Description

This lexicon is designed to help nursing care students communicate in either English or French as a second language. It is divided into six sections: Descriptive Terms, Quick Reference, Abbreviations, English-French Terms, French-English Terms and Useful Phrases.

The lexicon was developed to reflect the needs of the hospital setting. The terms were selected based on the experiences of nurses and nursing care interns working in their second language.

French version also available: *Lexique de soins infirmiers : français - anglais*
