to identify.

Answer Order

By default, the answer order of the parts to identify question is random in the web browser. If you want to specify a predetermined order, click "Predetermined" and choose the order of the alphabetical or numerical tags located in the box to the right of the "Predetermined" option.

The Edit Tab

Under the "Question or statement text" in the lower part of the window, the "Edit" tab displays an image button. This should be clicked first to open the "Media" dialogue box and load the main image. Once the image is loaded, the answer tags below it can be dragged and dropped appropriately onto the image.

Edit tab for an identify parts of an image question

Below the main image are three columns in which you can enter the content for answer tags and the respective positive and negative feedback for the parts to identify.

Answer Tags

The "Answer tags" column can contain text or images according to the choice made for the "Tag type" in the "Properties" tab.

If the tags represent text answers, you need only write the text for potential answers. Any characters with an ASCII code higher than 255 will not be accepted. Moreover, you should avoid the following special characters: ', ", <, > because they have a specific meaning for web pages. This text field accepts changes in style. You can change a style or add web links and images to this zone with "The Edit Menu" menu (see [Menu Bar](#)).

If the tags represent image answers, you need only click in the rectangle to display The "MEDIA" dialogue box that will allow you to choose an image from the list of media imported to the question bank's "MEDIA" folder. If the image you want is not on the list, you can add it by clicking the "+" button. A dialogue box will appear so you can browse for the image on your computer and import it. The "MEDIA" dialogue box opens whether you insert an image, audio or video at the heading of a question (see [Questions and Sections](#)) or on a quiz's home page (see [Home Page](#))

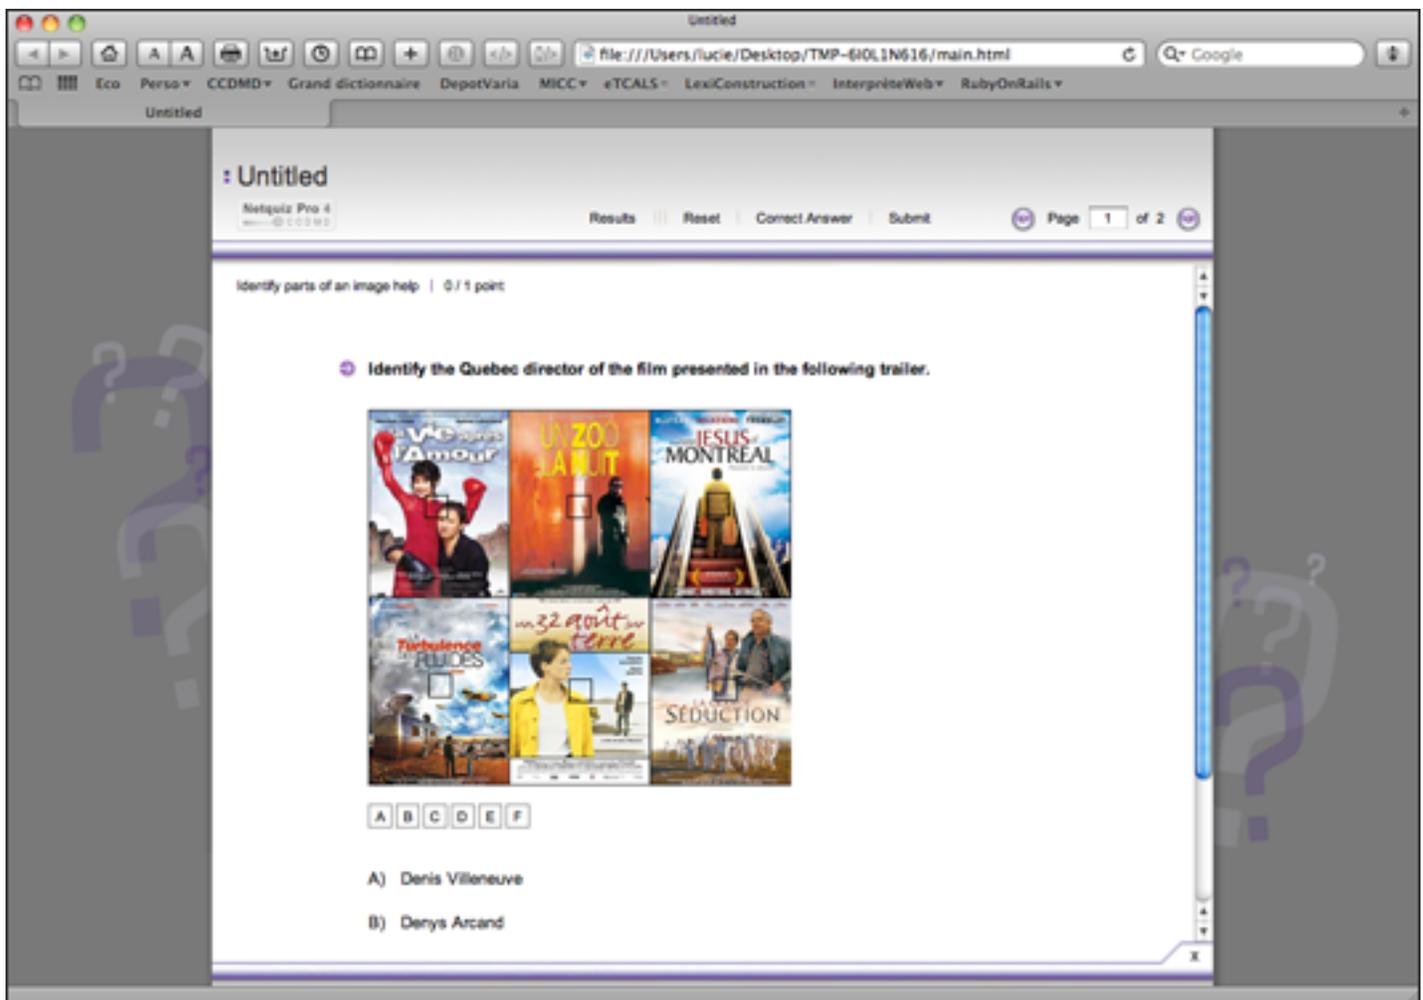

Positive and Negative Feedback Columns

The "Positive" and "Negative feedback" columns are used to enter an explanation or pertinent feedback other than "Correct Answer" or "Incorrect Answer" which are automatically given to the user when an answer is checked. This text field accepts changes in style. You can change a style or add web links and images to this zone with "The Edit Menu" (see [Menu Bar](#)).

The Web Preview

Below is an example of the web preview of an identify parts of an image question.

N.B. If you ask for web previews repeatedly, you may have to refresh the web page or empty your browser's cache in order to display the most recent changes.

Web preview for an identify parts of an image question

Submit

When a quiz taker clicks on the "Submit" button, he or she sees "Correct Answer" in green or "Incorrect Answer" in red at the bottom of the screen page. Then a green dot or red square indicates whether or not the tag is placed in the right part of the image; a reminder of the contents of the part is displayed,

as well as positive or negative feedback (if any has been entered).

The screenshot shows a web browser window displaying a quiz interface. The browser's address bar shows a local file path: `file:///Users/lucie/Desktop/TMP-610L1N616/main.html`. The page title is "Untitled". The interface includes a navigation bar with "Results", "Reset", "Correct Answer", and "Submit" buttons, and a page indicator showing "Page 1 of 2".

The main content area displays the question: "Identify parts of an image help | 0.67 / 1 point". Below the question is a sub-question: "Identify the Quebec director of the film presented in the following trailer." Three movie posters are shown with letter tags: "Le Vie après l'Amour" (tag E), "Un Zou Lanlit" (tag F), and "JESUS MONTREAL" (tag B).

The feedback section, titled "Incorrect Answer", lists five options with their status and correct answers:

- A) Denis Villeneuve
- B) Denys Arcand
Correct : Denis Arcand directed the film *Jésus de Montréal* (*Jesus of Montreal*) in 1989.
- C) Manon Briand
- D) Jean-François Pouliot
Correct : Jean-François Pouliot directed the film *La grande séduction* (*Seducing Dr. Lewis*) in 2003.
- E) Gabriel Pelletier
Correct : Gabriel Pelletier directed the film *Le Vie après l'amour* in 2000.

Display of the submitted answer and feedback for an identify parts of an image question

Correct Answer

When the quiz taker clicks on the "Correct Answer" button, the correct answer is displayed in the lower half of the screen: the words "Correct Answer" is followed by the image in which the tags are placed in the correct parts.

SECTION PAGES

A "Section page" lets you group questions together in a web quiz. In quizzes that contain sections, the section title appears above all the questions that follow until the next section begins or, otherwise, until the end of the quiz.

The Properties Tab

As you can see below, a section page has no other properties other than those common to all types of elements (see [Questions and Sections](#)).

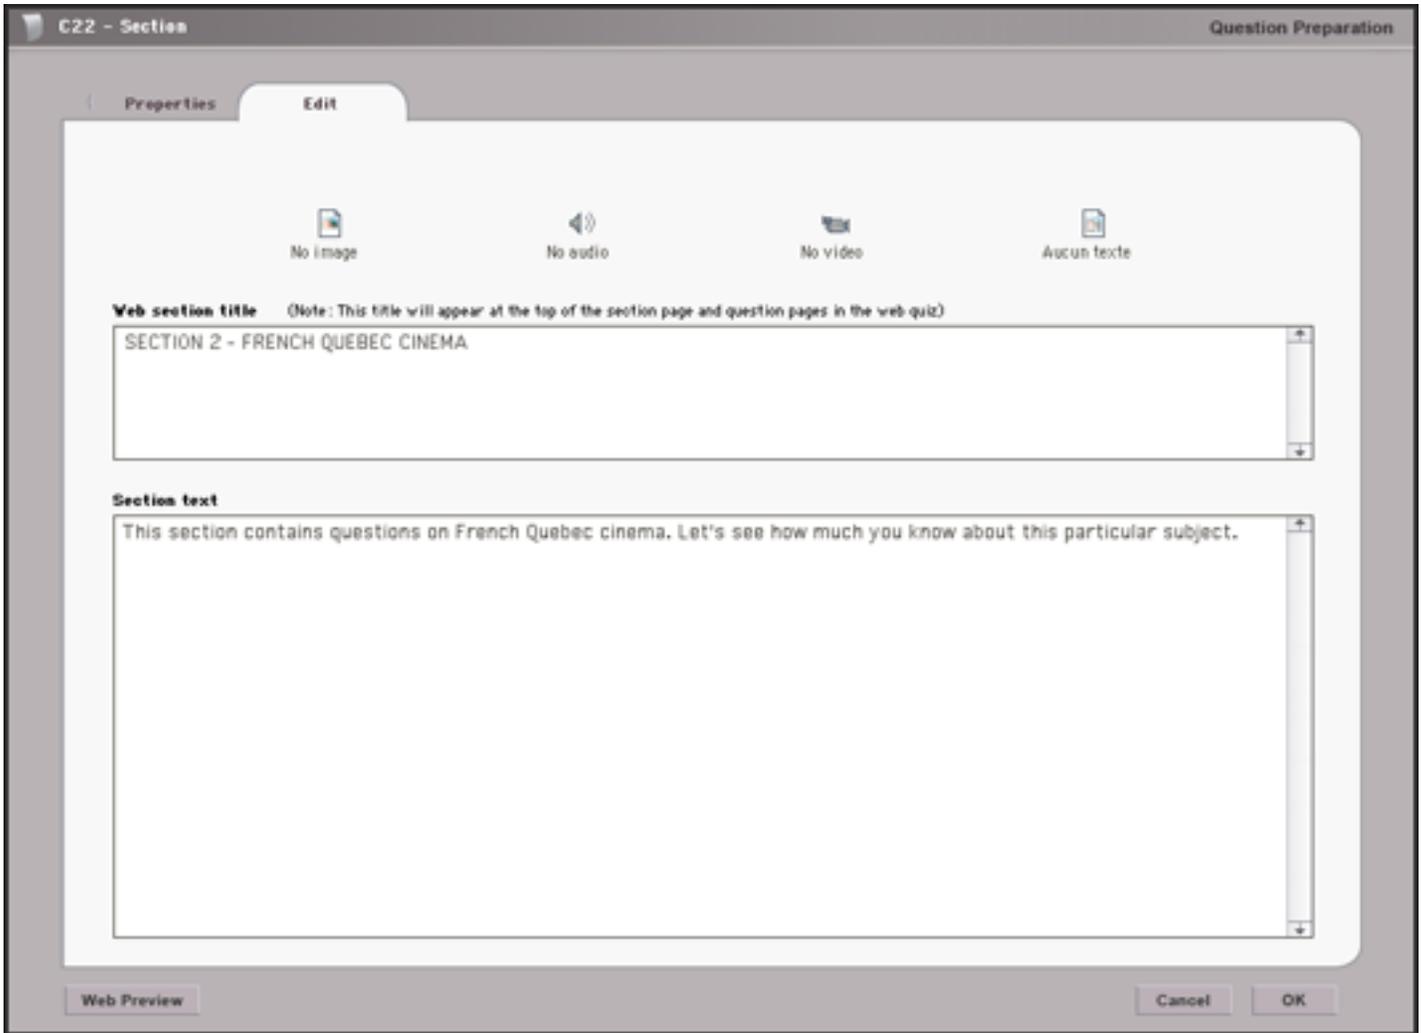

The screenshot shows a 'Question Preparation' window for a section page. The window title is 'C22 - Section'. The 'Properties' tab is selected, and the 'Edit' tab is also visible. The 'Section title' field contains 'French Quebec Cinema section'. The 'Note' field contains 'Section 2'. The 'Quizzes containing this element' field contains 'Cinequiz'. Below these fields are three radio buttons for 'Web parameters': 'User controls media' (selected), 'Automatically start AUDIO in the question', and 'Automatically start VIDEO in the question'. At the bottom of the window are buttons for 'Web Preview', 'Cancel', and 'OK'.

Properties tab for a section page

The Edit Tab

Aside from image, audio, video and text buttons common to all questions, the "Edit" tab for a section page contains the field "Web section title" instead of the question or statement text, as well as the field "Section

text".

Edit tab for a section page

Web Section Title

As its name implies, the "Web section title" field lets you enter the title for that section. This title will be displayed in the upper part of the section page and in the question pages that follow, until the next section begins or, otherwise, until the end of the quiz. Style changes are permitted in this field. Refer to "The Edit Menu" section in [Menu Bar](#) to see how you can change a style or add web links and images in this field. Please note that even though it is possible to insert images in this text field, it is not recommended. Generate a web preview before you decide.

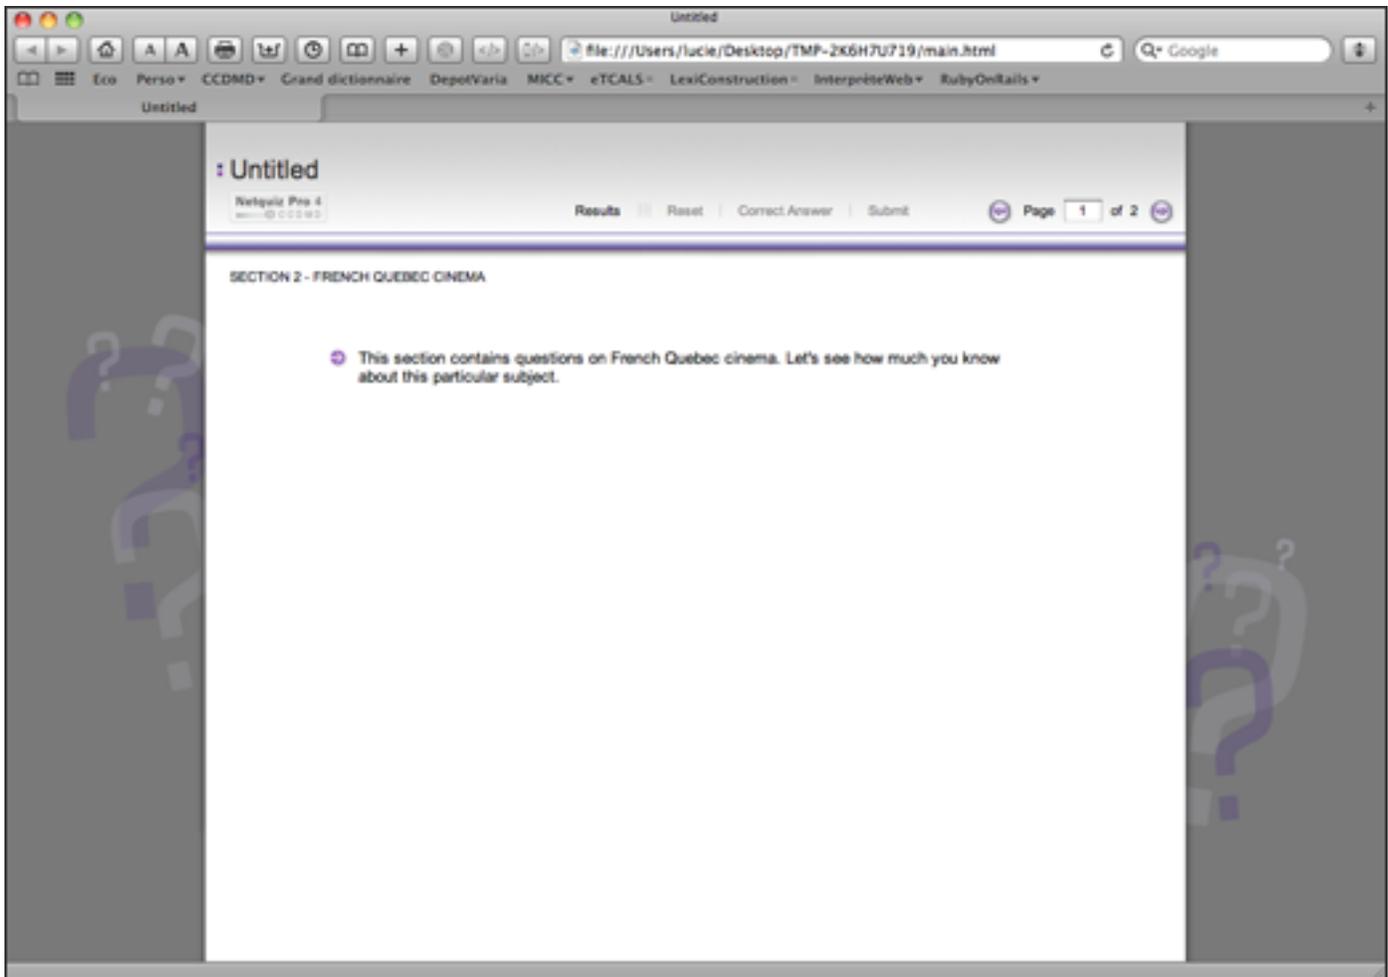

Section Text

The "Section text" field allows you, for example, to introduce or list the questions that will follow, or to provide general guidelines for the questions in this section. Style changes are permitted in this field. Refer to "The Edit Menu" section of [Menu Bar](#) to see how you can change a style or add web links and images in this field.

The Web Preview

Below is an example of a web preview for a section page.

N.B. If you create web previews repeatedly, you may have to refresh the web page or empty your browser's cache in order to display the most recent changes.

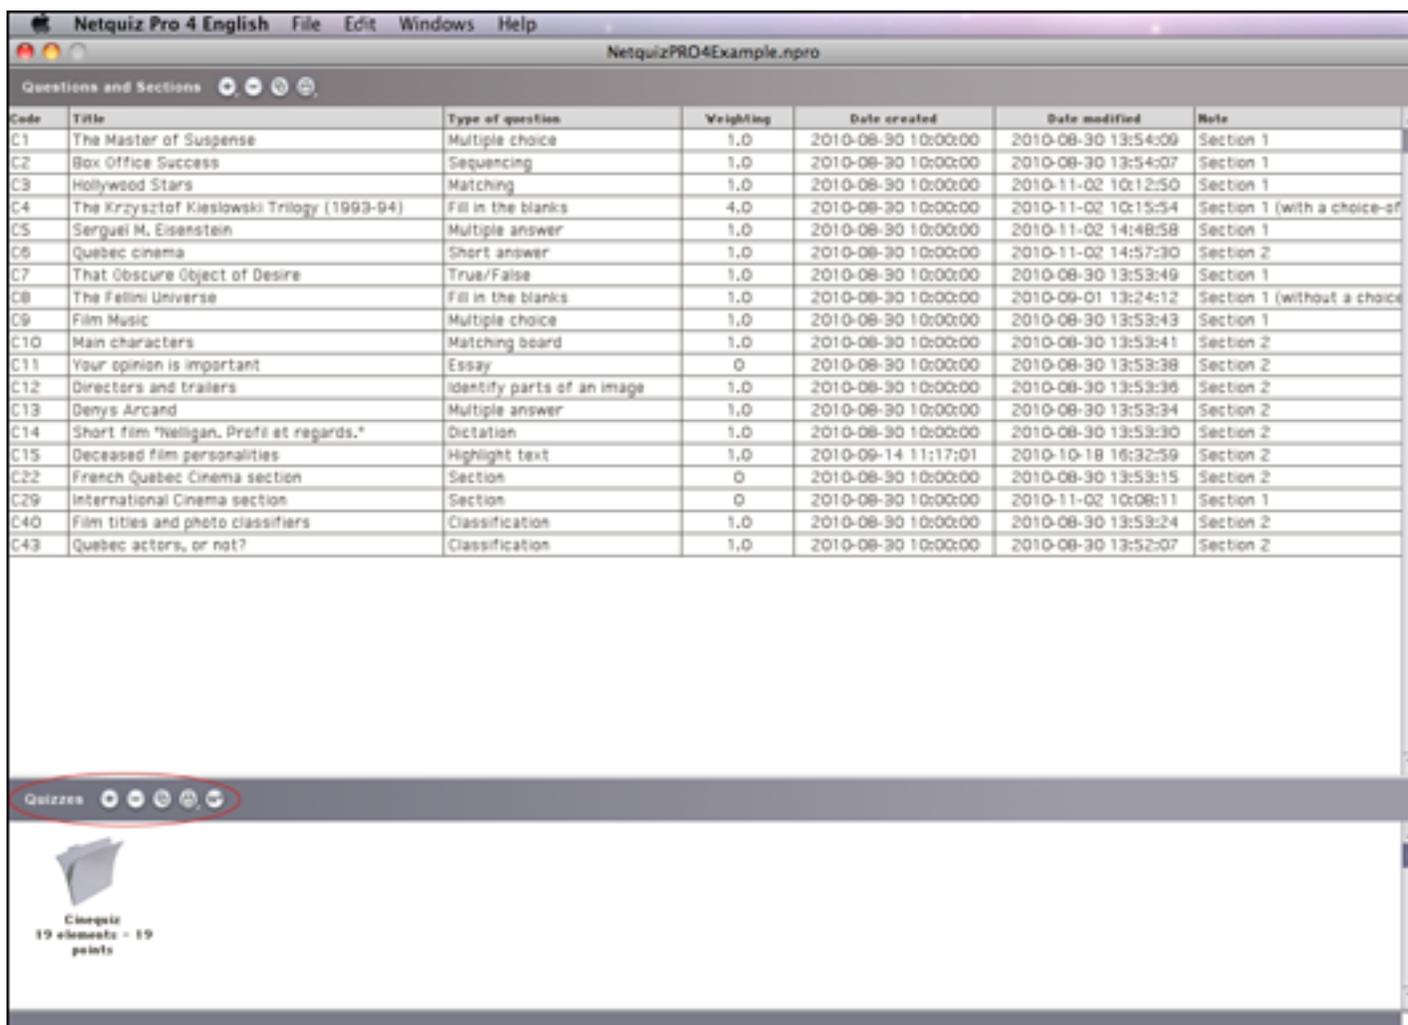

Web preview for a section page

ADDING AND PREPARING QUIZZES

To add, modify, delete, duplicate, print, or create the web version of a quiz, you must be familiar with the functions of the "Quizzes" button bar and quiz folders at the bottom pane of the *Netquiz Pro 4* window.

The Quizzes Button Bar

On the "Quizzes" button bar located at the bottom pane of the main *Netquiz Pro 4* window, you will find the following five buttons:

Five buttons related to quiz preparation

Button (Add a quiz)

The "+" button lets you add a quiz to the quiz bank of the active window. When you click this button, a quiz preparation window appears at the centre of the screen. This window contains the following four tabs: "Home page", "Content", "Properties" and "Display" (for more details, refer to [Home Page](#), [Quiz Content](#), [Quiz Properties](#) and [Display](#)).

Quiz preparation window

When you close this preparation window, a folder appears in the "Quizzes" pane. This folder bears the name you have given it, or, by default, the word "untitled" followed by a number. Under this name you will also find the number of questions in the quiz and the total number of points they are worth (see "The Quizzes Pane" section below).

Button (Delete the selected quiz)

The "-" button lets you delete the selected quiz in the "Quizzes" pane. Because this operation cannot be reversed, you are alerted to confirm the request for deletion.

Duplicate Button

The button representing two superimposed pages lets you duplicate the selected quiz in the "Quizzes" pane. Duplicating a quiz is a quick way of creating a new quiz that has several similar properties to an already existing quiz in the "Quizzes" pane. For example, in a first quiz, if you have adapted or translated the display terms for the web version of the quiz (see [Display](#)) and you wish to build a second quiz with the same features, it will be simpler to duplicate the first quiz and then modify it.

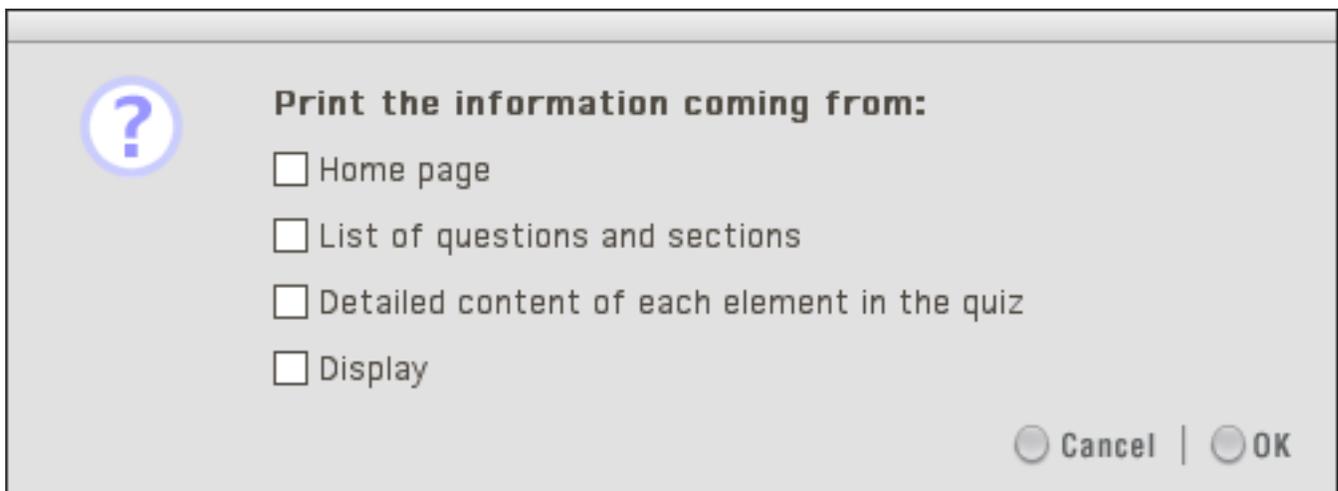

Print Button

The button representing a printer opens a drop-down menu that allows you to:

- Generate a printable version of the quiz
- Generate a printable version of the answer key
- Print Selected Quiz Contents
- Print All Quiz Contents
- Print Quiz List

In the first two cases, *Netquiz Pro 4* generates HTML pages in a layout designed for printing. When the preparation of the printable quiz or answer key is finished, a message will ask you to choose a saving location for the directory in your computer, and then the HTML pages will open in your browser. You will then need only to select the "Print" command in the browser "File" menu, or open the "main.html" file from Word, in order to modify the layout according to your requirements.

When printing selected contents, a dialogue box will ask you to specify the information that you wish to print: the information on the home page, the list of elements in the quiz, the detailed content of each question, or the information in Display.

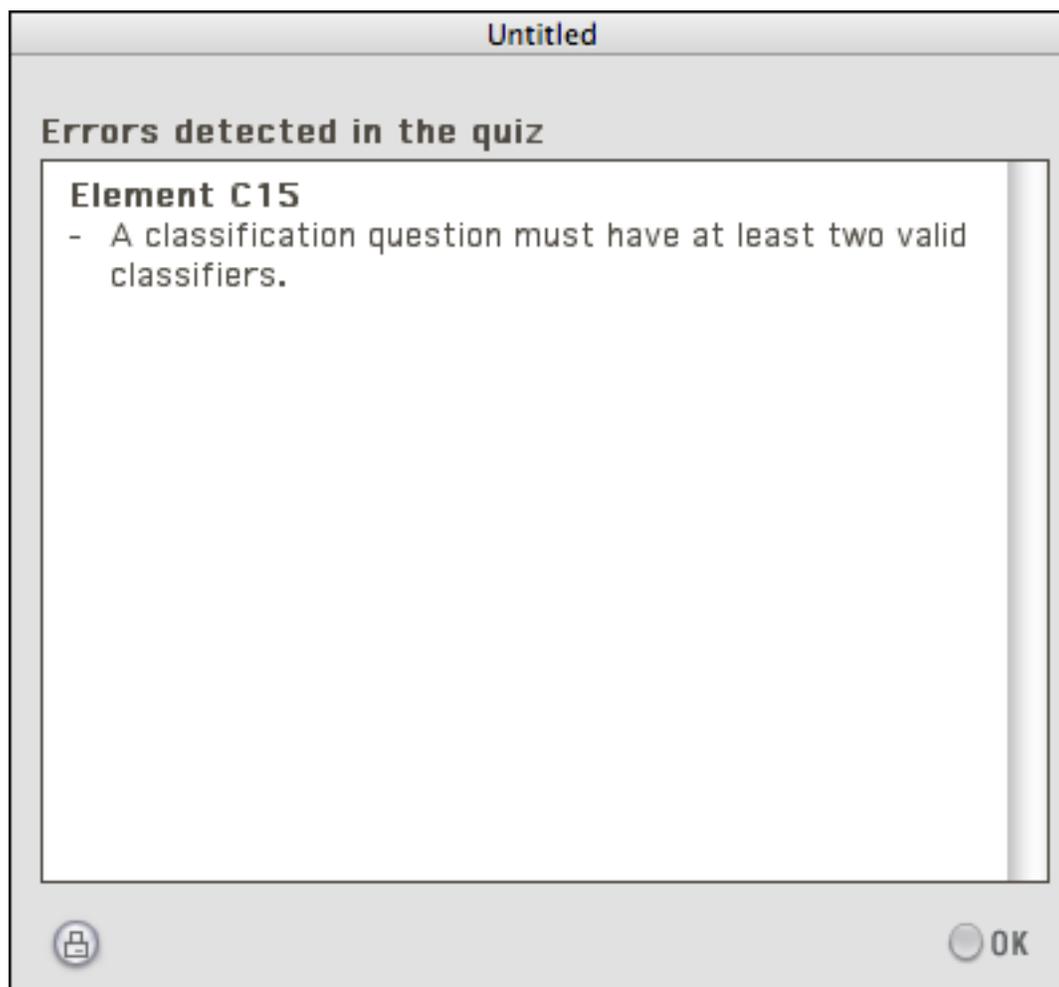

Dialogue box for printing detailed content of quizzes

Button

Generate the web version of a quiz with the "W->" button. When you select a quiz folder and click this button, *Netquiz Pro 4* verifies the questions first. If errors are detected, a window will appear listing invalid questions and the reasons they are invalid. You can print this list to help you correct the errors.

Window showing the list of invalid questions and respective explanations

If all the questions are valid, you will be prompted to choose where you want to save the quiz's web directory on your hard drive . By default, the web directory' will have the same name of the quiz folder, followed by the word "Web". You can change this name at your convenience. When the preparation of the web version of your quiz is finished, a message will let you know the location of the directory in your computer. A formative web quiz will be created by default. You can check the quiz in your browser by double-clicking on the "index.html" file in this directory.

To learn how to put your quiz on line, refer to [Putting a Quiz Online](#).

The Quizzes Pane

As you create quizzes, they are added to the "Quizzes" pane of the active *Netquiz Pro 4* window.

Quizzes pane of the main *Netquiz Pro 4* window

To select a quiz, click the corresponding folder.

To modify a quiz, double-click on the corresponding folder; the quiz preparation window will appear in the centre of the screen (see [Home Page](#), [Quiz Content](#), [Quiz Properties](#) and [Display](#)).

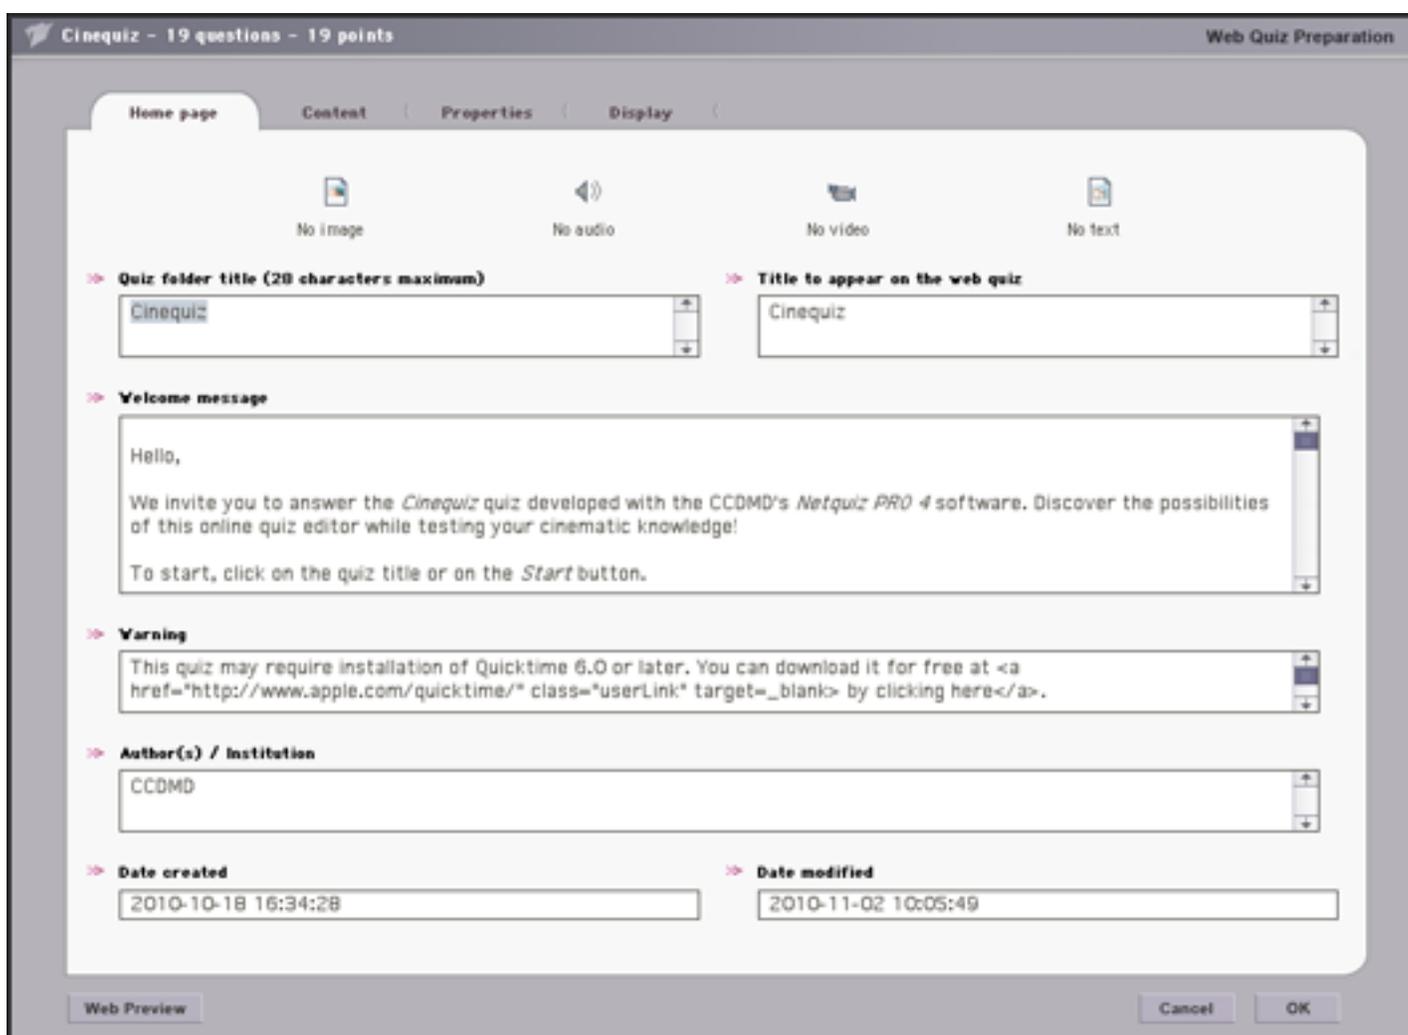

To add questions to a quiz, drag and drop the desired questions from the "Questions and Sections" pane to the appropriate folder.

HOME PAGE

The "Home page" tab of the quiz preparation window lets you customize the page displayed at the beginning of a web quiz.

Editing the Home Page

When you click on the "Home page" tab, the quiz's preparation window displays image, audio, video and text buttons and editable text fields: "Quiz folder title", "Title to appear on web quiz", "Welcome message", "Warning" and "Author(s) / Institution". Two non-editable text fields, "Date of creation" and "Date of modification" are also shown.

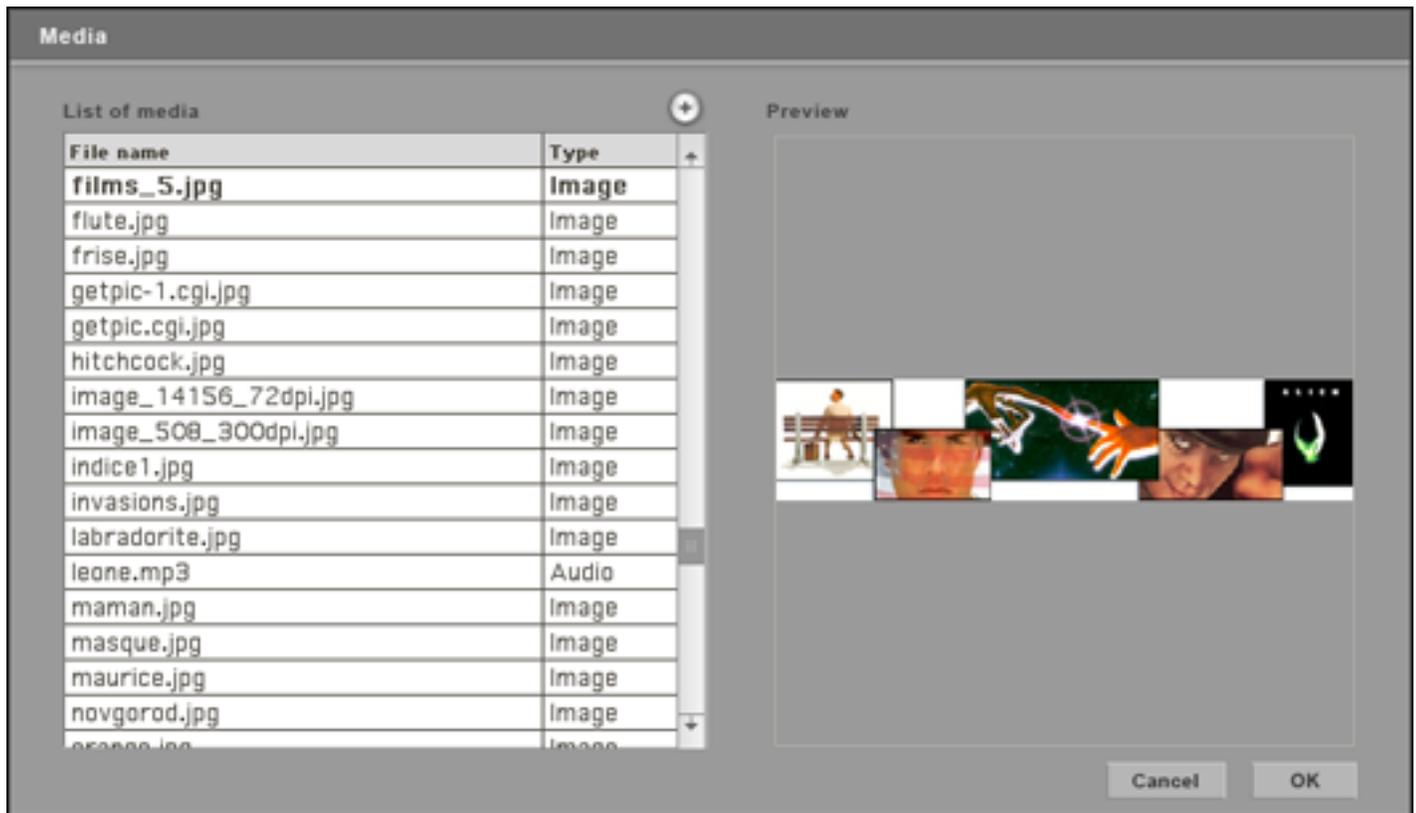

Home page tab for the quiz preparation window

Image, Audio, Video and Text Icons

Four buttons are displayed at the top of the window. The first three are used to insert an image, an audio clip or a video in the "Home" page. In the web version of the quiz's, these media files are displayed in the centre of the page, one below the other in the order shown in "The Web Preview"

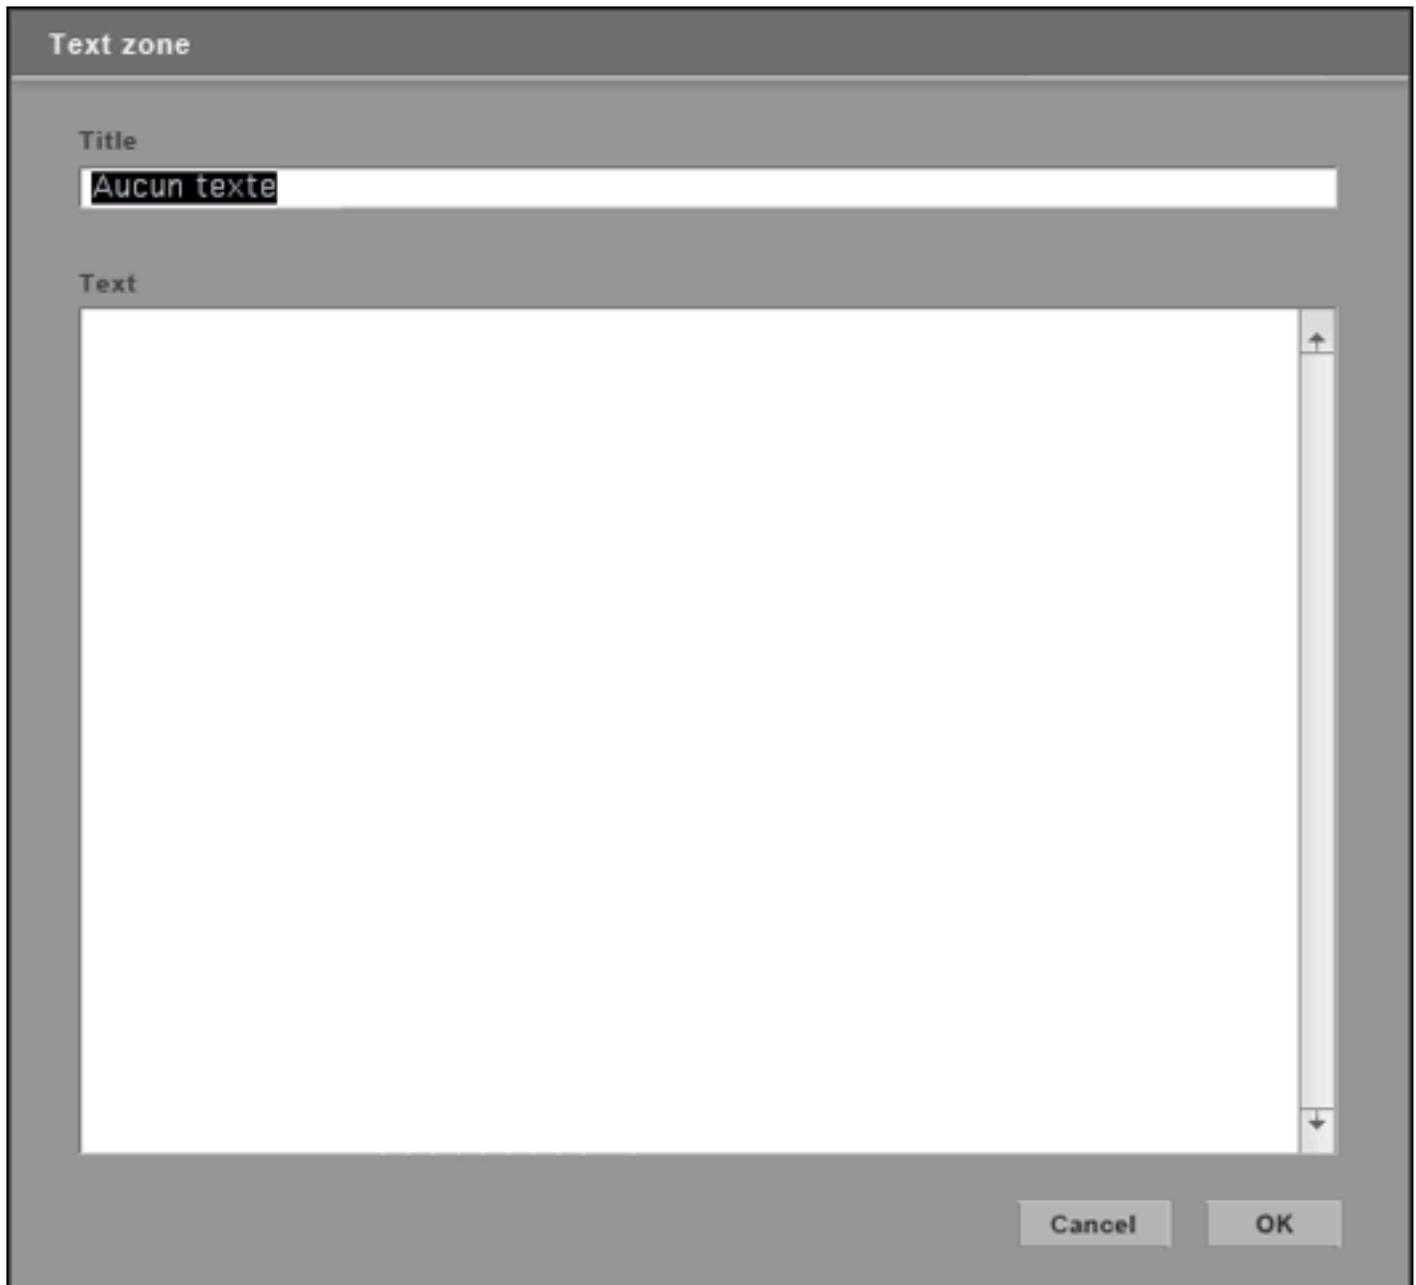

section below.

To insert these media, click the appropriate button and select "Choose" from the drop-down menu. A dialogue box will appear allowing you to select an image, an audio clip or a video from the list of media already imported to the "MEDIA" folder of your question bank. If the image, audio clip or video that you want to insert in the "Home" page does not appear in the list, you can add it by clicking on the "+" button of the "Media" dialogue box. It will allow you to browse the media on your hard drive and import it into the "MEDIA" folder of your question bank.

Media dialogue box to insert an image, audio clip or video clip in the quiz's Home page

To the right of the image, audio and video buttons, the fourth button lets you insert text into the quiz's "Home" page. If you wish to add text to your "Home" page, click this button and a box will appear in which you can enter a title and text.

Dialogue box to insert text in the quiz's Home page

The text fields in this dialog box accept changes in style. Refer to "The Edit Menu" section in Menu Bar for information regarding how to change a text style or add web links and images in this field. In the web version of your quiz, the title and text will appear on the right side of the "Home" page under the horizontal line (see "The Web Preview" below).

Quiz Folder Title

The "Quiz Folder Title" field lets you name the folder that appears in the "Quizzes" pane of the main *Netquiz Pro 4* window. Choose a title that allows easy identification of the quiz in your question bank. The title should be relatively short (28 characters maximum) since it will also be used to name the directory of the Web version of the quiz. Note that this is not the title that will appear on the screen pages of your Web quiz.

Text Fields

The text inserted in the "Title to appear on the web quiz", "Welcome message", "Warning" and "Author(s) / Institution" fields will appear as shown in the Web Preview below:

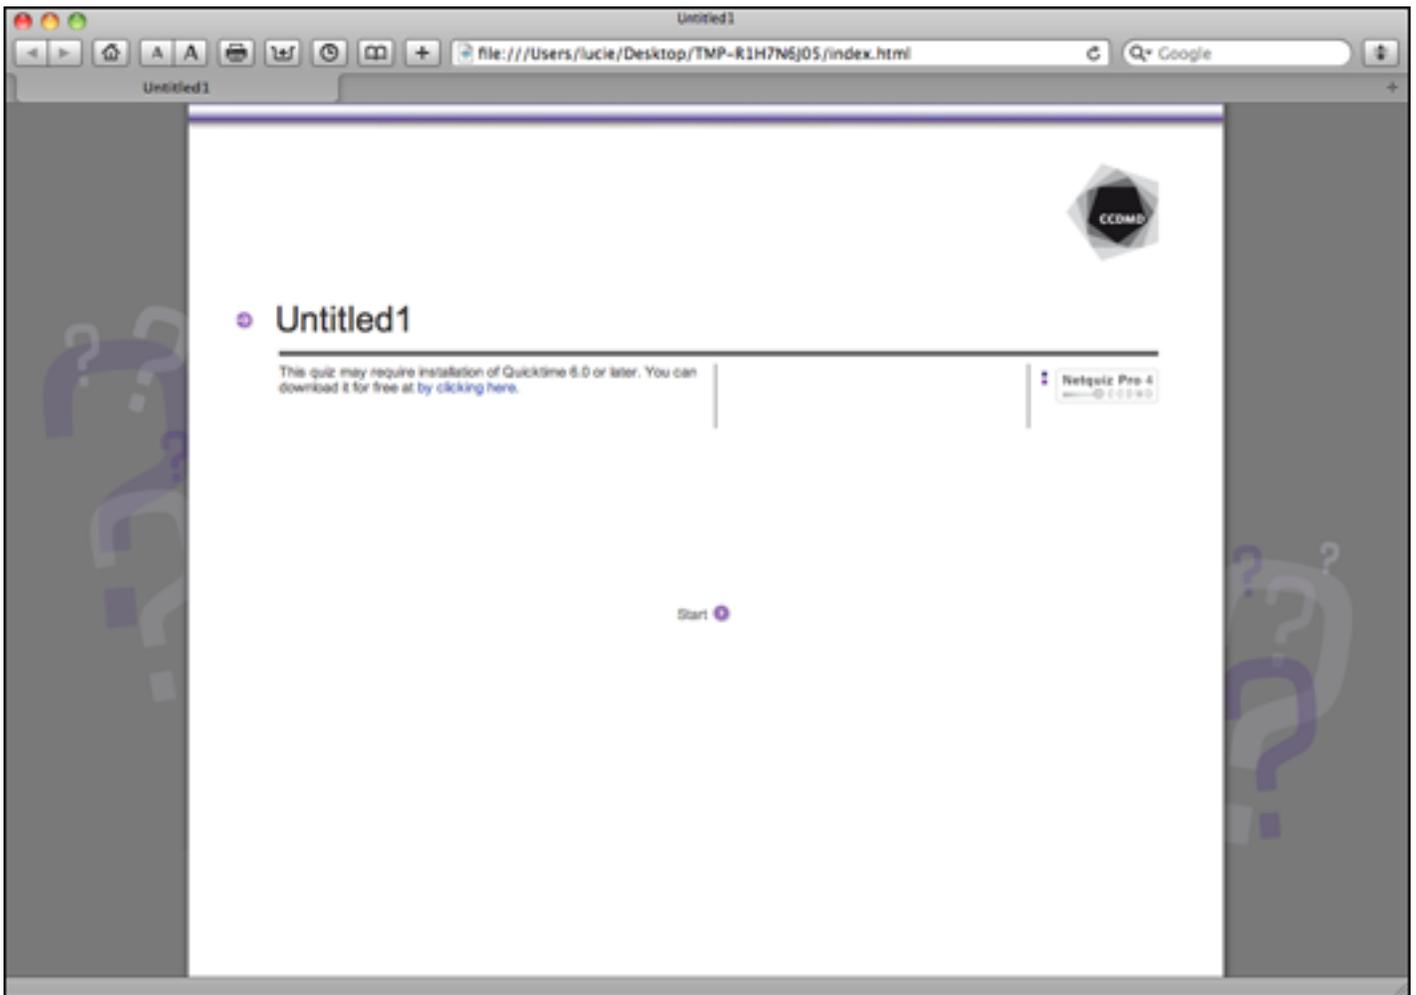

- The "Title to appear on the web quiz" is displayed in bold letters at the top of the "Home" page. This title is also used as a button to start the quiz, as is the "Start" button further down.
- The "Welcome message" is displayed below the title of the quiz.
- The "Warning" message appears in small letters beneath the "Welcome message" and the horizontal line. By default, the message reads as follows: "This quiz may require installation of Quicktime 6.0 or later. You can download the software for free by clicking here."
- The name of the "Author(s) / Institution" is displayed to the right of the "Warning", and left of the *Netquiz Pro 4* logo.

The Web Preview

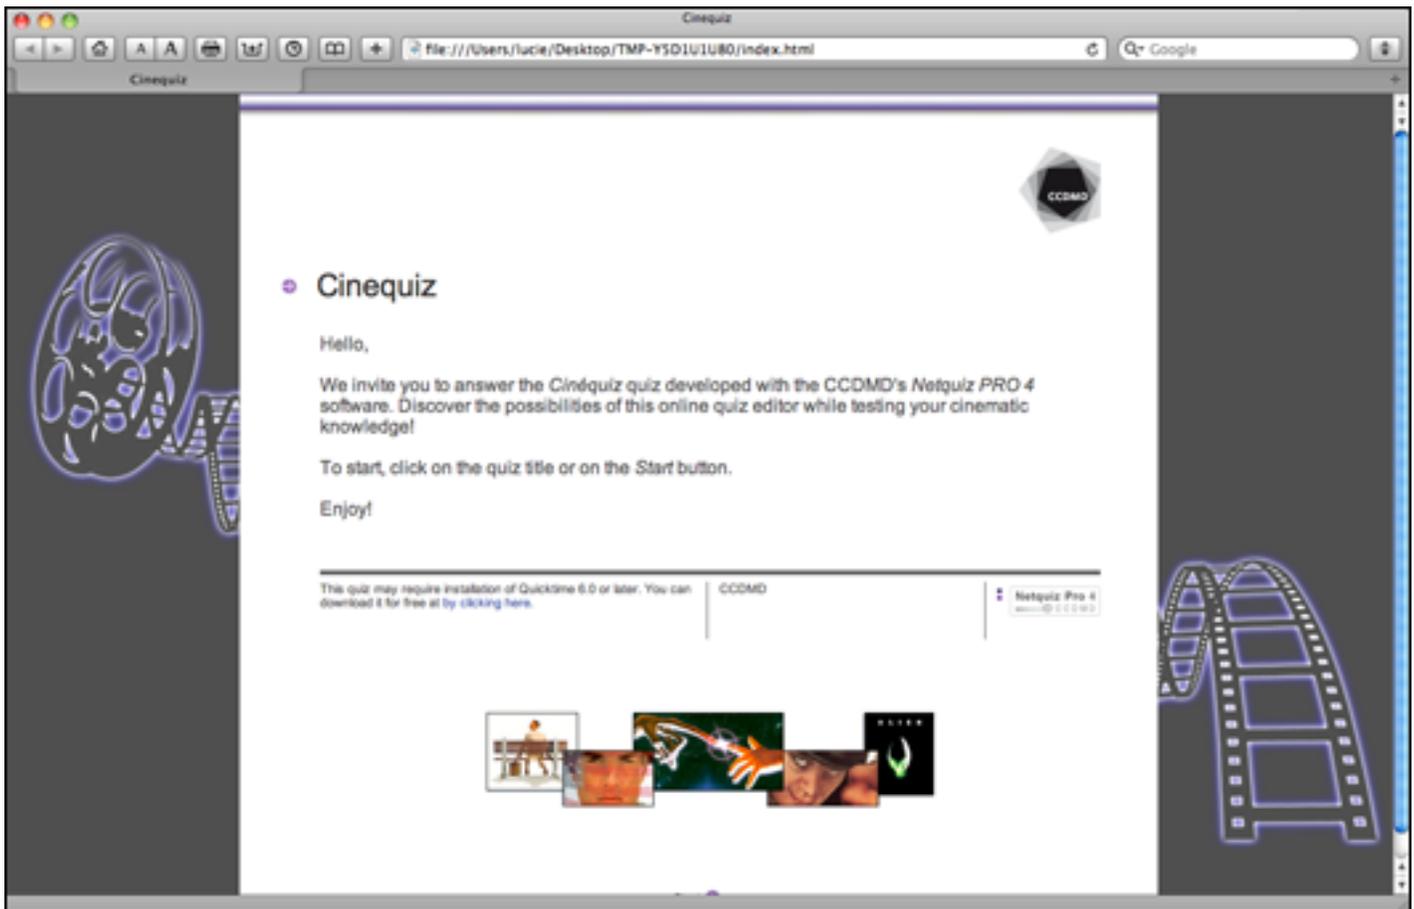

To be able to see a web preview of your quiz, you must have a browser installed on your computer (e.g. *Explorer* or *Firefox* on *Windows* or *Safari* on *Mac OS X*). Click the "Web Preview" button of the quiz preparation window to launch your browser and display the quiz as it first appears online. You can begin by clicking the quiz title or the "Start" button. Make sure to test all your questions before putting your quiz online (see [Putting a Quiz Online](#)).

You will notice that each time you generate a preview, a directory named TMP <series of random letters and numbers> appears on your desktop; this directory will disappear when you close the quiz's editing window.

N. B. If you repeatedly generate web previews, you may have to refresh the web page or empty your browser's cache in order to display the most recent changes.

Default web preview of a Home page

Web preview of a customized Home page

The quiz's "Home" page consists of the following items in this order:

- A quiz title which acts as a start button for the quiz
- An optional "Welcome message"
- A "Warning" in small letters, beneath the "Welcome message" and the horizontal line;
- The names of the "Author (s) / Institution" (optional), between the "Warning" and the *Netquiz Pro 4* logo
- Optional media (text, video, audio and images) stacked and centred according to the width of the screen page
- The "Start" button

QUIZ CONTENT

The "Content" tab of the quiz preparation window displays the list of questions that have been dragged into the quiz folder. Here you can modify the order of the sections and questions as well as certain question parameters for the quiz without affecting those same elements appearing in other quizzes.

Order	Code	Title	Question type	Points	Parameters	Delete
1	C29	International Cinema section	Section	0		
2	C1	The Master of Suspense	Multiple choice	1.0		
3	C3	Hollywood Stars	Matching	1.0		
4	C4	The Krzysztof Kieslowski Trilogy (1993-	Fill in the blanks	4.0		
5	C2	Box Office Success	Sequencing	1.0		
6	C5	Serguei M. Eisenstein	Multiple answer	1.0		
7	C7	That Obscure Object of Desire	True/False	1.0		
8	C8	The Fellini Universe	Fill in the blanks	1.0		
9	C9	Film Music	Multiple choice	1.0		
10	C22	French Quebec Cinema section	Section	0		
11	C10	Main characters	Matching board	1.0		
12	C6	Quebec cinema	Short answer	1.0		
13	C13	Denys Arcand	Multiple answer	1.0		
14	C14	Short film "Nelligan. Profil et regards."	Dictation	1.0		
15	C43	Quebec actors, or not?	Classification	1.0		
16	C40	Film titles and photo classifiers	Classification	1.0		
17	C15	Deceased film personalities	Highlight text	1.0		
18	C12	Directors and trailers	Identify parts of an image	1.0		
19	C11	Your opinion is important	Essay	0		

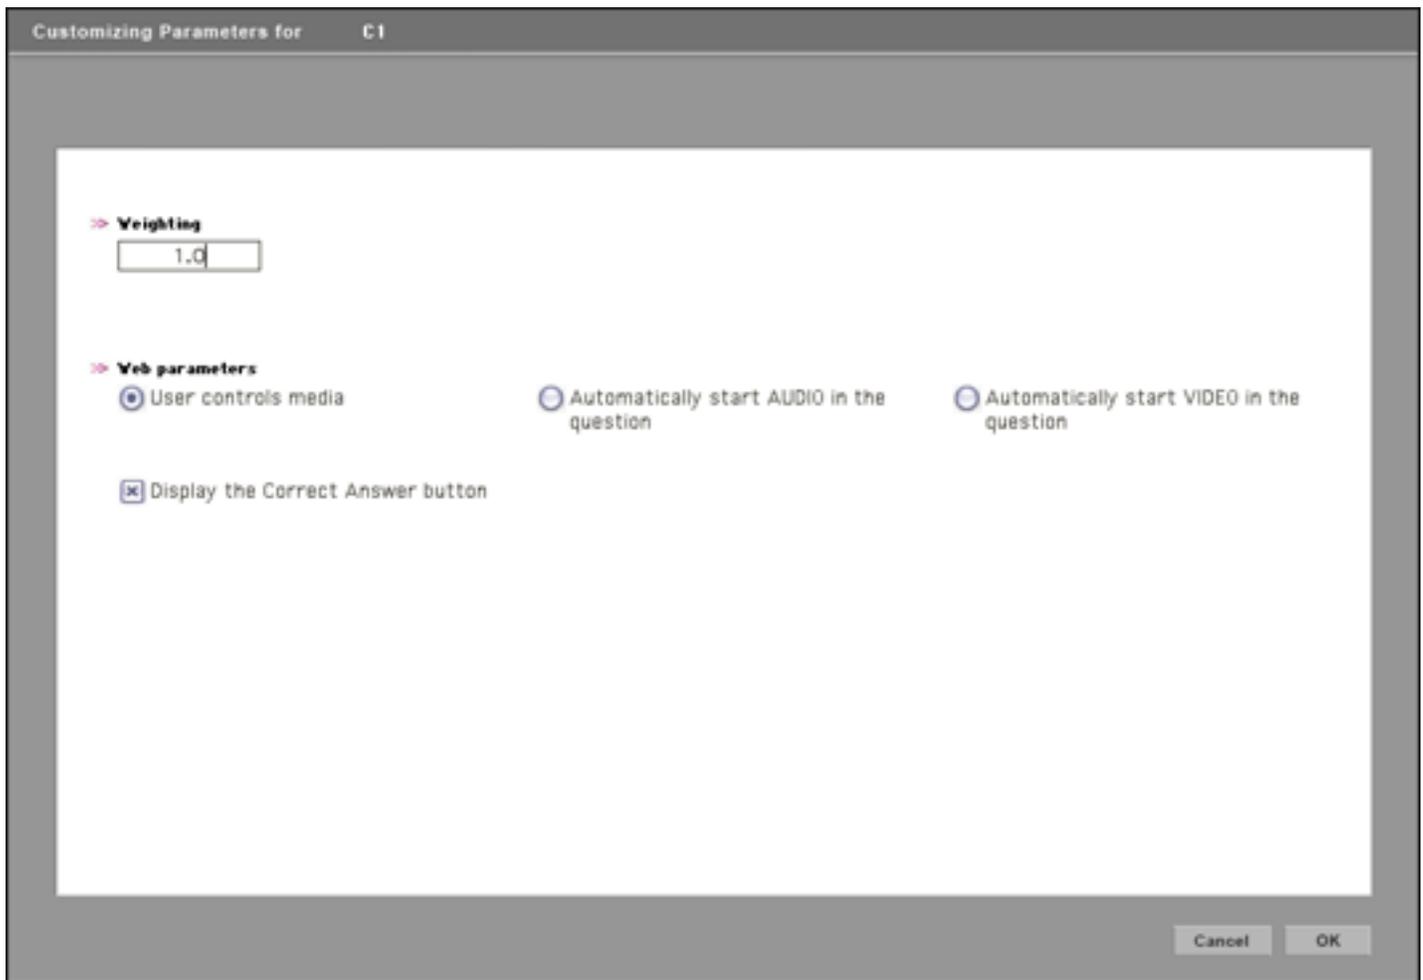

Content tab of the quiz preparation window

Ordering Questions or Section Pages

Drag and drop questions or section pages you wish to place them in the desired sequence. Note that if the "Random order" option is selected in the quiz's "Properties" (see [Quiz Properties](#)), the predetermined question order will not be applied. However, if the quiz contains sections, the position of the sections remains ordered, while the questions within the sections will appear in random order.

Question Parameters

Double click any cell in a question row to modify its parameters within that particular quiz only; a dialogue box will appear allowing you to enter a new weighting or customize the web parameters for this question. If you modify the parameters of a question, the word "Customized" will appear in the "Parameters" cell corresponding to that question.

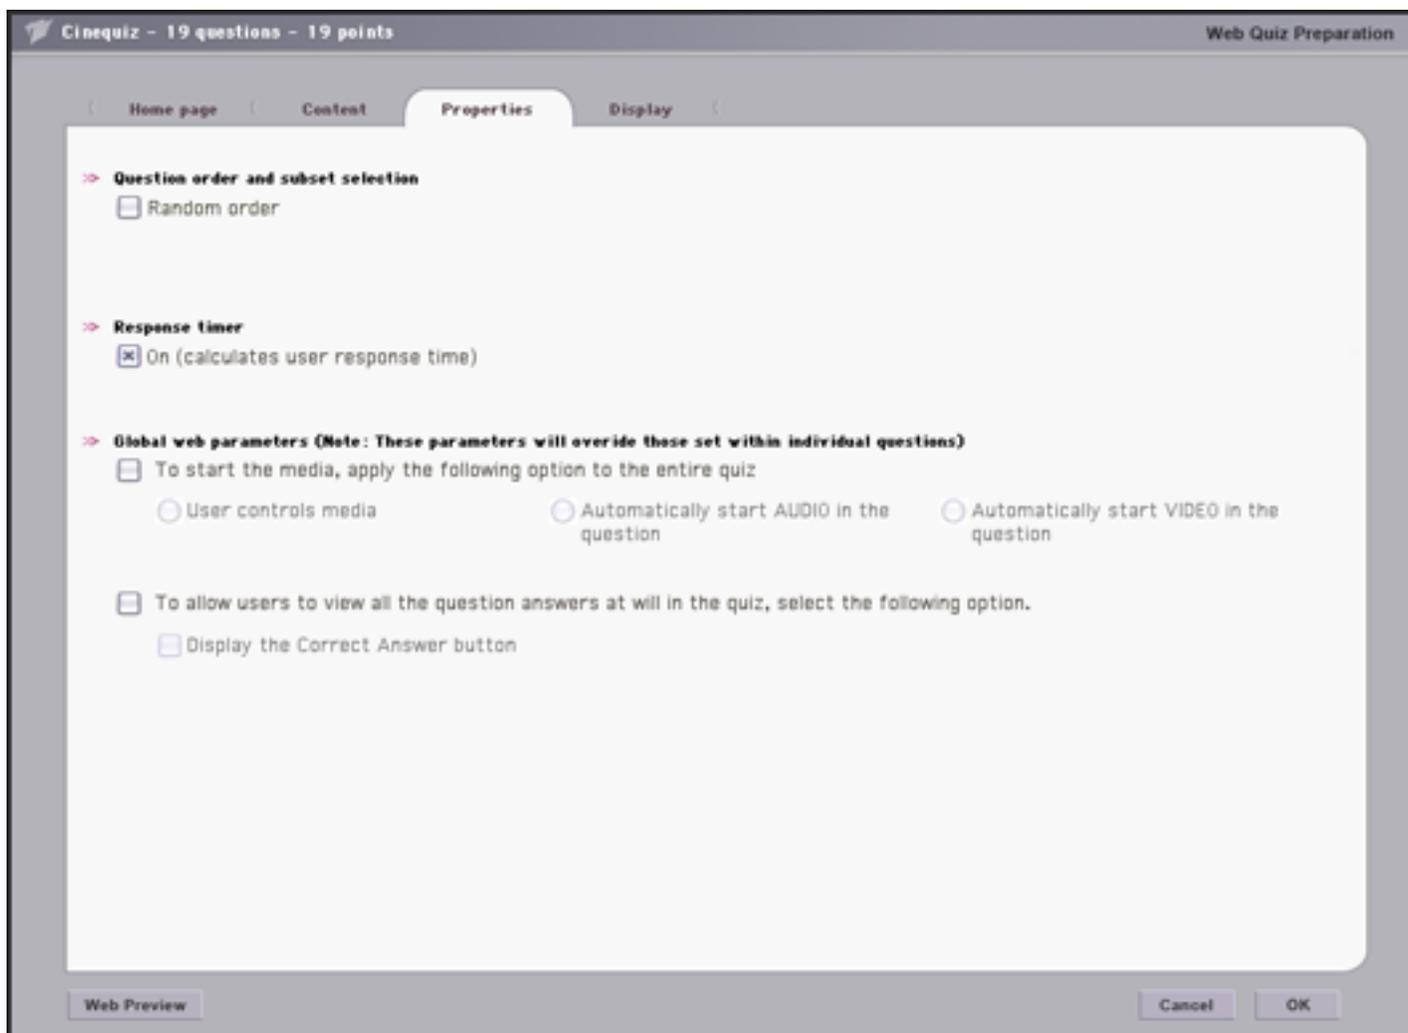

Dialogue box allowing you to customize certain parameters of a question in a given quiz

Deleting Questions

To delete questions, click within the cell of the "Delete" column of the questions you wish to delete. An "X" will appear indicating that these questions will be deleted when you close the window via the "OK" button. Note that deleting a question from a quiz will not delete it from your question bank.

QUIZ PROPERTIES

The "Properties" tab of the quiz preparation window lets you check options relating to the "Question order and subset selection" of the questions in the quiz folder. Options relating to the "Timer" and the "Global web parameters" are also configured here.

Properties tab of the quiz preparation window

Question Order and Subset Selection

By default, the questions are presented in "Random order". This means that the questions in the web version of the quiz will be presented in a different order for each quiz taker. Note that the sections always remain in the order defined in the "Content" tab, but the questions within them will be presented randomly. If you prefer the questions to be presented in the same order as the list of questions (as shown in the "Content" tab), you must deselect the "Random order" option.

The "Include all questions" and "[x] question subset selected from a set of <total number of questions>" options are only available in quizzes that do not contain sections. The "[x] question subset selected from a set of <total number of questions>" option generates a random subset of [x] questions from the total

number within a folder each time the quiz is started.

Response Timer

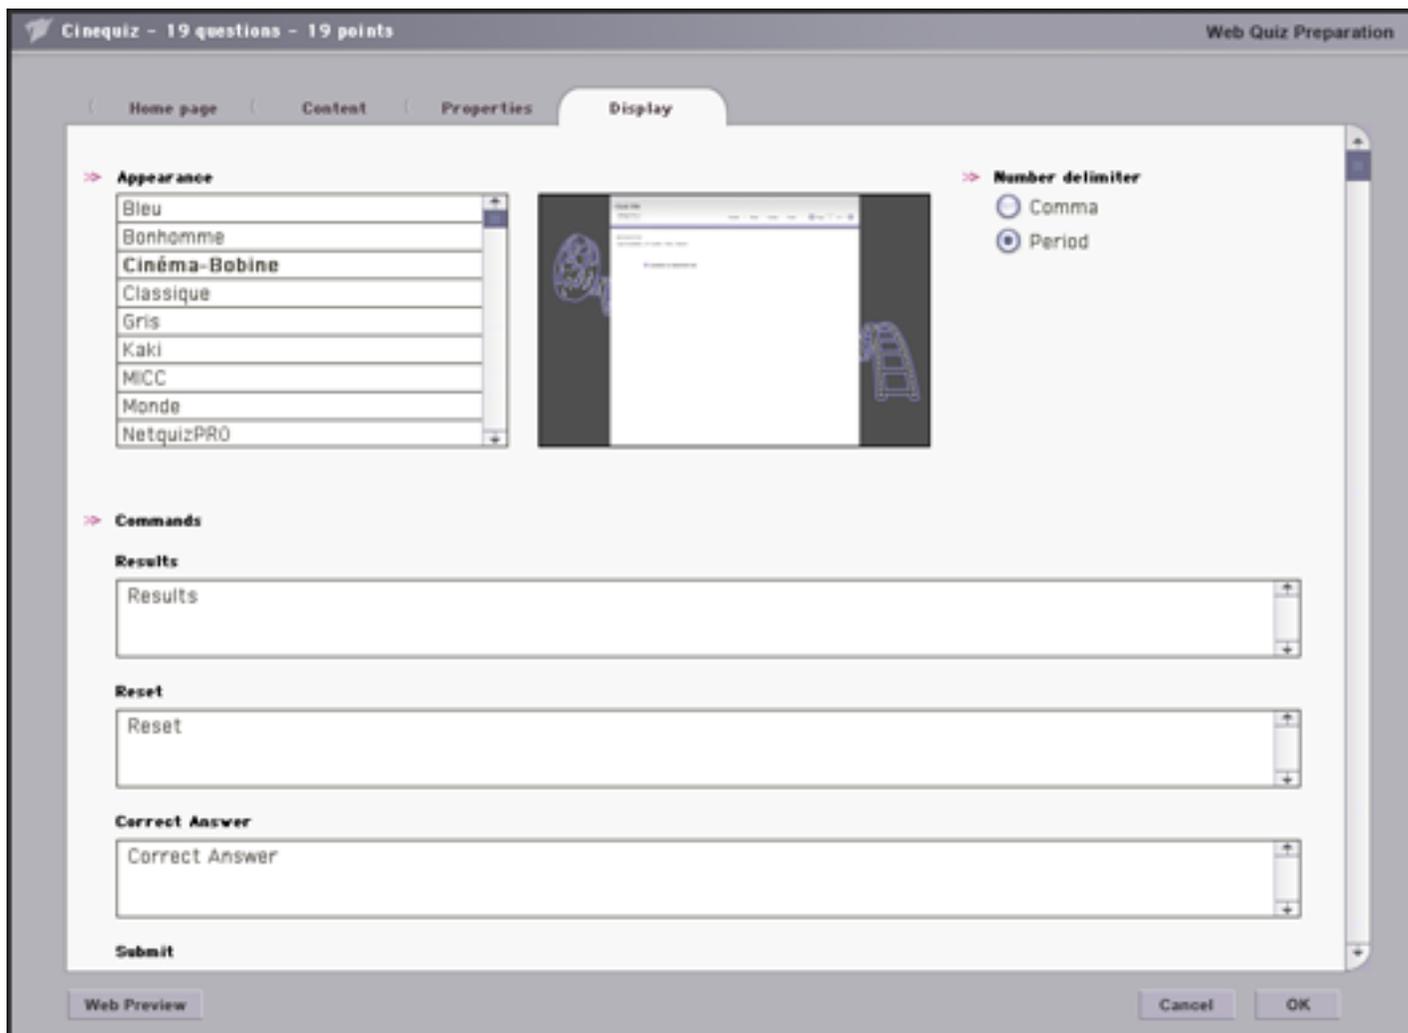

By default, the "Response Timer" option is deactivated. Check the "On" option, to calculate quiz takers' response time (in seconds) from the moment the page is displayed to the moment they clicks on the "Submit" button. If the quiz takers return to the same question repeatedly, only the most recent response time will be saved and displayed in the "Results" page (the last page of the quiz).

Global Web Parameters

When creating a question, you have the option to have the user control audio or video, or automatically start the audio or video included in the questions. You also have the option to display the "Correct Answer" button in the navigation bar. The "Content" tab of the quiz preparation window, allows you to change these parameters for a given quiz (see [Quiz Content](#)). To avoid having to customize each individual question, choose global parameters in the quiz's "Properties" tab as they will be applied to all the questions in the quiz.

DISPLAY

The "Display" tab of the quiz preparation window lets you customize the quiz. You can choose the "Appearance" and the type of "Number delimiter", and change or translate the "Commands", "Feedback", "Results display", "Question status", "Information", "Miscellaneous" and "Instructions" texts that appear in the web version of the quiz.

Display tab of the quiz preparation window

Appearance

To modify the appearance of the quiz, select one of the different "Appearance" themes listed. A preview is displayed to the right of the list. You can maximize the preview by clicking it to have a better look. It is also possible to create new quiz designs by copying and adapting the folders in the CONTENT/Appearance directory. You can modify the files so long as you respect exactly the same filenames and image formats as those already in place. Rename a folder and it will automatically be added to the list of themes.

Number Delimiter

Select either "Comma" or "Period" as the number delimiter.

Text for Commands, Feedback, Results Display, Question Status, Information, Miscellaneous and Instructions

To modify or translate the terms that appear in the interface of the web version of a quiz, replace the default text shown in the corresponding fields.

PUTTING A QUIZ ONLINE

There are two possible ways to put a quiz online. The first option, described below, is the most frequently used.

- 1) To upload your quiz to a web server, you will have to use an FTP application. Once the quiz is online, quiz takers can use their browsers to access it by entering the address directory followed by a forward slash and the name of the quiz.

For example

If the personal directory address on the web server is:

`http://ltrepanier.ep.profweb.qc.ca/`

and the quiz is called "MyWebQuiz", the quiz's web address (URL) will be:

`http://ltrepanier.ep.profweb.qc.ca/MyWebQuiz.`

- 2) By default, formative quiz results that are not submitted to a server are still compatible with SCORM standards. If you have access to a pedagogical platform complying with SCORM specifications, and you wish to follow-up on quiz takers's specific and overall grades, follow the instructions supplied by the institution hosting the platform. Quiz takers will also need to follow the instructions related to this platform in order to register and have access to the quiz.

ANSWERING A WEB QUIZ

A web quiz consists of a home page followed by a number of questions that are sometimes grouped together in a section. A quiz ends with a results page that displays the detailed results for all questions in the quiz.

Accessing a Web Quiz

There are two possible options for accessing a web quiz. The first option described below is the one most frequently used.

1) To access a quiz on a web server, users must simply enter the quiz's URL address in their browser.

Example: <http://ltrepanier.ep.profweb.qc.ca/MyWebQuiz>.

2) If a quiz has been placed on a pedagogical platform complying with the SCORM standard, users must follow the instructions applicable to this platform in order to be registered and answer the quiz.

The Home Page

When a web quiz begins to run, a "Home" page is displayed. Quiz takers must click on either the quiz title or the "Start" button. As the following illustrates, the "Home" page can contain the following optional elements: a welcome message above the horizontal line, a warning message below the horizontal line, and an image (as well as audio, video and/or text) above the "Start" button.

Web display of a quiz's Home page

The Navigation Bar

The section pages and question pages include a navigation bar at the top that displays the title of the quiz as well as the following buttons:

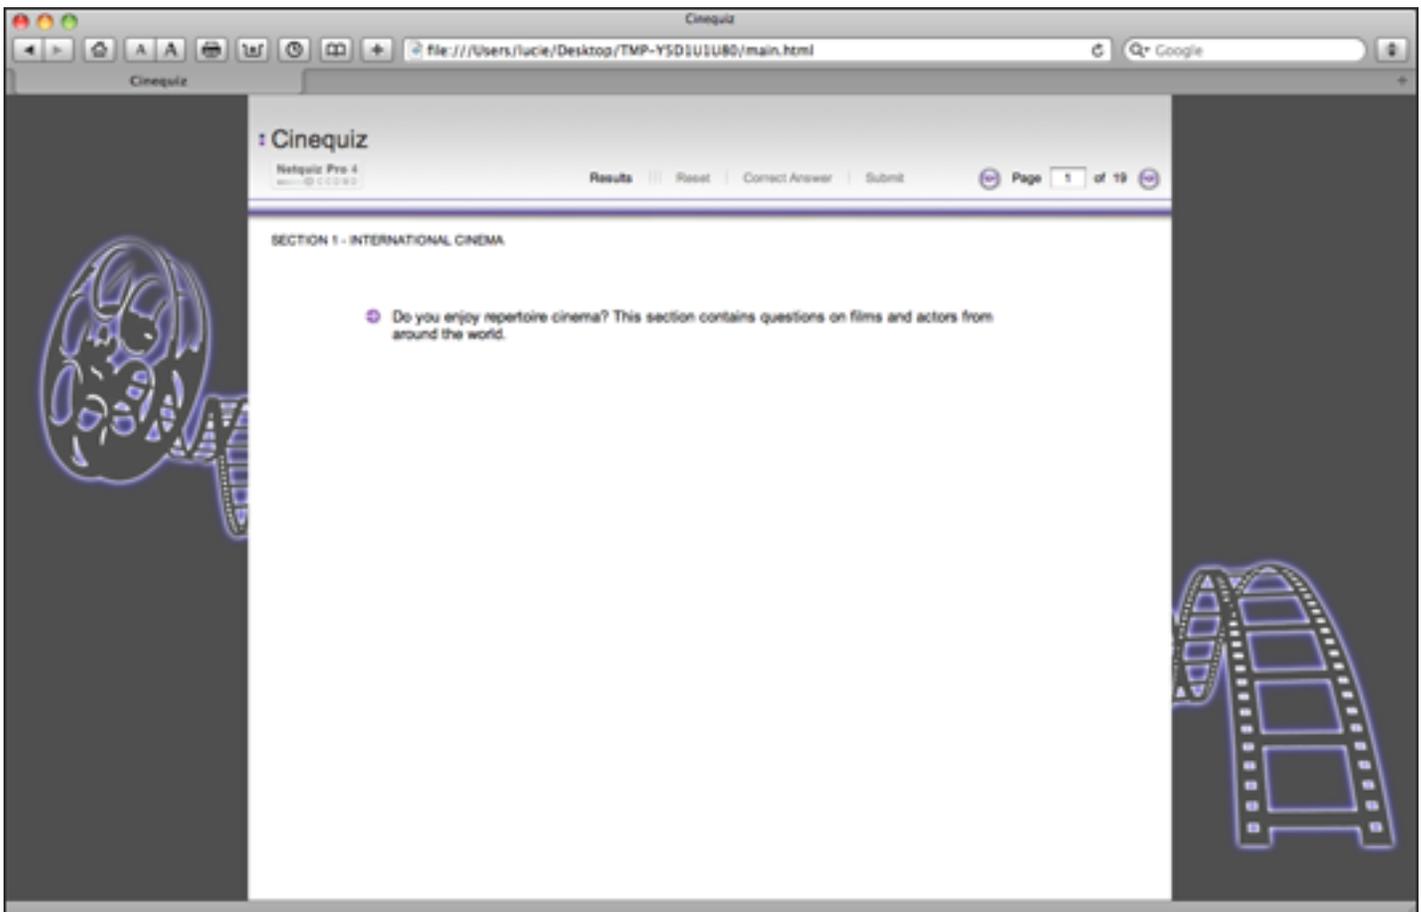

- The "Results" button displays the "Results" page, with detailed results for all questions in the quiz
- The "Reset" button purges the answer fields of the question in progress or resets the elements in ransom order
- The "Correct Answer" button (activated only if the "Display the Correct Answer button" option has been selected in the question's "Properties" tab) displays the answer at the bottom of the page
- The "Submit" button marks the question and displays feedback at the bottom of the question page
- The "<" and ">" arrows allow quiz takers to move back and forth from one question to another
- The "Page" number field (Page x of y) allows quiz takers to enter the number of the page they wish to access directly.

Navigation bar at the top of a web quiz's question or section page

The Section Page

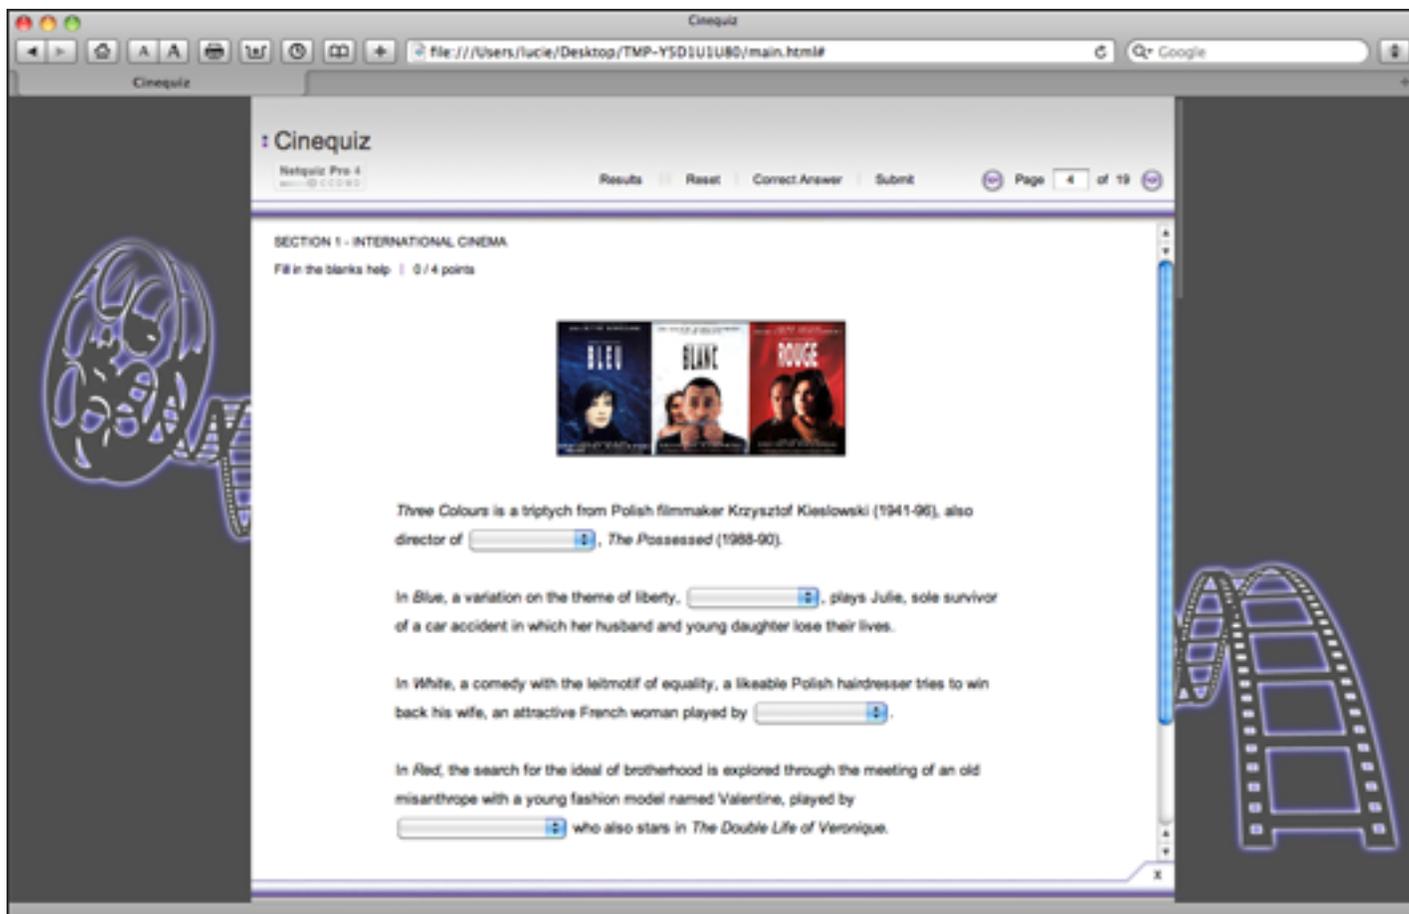

The questions in a web quiz can be grouped into sections. Normally, a section page contains a title at the top, and some text preceded by a decorative icon. A section can also contain the following optional elements: an image, audio clip, video clip or additional text above the section text itself. When a quiz contains one or more sections, the section title appears in the upper part of subsequent questions, until the beginning of the next section. Note that the "Reset", "Correct Answer" and "Submit" buttons are deactivated on section pages, as they do not apply.

Web display of a section page

The Question Pages

Each question is displayed on its own question page. The formatting will depend on the question type (below is a fill in the blanks question; for more details, see the help section for that question type).

Web display of a fill in the blanks question page

The Results Page

The navigation bar of the "Results" page contains only the quiz title, the navigation arrows, and the page number field that allows users to navigate to a specific page.

The "Results" page also contains:

- The overall quiz grade and percentage
- The "Start Over" button, which purges current results and restarts the quiz (with a new random question order if this option is applicable)
- The "Print" button that allows users to print their results (after they have filled out a form providing the personal information);
- A table displaying the detailed results for the questions ("Page" number, "Number of tries", "Response time" (if this option was checked during editing), "Points" and question "Status"). Note that the page numbers in this table are clickable and allow quiz takers to go directly to a specific question in the quiz.
